| 2 | Minutes of 12th January 2021 | (Pages 139 - 164) |

Access and Information

Getting to the Town Hall

For a map of how to find the Town Hall, please visit the council's website <http://www.hackney.gov.uk/contact-us.htm> or contact the Overview and Scrutiny Officer using the details provided on the front cover of this agenda.

Accessibility

There are public toilets available, with wheelchair access, on the ground floor of the Town Hall.

Induction loop facilities are available in the Assembly Halls and the Council Chamber. Access for people with mobility difficulties can be obtained through the ramp on the side to the main Town Hall entrance.

Further Information about the Commission

If you would like any more information about the Scrutiny Commission, including the membership details, meeting dates and previous reviews, please visit the website or use this QR Code (accessible via phone or tablet 'app')

<http://www.hackney.gov.uk/individual-scrutiny-commissions-children-and-young-people.htm>

Public Involvement and Recording

Scrutiny meetings are held in public, rather than being public meetings. This means that whilst residents and press are welcome to attend, they can only ask questions at the discretion of the Chair. For further information relating to public access to information, please see Part 4 of the council's constitution, available at <http://www.hackney.gov.uk/l-gm-constitution.htm> or by contacting Governance Services (020 8356 3503)

Rights of Press and Public to Report on Meetings

Where a meeting of the Council and its committees are open to the public, the press and public are welcome to report on meetings of the Council and its committees, through any audio, visual or written methods and may use digital and social media providing they do not disturb the conduct of the meeting and providing that the person reporting or providing the commentary is present at the meeting.

Those wishing to film, photograph or audio record a meeting are asked to notify the Council's Monitoring Officer by noon on the day of the meeting, if possible, or any time prior to the start of the meeting or notify the Chair at the start of the meeting.

The Monitoring Officer, or the Chair of the meeting, may designate a set area from which all recording must take place at a meeting.

The Council will endeavour to provide reasonable space and seating to view, hear and record the meeting. If those intending to record a meeting require any other reasonable facilities, notice should be given to the Monitoring Officer in advance of the meeting and will only be provided if practicable to do so.

The Chair shall have discretion to regulate the behaviour of all those present recording a meeting in the interests of the efficient conduct of the meeting. Anyone acting in a disruptive manner may be required by the Chair to cease recording or may be excluded from the meeting. Disruptive behaviour may include: moving from any designated recording area; causing excessive noise; intrusive lighting; interrupting the meeting; or filming members of the public who have asked not to be filmed.

All those visually recording a meeting are requested to only focus on recording councillors, officers and the public who are directly involved in the conduct of the meeting. The Chair of the meeting will ask any members of the public present if they have objections to being visually recorded. Those visually recording a meeting are asked to respect the wishes of those who do not wish to be filmed or photographed. Failure by someone recording a meeting to respect the wishes of those who do not wish to be filmed and photographed may result in the Chair instructing them to cease recording or in their exclusion from the meeting.

If a meeting passes a motion to exclude the press and public then in order to consider confidential or exempt information, all recording must cease and all recording equipment must be removed from the meeting room. The press and public are not permitted to use any means which might enable them to see or hear the proceedings whilst they are excluded from a meeting and confidential or exempt information is under consideration.

Providing oral commentary during a meeting is not permitted.

Contact: *Martin Bradford, Overview & Scrutiny Officer*
0208 356 3315
martin.bradford@hackney.gov.uk

Tim Shields
Chief Executive, London Borough of Hackney

Members:	Cllr Sophie Conway	Cllr Margaret Gordon	
	(Chair)	(Vice Chair)	
	Cllr Ajay Chauhan	Cllr Sade Etti	Cllr Humaira Garasia
	Cllr Katie Hanson	Cllr Clare Joseph	Cllr Sharon Patrick
	Cllr James Peters	Cllr Clare Potter	

Coopted Members: Justine McDonald, Shabnum Hassan, Jo Macleod, Ernell Watson, Shuja Shaikh, Michael Lobenstein

Agenda

ALL MEETINGS ARE OPEN TO THE PUBLIC

1.	Apologies for Absence
2.	Urgent Items / Order of Business
3.	Declarations of Interest
4.	Children & Families Service - Budget Monitoring (19.05) Budget monitoring is a key function of the scrutiny process and the Commission monitors in-year spending on services for children and young people in respective Directorates. The Children and Families Service in-year budget to November 2020 is presented for review.

Overview & Scrutiny

	<p>Anne Canning, Group Director Children Services Annie Coyle, Director of Children & Families Services Naeem Ahmed, Director of Finance, Children, Education, Adults & Community Health</p> <p>Report - Children & Families Service Budget 2020/21</p>
5.	<p>City & Hackney Safeguarding Children Partnership (19.30) Each year the annual report of the City & Hackney Safeguarding Children Partnership is presented to the Commission for review.</p> <p>Jim Gamble, Independent Chair Rory McAllum, Senior Professional Adviser</p> <p>Report - CHSCP Annual Report 2019/20</p>
6.	<p>Unregistered Educational Settings - Update (20.15) The Commission undertook a review of unregistered education settings in 2017/18 and continues to receive regular updates on the recommendations.</p> <p>Annie Gammon, Director of Education Chris Roberts, Head of Wellbeing & Education Safeguarding</p> <p>Report - Update on Unregistered Settings Review</p>
7.	<p>Q & A - Cabinet Member for Children, Education and Children's Social Care (20.35) The Cabinet member for Children, Education and Children's Social Care will attend to respond to questions within this portfolio. As per protocol, the Commission may focus questioning on up to three pre-agreed policy areas. These are listed below:</p> <p>1. The impact of Covid-19 has seen an increase in the number of children and young people being electively home educated. Can you provide further details on:</p> <ul style="list-style-type: none"> - The numbers of young people moving into EHE since March of this year? - The total number of young people in EHE? - The nature and level of support provided to ensure those in EHE receive an appropriate education'? - Oversight measures in place to ensure effective safeguarding of children in EHE, particularly those with vulnerabilities?

Overview & Scrutiny

	<p>2. Covid-19 has seen a significant decline in the number of young people referred to Children's Social Care. With reduced oversight of children in school, childcare and Health Visiting - how is the Children and Families Service working proactively with partners and the local Safeguarding Partnership to identify and support local children at risk?</p> <p>3. Extracurricular activities for children help to enrich and broaden the accessibility of school curricula. How has Covid-19 impacted on the provision of extracurricular activities (e.g. school sports, music and after schools clubs and vocational pursuits)? What role can the council play to develop and improve young people's access to local sporting, cultural and other community resources as the pandemic eases?</p> <p>Cllr Anntionette Bramble, Cabinet Member for Children, Education and Children's Social Care</p>
8.	<p>Child Friendly Borough - Cabinet Response (21.20) The Commission reviewed proposals for the Child Friendly SPD and made a number of recommendations. The Cabinet response to these recommendations is attached.</p>
9.	<p>Work Programme (21.20) To note and agree to the work programme for the remainder of 2020/21.</p>
10.	<p>Minutes (21.25) To note any actions and agree to the minutes of the meeting held on 7th December 2020.</p>
11.	<p>Any other business (21.30) The date of the next meeting is Monday 8th February 2021.</p>

Report Title:	Children's Services Finance Forecast - November 2020
Meeting for:	Children & Young People Scrutiny Commission
Date:	16 December 2020
Produced by:	Children's Finance Team
Authorised by:	Naeem Ahmed & Anne Canning

Summary

- This report highlights the financial position of Children's Services as at the end of November 2020. The report includes the financial impact the COVID-19 pandemic has had on the service.
- The report highlights the main budget variances across the service as well as the management actions that have been developed to reduce the overspend across the service.

Children's Services Finance Update

November 2020

Summary position

Children's Services (CS) is forecasting a £3.64m overspend (5.9%) as at the end of November against budget after the application of reserves totalling £7.075m. COVID-19 related expenditure accounts for £2.135m of the reported budget overspend. The draw down from reserves includes:

- £3.869m from the Commissioning Reserve, set up to meet the cost of placements where these exceed the current budget.
- £1.6m for additional staffing required to address a combination of increased demand across the service and management response to the Ofsted inspection.

The forecast also incorporates £4.650m of Social Care Grant funding (that is an additional £3.450m in 2020/21 when compared to last year). Set against this, there is a significant increase in spend driven by looked-after children (LAC) and leaving care (LC) placements costs within Corporate Parenting where the net overall spend is forecast to increase by £5.2m compared to last year (excludes reserves and Social Care grant, however £1.34m has been identified as relating to COVID-19). There is also an increase in forecast spend on staffing across CS of £3.4m when compared to last year (£0.6m has been identified as relating to COVID-19 and £0.67m relates to an increase in the employer pension contribution from 15.6% to 18.5% and a further £0.77m for pay inflation of 2.75%). £1.6m is linked to increased staffing levels agreed in response to increased demand and additional posts agreed to assist in responding to the Ofsted recommendations arising from the inspection in November 2019 in which the Council received a 'requires improvement' judgement.

Table 1 breaks down the forecast across different service areas and includes how much of the forecast is attributed to COVID-19 expenditure.. Table 2 sets out use of one-off funds and reserves.

Table 1A: Directorate Forecast (£k)

Original Budget	Virements	Revised Budget	Service unit	Forecast Variance from Budget (before Reserves)	Reserves usage	Variance after Reserves	Change in Variance from Oct '20	How much of variance owed to Covid-19

Corporate reserves	(135)	(75)	(60)	£98k Redundancy; £36k Early Help Review
Children's Services Total	(7,075)	(7,002)	(73)	

Main variances against budget

Corporate Parenting is forecast to overspend by £3.6m (includes £1.34m of COVID-19 expenditure) after the use of £3.9m of commissioning reserves. This position also includes the use of £2.9m of social care funding that was announced in the October 2019 Budget - £0.6m is in relation to staffing costs and the remaining £2.3m is for placements. The overall position for Corporate Parenting has increased by £0.5m since October and is largely due to increased placements costs linked to COVID-19.

Children's Services November 2020 forecast

One of the main drivers for the cost pressure in Corporate Parenting continues to be the rise in the number of children in costly residential placements which has continued to grow year-on-year and the number of under 18s in high-cost semi-independent placements. Where children in their late teens are deemed to be vulnerable, and in many cases are transitioning from residential to semi-independent placements, they may still require a high-level of support and in extreme circumstances bespoke crisis packages. We are also seeing an increase in the number of Independent Fostering Agency (IFA) placements and a stagnation in the number of in-house fostering placements. The annual cost of an IFA placement (£50k) is twice as much as an In-house fostering placements (£25k).

Directorate Management Team is forecast to overspend by £354k after a drawdown of £712k reserves for Post Ofsted staffing pressure and £166k Social Care Grant funding for the creation of two Service Manager posts. £276k of staffing pressure in relation to COVID-19 is forecast in this area, and this includes an estimate of additional staffing relating to delays in closing cases during this period.

Disabled Children's Service is forecast to overspend by £155k after the use of £476k of reserves. Staffing is projecting an overspend of £160k due to additional staff brought in to address increased demand in the service. This is offset by £215k of additional Social Care Grant funding. Commissioning is projecting a £625k overspend attributed to care packages (£292k Home Care, £353k Direct Payments, Short Breaks and other commissioning £-20k). Other operating costs pressures come to £60k.

Access and Assessment is forecasted to underspend by £139k after the use of reserves which relates to staff vacancies in the team, delays in recruitment and the emergency duty team demand being projected to be lower than anticipated for the year. There are significant levels of non-recurrent funding in the service including £564k of reserve funding to provide additional capacity following the Ofsted inspection.

Safeguarding and Learning Service is forecast to underspend by £104k. Staffing is underspend by £118k, which is due to some vacancies in the team and delays in recruitment. Supplies and Services are also forecasted to underspend by £14k (mainly due to Security Services and Hire of Room / Halls not being incurred due to COVID-19).

Children In Need is forecasted to overspend by £38k after the use of reserves. There are significant levels of non-recurrent funding in the service including £687k of Social Care Grant funding in recognition of staffing pressure at the start of the financial year. Recruitment to permanent Social Worker posts are in progress which should address the high numbers of agency staff currently in this service.

Management actions to reduce costs

The interim Director of Children's Services is working to refresh and assess the financial impact of measures to reduce costs and therefore the overspend and reliance on one-off reserve funding going forward. Table 3 provides an overview of measures already in place.

Table 3: Management actions

Service unit	Description	Commentary on action
Corporate Parenting	Joint funding on health and children's social care packages	The Transition Steering Group has agreed a process and individual placement are in the process of being reviewed. Placement contributions from the CCG towards eligible healthcare needs will be backdated to 1 April 2020.
Corporate Parenting	Review and reduction in high cost placements as part of budget review meetings.	Reviewing high cost residential, semi-independent and IFA placements on a rolling monthly basis to see if any packages can be stepped down. Residential and semi-independent placements are expensive so a reduction in placements can have a significant impact on the forecast.
Corporate Parenting	Mockingbird Project and Supported Lodgings	The extended family model for delivering foster care with an emphasis on respite care and peer support, and new arrangements for implementing Supported Lodgings will also be reviewed going forwards.

Children's Services November 2020 forecast

Corporate Parenting	FLIP & Edge of Care	Work undertaken by FLIP and Edge of Care workers aimed at preventing children and young people coming into care and supporting young people back to their families.
Service wide	Improved flexible use of staffing and recruitment controls	The Director of Children's Services is developing an improved system for monitoring staffing levels, enhancing flexible use of staff across the service and increasing controls over recruitment.

Conclusion

Despite further funds available to Children's Services this year, primarily through the Social Care Grant and significant drawdown from one-off reserves and grants, the service is forecasting an overspend of £3.6m, of which £2.1m is attributable to Covid-19.

The service is working with finance on a suite of actions to reduce the overspend position and reliance on one-off reserve funding. Key to making real inroads into expenditure are actions to reduce the numbers of children and young people looked after, particularly those in a residential care setting where the net cost of one placement for a year is approximately £200k and managing demand so staff numbers in post can be maintained at budgeted levels.

Report Title:	The CHSCP Annual Report 2019/20
Meeting for:	Children & Young People Scrutiny Commission
Date:	12 January 2020
Produced by:	The CHSCP
Authorised by:	Jim Gamble QPM, Independent Child Safeguarding Commissioner

Summary

The City & Hackney Safeguarding Children Partnership annual report for 2019/20 provides an overview on the effectiveness of safeguarding arrangements in the City of London and the London Borough of Hackney. It sets out the following:

- The governance and accountability arrangements for the CHSCP. This section covers details about the new safeguarding arrangements in the City of London and Hackney, progress made and the immediate actions taken following the Covid-19 lockdown in March 2020.
- The context for safeguarding children and young people in the City of London, highlighting the progress made by the City partnership over the last year.
- The context for safeguarding children and young people in the London Borough of Hackney, highlighting the progress made by the Hackney partnership over the last year.
- The lessons that the CHSCP has identified through its Learning & Improvement Framework and the actions taken to improve child safeguarding and welfare as a result of this activity.
- The range and impact of the multi-agency safeguarding training delivered by the CHSCP.
- The priorities going forward and the key messages for those involved in the safeguarding of children and young people.

The report is presented in draft form pending formatting into its usual digital format. The content will remain the same and a link to the final report will be circulated as soon as possible. Delays in this regard have arisen as a consequence of Covid-19, pressures on The CHSCP team and the most recent cyberattack in Hackney.

City & Hackney Safeguarding Children Partnership

Annual Report 2019/20

Foreword

The 2019/20 period covered significant change and high levels of disruption. This began with our preparations to move to the new safeguarding arrangements and as the reporting year ended, the onset of the COVID-19 pandemic. Whilst this annual report captures our multi-agency performance data, achievements and the lessons we have learnt, it would be remiss of me not to acknowledge our present situation at this challenging moment in time. In this respect, it is important that whilst we do everything we can to support our communities, that we also pause to reflect on the debt of gratitude that we owe to everyone working in and supporting our frontline safeguarding services.

Our commitment to ensure that our children are seen, heard and helped has been tested by the imposition of restrictions that no one could have anticipated a year ago. That said, partners have risen to the challenge. They have developed contingency plans, adapted practice and pivoted to the use of digital technology to maintain vital lines of communication with one another and critically, the vulnerable children and families they support. Our oversight and scrutiny of practice has also continued and the report identifies progress made, the areas we still need to work on and outlines the focus for the year ahead. Whilst I am pleased that the report reflects improvements made by a number of sectors, I am deeply disappointed that we have failed to make progress regarding safeguarding compliance in unregistered educational settings, namely Yeshivas. Our commitment to improve our safeguarding line of sight in this area is undiminished and we are actively considering additional measures to address our ongoing concerns.

Over 2019/20, both The City of London Corporation and Hackney Council were subject to Ofsted inspections of their children's social care services. The City of London Corporation received an overall outstanding rating, with Hackney Council requiring improvement. Whilst both were inspections of local authority services, we must not forget that helping and protecting children and young people is a multi-agency responsibility. It remains our collective responsibility to ensure that safeguarding practice is effective.

Looking back, the data in the report speaks for itself. That said, I do not believe a system whereby we publish this so long after the fact is helpful. Moving forward we must ensure that information is delivered in a more contemporary sense. It is therefore our intention to refresh our approach by publishing a quarterly safeguarding threat assessment. I believe the timely analysis and delivery of safeguarding information that identifies contemporary trends, themes and patterns will enhance collective focus and decision-making.

Furthermore, over the coming year, we will seek to develop our arrangements for hearing the authentic voice of children and young people, enhance independent scrutiny and lead by example by driving a culture of Anti-Racist practice. We must ensure that all of our young people have the ability to live, learn and thrive.

The City & Hackney Safeguarding Children Partnership

Background

In 2015, the government commissioned Sir Alan Wood to review the role and functions of Local Safeguarding Children Boards (LSCBs). The Wood Report was published in March 2016, with the government formally responding in May 2016. The Wood Report recommendations were subsequently embedded in statute in April 2017 with the granting of Royal Assent to the Children and Social Work Act 2017. As a consequence, four important areas of change have followed.

- Firstly, LSCBs, set up by local authorities, have been replaced. ^{DRAFT} Three safeguarding partners (*local authorities, clinical commissioning groups and chief officers of police in a local area*) must now make **new safeguarding arrangements** to work together with relevant agencies (as they consider appropriate) to safeguard and protect the welfare of children in the area.
- Secondly, the current system of Serious Case Reviews has been replaced. Safeguarding partners must now make arrangements to identify and review **serious child safeguarding cases** which, in their view, raise issues of importance in relation to their area.
- Thirdly, a **National Child Safeguarding Practice Review Panel** has been created and is responsible for identifying and overseeing the review of serious child safeguarding cases which, in its view, raise issues that are complex or of national importance.
- Fourthly, two partners (*local authorities and clinical commissioning groups*) have been specified as 'child death review partners' and must set up new **child death review arrangements**. These new arrangements should facilitate a wider geographic footprint and respond to the statutory guidance defining how deaths will be reviewed and how the bereaved will be supported.

The City & Hackney Safeguarding Children Partnership launched its new arrangements in September 2019. The published arrangements are available [HERE](#).

Purpose

The new safeguarding arrangements support and enable local organisations and agencies to work together in a system where:

- Children are safeguarded and their welfare promoted.
- Partner organisations and agencies collaborate, share and co-own the vision for how to achieve improved outcomes for vulnerable children.
- Organisations and agencies challenge appropriately and hold one another to account effectively.
- There is early identification and analysis of new safeguarding issues and emerging threats.
- Learning is promoted and embedded in a way that local services for children and families can become more reflective and implement changes to practice.
- Information is shared effectively to facilitate accurate and timely decision making for children and families.

Vision

That all children in the City of London and Hackney are seen, heard and helped; they are effectively safeguarded, properly supported and their lives improved by everyone working together.

Principles

As leaders across a range of organisations, the commitment of the CHSCP is to work together to make the lives of children safer by protecting them from harm; preventing impairment to their health and/or development, ensuring they receive safe and effective care; and ensuring a safe and nurturing environment for them to live in. The CHSCP wants to make sure that everyone who works with children across the City of London and Hackney has the protection of vulnerable children and young people at the heart of what they do. In practice, this means that children are seen, heard and helped:

- **Seen;** *in the context of their lives at home, friendship circles, health, education and public spaces (both off-line and on-line).*

- **Heard;** *by professionals taking time to hear what children and young people are saying - putting themselves in their shoes and thinking about what their life might truly be like.*
- **Helped;** *by professionals remaining curious and by implementing timely, effective and imaginative solutions that help make children and young people safer.*

The CHSCP's aim is to ensure that safeguarding practice and outcomes for children are at least good, and that staff and volunteers in every agency, at every level, know what they need to do to keep children protected, and communicate effectively to ensure this happens. All of our activity is underpinned by the following principles:

DRAFT

- **Safeguarding is everyone's responsibility.** As a partnership, we will champion the most vulnerable and maintain a single child-centred culture.
- **Context is key.** Capitalising on the unique opportunities presented by a dual-borough partnership, we will have an unswerving focus on both intra-familial and extra-familial safeguarding contexts across the City of London and the London Borough of Hackney.
- **The voice of children and young people.** We will collaborate with children and young people and use their lived experience to inform the way we work. We will regularly engage with them as part of our core business and ensure their voices help both design and improve our local multi-agency safeguarding arrangements.
- **The voice of communities.** Improving our understanding of the diverse communities across the CHSCP's footprint, we will regularly communicate with, listen to and engage local communities in the work of the CHSCP. We will harness their experience to both inform and improve the way we safeguard and promote the welfare of children and young people.
- **Enabling high quality safeguarding practice.** We will promote awareness, improve knowledge and work in a way that is characterised by an attitude of constructive professional challenge.
- **Fostering a culture of transparency.** We will enable the CHSCP to learn from individual experience and **continuously improve** the quality of multi-agency practice.

Key Roles & Relationships

Safeguarding Partners

The safeguarding partners agree on ways to co-ordinate safeguarding services; act as a strategic leadership group in supporting and engaging others; and implement local and national learning. All safeguarding partners retain an equal and joint responsibility for local safeguarding arrangements. In situations that require a single point of leadership, safeguarding partners will decide on which partner will take the lead on relevant issues that arise. The safeguarding partners in the City of London and the London Borough of Hackney are **Hackney Council, The City of London Corporation, The City & Hackney Clinical Commissioning Group (CCG), The Metropolitan Police Service (MPS) and The City of London Police**. The lead representatives of the safeguarding partners are:

Page 28

- **Tim Shields, The Chief Executive of Hackney Council**
- **John Barradell, The Town Clerk of the City of London Corporation**
- **Jane Milligan, The Accountable Officer of the City & Hackney CCG**
- **Marcus Barnett, The Commander of the MPS Central East BCU**
- **Ian Dyson, Commissioner, City of London Police**

Relevant Agencies

Safeguarding partners are obliged to set out which agencies are required to work as part of the CHSCP's arrangements to safeguard and promote the welfare of local children. These agencies are referred to as *relevant agencies* and have a statutory duty to cooperate with the CHSCP's published arrangements. A defined number of relevant agencies will meet regularly with safeguarding partners as the CHSCP Executive. Others will be invited when deemed necessary and/or be included in various CHSCP sub-groups / thematic groups. Wider engagement events will also be facilitated through the City & Hackney Safeguarding Partnership which includes a much broader range of agencies, professionals and volunteers involved in safeguarding children and young people. A schedule

of relevant agencies is defined in part 4 of the Child Safeguarding Practice Review and Relevant Agency (England) Regulations 2018. Safeguarding partners can also include any local or national organisation or agency in their arrangements regardless of whether they are named in the above regulations.

The Independent Child Safeguarding Commissioner

Jim Gamble QPM is The Independent Child Safeguarding Commissioner (ICSC) of The CHSCP. The ICSC is appointed by safeguarding partners and given authority to coordinate the independent scrutiny of the local child safeguarding arrangements. The ICSC is fundamentally independent to local safeguarding partners and relevant agencies. The ICSC has significant experience of operating at a senior level in the strategic coordination of multi-agency services to safeguard and promote the welfare of children.

DRAFT

The ICSC provides independent leadership (through engagement, commentary and lobbying) in respect of local matters relevant to the safeguarding of children and young people. The ICSC holds both safeguarding partners and relevant agencies to account for their effectiveness in safeguarding children and young people. The ICSC chairs The CHSCP Strategic Leadership Team and The CHSCP Executive to ensure fundamental independence is built into the oversight of statutory safeguarding partners and relevant agencies. The ICSC also chairs the Case Review sub-group to ensure independent decision making in respect of the commissioning and progress of reviews. Safeguarding partners delegate this decision-making function to the ICSC and ratify any decisions made. The ICSC continues to be engaged with elected officials to brief on specific issues, raise concerns and to provide an independent overview of practice. This takes place via 1:1 meetings and other forums (such as 'joint chairs' meetings) and those that engage elected members and other local boards (Health & Wellbeing / SAB / CSP). The ICSC is also engaged by the Local Authority scrutiny functions in both the City of London and Hackney.

The Strategic Leadership Team

The Strategic Leadership Team (SLT) are senior officers that can speak with authority for the safeguarding partner they represent. They can hold their organisation to account, take decisions and commit them on policy, resourcing and practice matters. The SLT is chaired by the Independent Child Safeguarding Commissioner and comprises the following:

- **Anne Canning, The Group Director of Children, Adults and Community Health (Hackney Council)**

- **Andrew Carter, The Director of Children and Community Services (The City of London Corporation)**
- **David Maher, The Managing Director (The City & Hackney CCG)**
- **Marcus Barnett, The Commander of the MPS Central East BCU**
- **Dai Evans, T/Commander, City of London Police**
- **Annie Gammon, Director of Hackney Education (Hackney Council)**

We have included the Head of Hackney Education on The CHSCP's SLT. This reflects the importance placed by safeguarding partners on having an 'education lens' within our statutory decision-making processes. Whilst the role does not represent individual schools (in either Hackney or the City of London), it occupies an important position of influence within the local safeguarding architecture. Whilst acknowledging the limitations in respect of 'decision-making' (i.e. this role cannot make decisions on behalf of the sector as a whole), it is a valuable asset for advice, challenge and support at SLT.

The CHSCP Executive

The CHSCP Executive comprises representatives from safeguarding partners and a number of relevant agencies and named / designated professionals. Other relevant agencies will be invited to participate / engage in the CHSCP Executive as and when required. The CHSCP Executive meets bi-monthly and is independently chaired by the Independent Child Safeguarding Commissioner with a nominated safeguarding partner representative being Vice-Chair (Vice-Chairs rotate annually).

Lay Members

The attendance of Lay Members at CHSCB meetings and a variety of other forums has been key to offering a different perspective and helping everyone stay in touch with local realities and the issues of concern in our communities. As part of the transition into the new arrangements, 2019/20 saw both remaining Lay Members, Belinda Blank (City of London) and Shirley Green (Hackney) step down from their positions that they had occupied for a number of years. Both helped critically influence the functioning of the partnership, engaging in a variety of different forums and offering their unique perspective based on their regular engagement in the communities with whom they remain intrinsically connected. The process to replace both Lay Members has been interrupted by Covid-19.

Lay Members continued to demonstrate an unwavering commitment to the work of the safeguarding partnership. The CHSCB is hugely grateful to both Shirley and Belinda (and Sally Glen who stepped down previously) for their dedication, time and effort in promoting improved public engagement in the safeguarding of children and young people.

The CHSCP Team

The CHSCP is supported by a dedicated group of staff. The team includes a Senior Professional Advisor, a Business and Performance Manager, a Training Co-ordinator and a Co-ordinator role.

DRAFT

Relationships with other Boards

Continued engagement with the City & Hackney Safeguarding Adults Board (CHSAB) and other strategic partnerships in the City of London and Hackney continues through a 'joint chairs' meeting. There have also been additional opportunities for the CHSCP to interface with elected members through the scrutiny functions operating in both the City and Hackney. This has helped ensure that the voice of children and young people and their need for safeguarding has been kept firmly on the agenda in terms of multi-agency work involving vulnerable adults, health and wellbeing and the local response to crime.

CHSCB
31

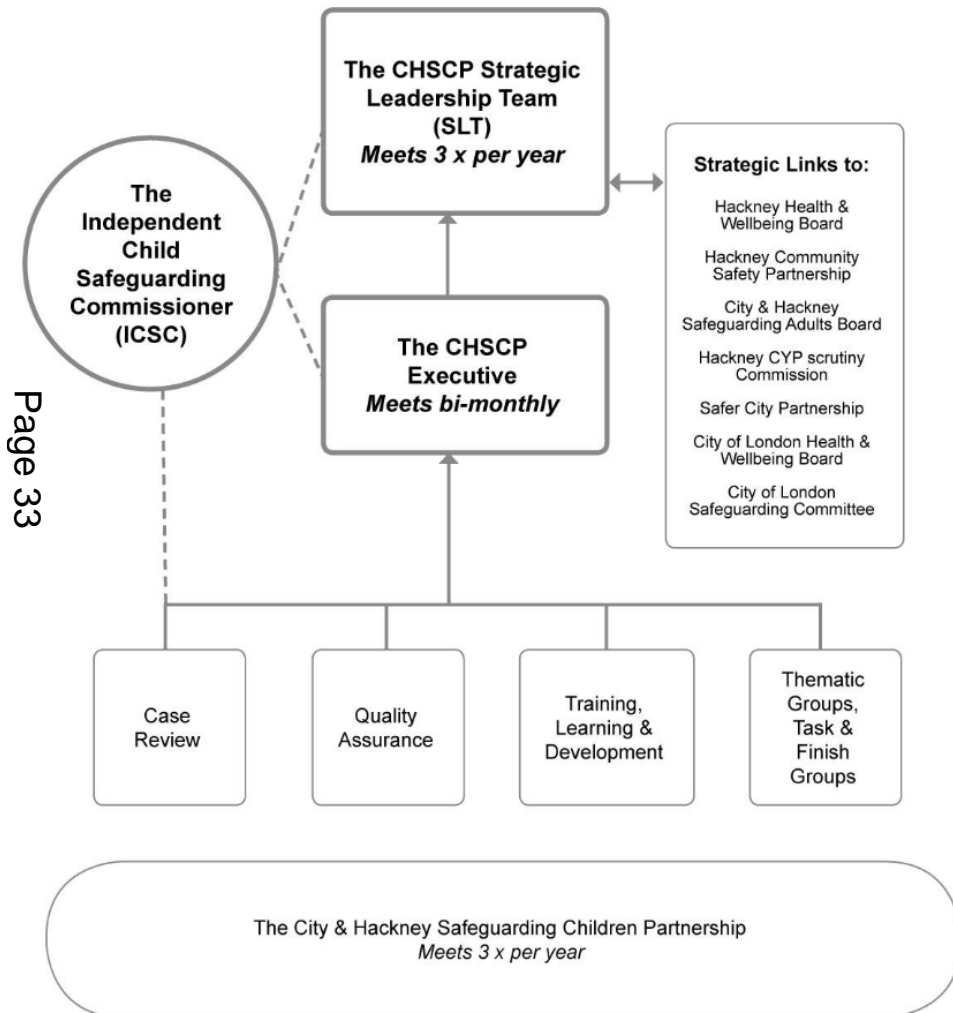

Membership & Attendance

The CHSCB and the meetings convened under the new safeguarding arrangements experience good attendance from organisations during 2019/20. The transition period resulted in the usual cycle of meetings being interrupted, although the CHSCB met twice during the 2019/20, with the SLT and CHSCP Executive meeting in November 2019 and December 2019 respectively. In March 2020, as a result of the first Covid-19 lockdown, the CHSCP pivoted to holding Contingency Oversight Planning Meetings in place of the CHSCP Executive. These were set up to support and challenge partners with the sufficiency of their contingency plans to safeguard children. Attendance rates at the CHSCB and CHSCP Executive are set out below. The x represents the number of seats per organisation.

DRAFT

Independent Chair / ICSC	x	100% Attendance
Lay Members	xx	75% Attendance
The City of London Community & Children's Service	xxx	100% Attendance

CHSCP Structure

DRAFT

Financial Arrangements

Partner agencies continued to contribute to the CHSCP's budget for 2019/20, in addition to providing a variety of resources, such as staff time and free venues for training. Total spending in 2019/20 totalled **£360,147**

- **Hackney Education and The City of London Corporation continued to provide access to free training venues to the CHSCB.**
- **The City of London Corporation covered the major costs for the 2019/20 Annual Conference held in March 2020.**

As part of its Corporate Social Responsibility (CSR) programme, [Inege](#) continues to support the local partnership in the production of its annual report.

Serious Case Reviews £36,674

Staffing and Travel £260,635

Training & Annual Conference £34,534

Printing, Supplies and Equipment £12,404

Venues £15,865

Miscellaneous £35

Total expenditure £360,147

Progress on Implementation

Strategic Decision Making

At this early stage in the development of new arrangements, there is evidence that they are having some positive effect impact on multi-agency strategic decision making. We have initially experienced a good level of engagement from statutory safeguarding partners within our new arrangements; a continuation of the culture experienced when the CHSCB was in operation. Safeguarding partners have agreed four key priorities for safeguarding practice and have committed to a pledge as to the implementation of these. We believe the arrangements enable our statutory safeguarding partners to focus on the key issues and risks that require leadership attention. We also remain confident that as the arrangements evolve, this focus and operation of SLT will improve.

DRAFT

Accountability

We are looking to develop a more robust approach to accountability by ensuring that Chief Executives and senior leaders with safeguarding responsibilities are directly engaged with and sighted on their individual organisation's strengths and weaknesses. To do this, we are actively exploring a model used in Ireland under its safeguarding legislation - Children First 2015. This approach requires organisations to complete risk assessments and develop Child Safeguarding Statements that are required by law to be published and displayed. Statements are produced annually and authorised by the CEO declaring that their services are sufficient (and where not, the actions that will be undertaken to improve).

Independent Scrutiny

To strengthen our approach and openness to independent scrutiny, the CHSCP is planning to launch its own Scrutiny Board. It will be led by the Independent Child Safeguarding Commissioner and comprise key roles with responsibility for internal agency scrutiny. The purpose of this group will be, through participation and contributions, to develop a coordinated approach to safeguarding children scrutiny in the City and Hackney, to drive clarity and establish strategic focus relating to scrutiny of safeguarding children and to establish an approach that facilitates constructive engagement with a focus on mentoring and continuous improvement.

Pivot to Digital

We are pivoting to ensure our digital capabilities are mainstreamed into the functions of our arrangements and front-line practice. Whilst a necessity due to the pandemic, we are finding some accrued benefits of working arrangements in this context.

The CHSCP's pivot to digital has extended our reach in terms of on-line training. Since March 2020, we have trained over 700 professionals and volunteers in Level 1 and Level 3 safeguarding training. We have also launched two Apps (Private Fostering and Safer Schools) and an online self-assessment process to replace the Section 11 / Section 157/175 audits. We have created a bespoke version for smaller organisations, including out of school settings.

Safeguarding partners and relevant agencies in both The City of London and Hackney demonstrated flexibility and initiative in developing new arrangements to hold virtual multi-agency meetings and virtual home visits to children and families. Supported by developed practice guidance, in some aspects of work there has been an improvement in multi-agency engagement and the ease in which partners can communicate information rapidly and make decisions to safeguard children and young people.

Relevant Agencies

Whilst we have always experienced good engagement from the vast majority of organisations with safeguarding responsibilities, we believe greater clarity is required in respect of the options available to safeguarding partners should there be active and purposeful non-cooperation. Locally, safeguarding partners have taken an approach of naming all organisations that engage children and young people as relevant agencies (regardless as to whether named in the regulations or not). This has been done with the express intent of leveraging maximum cooperation from (and support to) a range of agencies that have historically operated on the periphery of core safeguarding practice. In 2020, The CHSCP sought the advice of Counsel with regards to the enforcement action available to both safeguarding partners and the secretary of state. From this advice, we understand safeguarding partners retain an option (in particular circumstances) to seek a mandatory injunction to enforce the obligation to comply with the CHSCP's published arrangements or escalate concerns through to regulators. This issue has been escalated to Sir Alan Wood as part of his phase 2 review into the new safeguarding arrangements.

Operational Impact

It is too early to quantify the impact of the new arrangements on operational activity, but in a number of areas, there has been a noted improvement in cooperation and practice. Part of this has been driven by the need for organisations to think and respond differently due to Covid-19. This has forced new ways of working and a pivot to digital solutions that have positively promoted working together as opposed to fracturing it.

The Voice of Children and Young People

New arrangements have yet to be fully developed in this regard, but the voice of children and young people is a priority of safeguarding partners. We are currently reviewing how we capture the authentic voice of children and young people. This work has been delayed as a consequence of the pandemic, but is beginning to gain some traction in specific projects (for example, we are working with the safeguarding adults board to engage young people in respect of transitional safeguarding). Safeguarding partners have committed to supporting and enabling a culture of working that routinely seeks out and reflects the voices of children and young people. This includes the CHSCP engaging directly with children and young people. The lived experience of local children and young people and their voices are evident in the policies we create and the communication channels to our wider partnership. Importantly, it is examined in our activity that reviews multi-agency casework.

Local Learning

We have retained a menu of different ways in which our reviews can be undertaken consistent with statutory requirements and those set out within our learning and improvement framework. These methods range from traditional approaches (using an independent reviewer), to ones where local practitioners are facilitated to meet and identify practice improvements. The decision on which model to use rests with the Independent Child Safeguarding Commissioner and is case dependent. Overall, we are committed to speeding up the process of reviews and cascading learning more rapidly. The new Rapid Review process has been helpful to identify early lessons, although we remain cautious not to pre-judge learning in this respect. Some of the most important practice improvements we have identified in our local arrangements were not visible at such an early stage.

Challenges

Challenges, however, remain. Whilst the contexts of safeguarding are different across the City of London and Hackney, the three biggest challenges facing multi-agency safeguarding work are considered to be the following:

- **The impact of COVID-19** creating challenges in respect of the sufficiency of current and future workforce capacity. Contingency arrangements in this regard have been scrutinised by the CHSCP. Whilst there is evidence of resilience, there remains concern as to the potential for future workforce challenges. These centre on the longer-term effects on the mental health of practitioners arising from extended periods of remote working in a highly charged and challenging area of practice.
- **Many support systems for children and young people (via school, services, friends and family) have changed, with some being reduced or removed.** Children and young people are less visible and families are under increased financial and social pressure. There is a general challenge in identifying, preventing and responding to the risks facing children and young people.
- In respect of themes, there are **continuing concerns about meeting the mental health needs of children and young people**, exacerbated as a consequence of COVID-19. Locally, an increase in **head injuries in young children, on-line harm and accidents arising as a result of hazards at home** are other issues on which The CHSCP's is focussing.

COVID-19

Contingency Planning, Oversight & Resilience

Since March 2020, the CHSCP has undertaken ongoing scrutiny of contingency arrangements relating to COVID-19 via analysis of partner contingency plans and partnership meetings. This has served to identify emerging issues throughout the crisis such as attendance at A&E, domestic violence, mental health and more recently, a local increase in head injuries to babies / toddlers and risks arising from hazards in the home. This has led to / is leading to a focused approach by safeguarding partners on targeted awareness raising, specific guidance and training.

During the pandemic, partners have also swiftly pivoted to digital solutions to ensure that partners remain engaged despite not being able to physically meet. Multi-agency processes such as strategy discussions, child protection conferences and visits to children have all been undertaken virtually where required, and supported by the partnership. The CHSCP has also prepared for further challenges by ensuring that safeguarding partners and relevant agencies have clear plans in place and are sufficiently prepared. This has been achieved by conducting a **COVID-19 Operational Resilience Audit**. A major focus of this audit activity has related to workforce sufficiency and the cruciality of safeguarding partners ensuring effective support is in place across the system. Whilst the CHSCP had already identified the health and wellbeing of the workforce as a priority, Covid-19 has accelerated reassurance work by safeguarding partners in this respect. It is positive to note that the anticipated pressures during the first lockdown did not materialise, although we maintain a watching brief on this issue, testing sufficiency and overseeing risk.

88% of organisations have either partially or fully identified best practice and agreed pathways for staff to access occupational health support. These pathways have been shared with managers.

96% have a risk assessment process which assesses the risk to individual employees from the COVID-19 virus. It identifies increased risks due to staff's age, ethnicity, gender and relevant health conditions.

93% of organisations have ensured staff who have suffered bereavement, due to COVID-19 or other reasons, are supported to access specialist support services and that they have policies and practices in place for pastoral support of staff.

Communication

The CHSCP continues to promote its digital platforms and communications reach. The CHSCP website, designed during the 2015/16 period, has allowed for user-friendly content searches and accessible resources.

www.chscp.org.uk

The CHSCP website has continued to allow for user-friendly content searches and accessible resources. Most visited pages were those relating to training and case reviews.

@lscp_chscp

The CHSCP Annual Conference held on 4 March 2020, our tweets earned over 4.5k impressions

Private Fostering APP

Following the success of the City of London Private Fostering App, the CHSCP developed and launched a bespoke App for the partnership. Alongside providing information about private fostering, the App includes a training module and other important advice for safeguarding professionals.

[TUSK Briefings](#)

The CHSCP produces e-briefings called Things You Should Know, more commonly referred to as 'TUSK briefings'. These are circulated to subscribers and also cascaded by Board members to staff within their organisations. The number of subscribers to the TUSK has increased from 570 at the end of March 2019 to 1414.

Page 40

Safeguarding Children in the Context of their Access to Technology and use of Social Media

With the growing use of technology and social media, all professionals need to adopt a much more sophisticated approach to their safeguarding responsibilities. They need to reflect on the changing nature of communication and how this impact upon practice issues, particularly those focused on the identification and assessment of potential risk. To do this successfully, professionals need to recognize that children and young people do not use technology and social media in isolation. Their offline and online worlds are converged, and both need to be understood when trying to identify the type of support that a child, young person and their family might need.

DRAFT

To help professionals (and parents / carers) better understand this complex environment, new Apps have been launched by Hackney Council and the City of London Corporation. The Safer Schools App provides support on topics including online bullying, mental health, sexting, media literacy, gaming and sexual exploitation online. It costs nothing to download and provides access to advice, guidance and CPD accredited training, with a specific focus on making children and young people safer in the online world.

1 MARAC meeting involving children ↔

8 referrals to the LADO ↑

0 Private Fostering arrangements as of March 2020 ↔

Safeguarding in The City of London

City of London Demographics

The City of London has an estimated resident population of about 8500 and a transient daytime working population of around 330,000. Of the resident population, approximately 16.9% are children and young people. The City of London is an economically diverse area, with its population characterised by areas of affluence and poverty. Within the Square Mile, there are large disparities. The Barbican West and East residential areas are among the most affluent areas in England. Portsoken Ward, however, is among the most deprived. An estimated 78% of the City of London population is White British; however, approximately 40% of children are from black or ethnic minority groups compared to 21% nationally. The Bangladeshi community makes up 4% of the total population. Domestic abuse remains a key issue in the City with the majority of child protection investigations in the City involving domestic abuse concerns. There are no children involved in the criminal justice system currently and no teenage pregnancies. Academic attainment for City resident children is higher than the national average. The numbers of children and young people Not in Education, Employment or Training (NEET), obesity rates, infant deaths and underweight babies, hospital admissions for self-harm, deliberate injury, alcohol-related injury and the number of pregnant smokers are all low with numbers ranging from 0 to 5 in each category. Within the City, there is one maintained primary school (with a Children's Centre attached), four independent schools and several higher educational establishments. It has no maintained secondary schools. The majority of children attending these schools come from other boroughs and most of the local authority's secondary school age children go to school outside of the City.

Early Help

***'Work is appropriately held within early help, and there is evidence of good direct work with families to effect change. There is effective engagement with partner agencies to support individual families, and, strategically, to develop the early help service further.'* OFSTED 2020**

Early help services across the City of London are delivered by People's Services and a range of partners, including schools, children centres, one GP surgery and health colleagues as well as other local service providers, including the community and voluntary sector. They are effective, and some are particularly

strong. The range of services available to children, young people and their families in the City continue to adapt and evolve based on the needs of the local population. The early help arrangements in the City have been in place now for a number of years and are embedded with agencies. All children needing an early help service in the City receive a well-resourced, dedicated service, which is provided by trained staff. Over 2019/20, the Early Help Strategy for the City of London continued to drive partnership improvements. With a focus on ensuring the right help is provided at the right time and in the right place, the strategy is focussed on key strategic objectives and is coordinated by the CHSCP City Early Help Sub-Group. Through critical reflection, consultation and co-production with children and families, partners from the Multi-Agency Practitioners Forum and the City's Parent Carer Forum for children with SEND, the following progress has been made:

The City has a clear Thresholds of Need document that has been agreed with partner agencies. This is used to provide services at an appropriate stage and as early as possible to prevent higher levels of need in the future.

There is a single point of contact for referrals to Early Help services and Children's Social Care, enabling timely and appropriate decision making and allocation.

The Early Help Assessment is co-created with the family, including discussions with the child/ young person as well as with practitioners from involved agencies.

*Early help practice in the City of London is **Empowered**: evidenced through insightful assessments by highly skilled staff, that lead to robust offers of help.*

***Child-centred**: evidenced by children and young people routinely being present at meetings or represented through direct work. **Integrated**: evidenced through a strong 'Think Family Focus', and a 'top-three' (cases of concern) collaboration across children's, health, adult, housing and homeless service.*

An external audit commissioned by The City of London in 2019 found: The Early Help practice audited was purposeful and well-focused on specific outcomes for children. The quality of intervention is very good and the consistent quality of supervision by the Early Help Coordinator supports strong and reflective practice.

In 2019/20, the total number of cases referred or stepped down to early help services was 21, a small reduction from 27 in 2018/19. There were no re-referrals to early help within 12 months of closure. This has been a consistent pattern and reflects the effectiveness of the multi-agency intervention to improve outcomes for children and young people, preventing problems getting worse.

Children in Need of Help and Protection

‘Children in need of help and protection within the City of London receive a good service that is proportionate to their needs and enables them to effect positive change. Risks to children are minimised and, where required, additional support is provided to prevent concerns from escalating.’ OFSTED 2020.

Good practice with children and young people who are in need of help and protection can be seen when help is provided early in the emergence of a problem and there is a well-coordinated multi-agency response. Thresholds between early help and statutory child protection work are appropriate, understood and operate effectively. Risk is effectively mitigated and outcomes improved through good assessment, authoritative practice, planning and review.

The City of London Corporation undertook a virtual visit thematic audit in May 2020. This showed that social workers were aware of the potential deficits in using virtual visits to assess and manage risk. There was evidence when comparing the quality between face to face and virtual visits that social workers had taken this into consideration by following the guidance they had been given. Telephone contact did not give the same depth or quality of information required, as audits completed using this method showed that the interaction was rather one-dimensional. Where possible, video/face to face visits were used. Since August 2020, all visits have been face-to-face, unless there are risk factors which require alternative planning. Data shows a large increase in fact to face visiting for quarter 3.

Contacts, Referrals and Assessments

The Children and Families Team Hub provides responsive screening activities and ensures all contacts are immediately progressed as a referral if the threshold for a statutory social work assessment is met. Signposting activity requires staff to have a continually updated knowledge of local services alongside a comprehensive understanding of the City of London Thresholds of Need. The 314 contacts made to the Children and Families Hub reflects a minor decrease on previous years. However, referrals show an upward trend. The re-referral rate in the City of London was 15%, an increase from 8.7% in 2018/19. Overall, the performance data in the City continues to be indicative of a good social work response and timely access to appropriate support that helps children and their families.

The Children and Families Team Hub aims to ensure that only those children meeting thresholds for statutory assessments are progressed as referrals. Local Authorities undertake these assessments to determine what services to provide and what action to take. The full set of statutory assessments under the Children Act 1989 can be found [HERE](#).

The Children and Families Team completed 67 assessments during 2018/19, almost double the number (35) in 2017/18. 78% of assessments undertaken in the City were completed within 45 days or less. The rate of child protection (Section 47) enquiries in 2019/20 evidenced a slight reduction from 137.6 per 10,000 to 123 per 10,000. The threshold for Section 47 enquiries in the City is appropriate. Children are not being unnecessarily subjected to child protection intervention and practice is proportionate to the presenting need. Where a child protection response is required, these are all completed in a timely manner. 100% of Initial Child Protection Conferences take place within 15 days of the strategy meeting where the decision was taken to convene an enquiry. This means that in the City of London, children receive a swift service when safeguarding concerns are apparent. All Section 47 enquiries undertaken in the City are led by a suitably qualified and experienced registered social worker.

Children on Child Protection Plans

***'When children are identified as being at risk, strategy meetings are convened in a timely manner and are well attended by professionals, who provide relevant information to inform decision-making. Decisions following these meetings and any subsequent enquiries are clearly recorded by managers to facilitate effective interventions with families.'* OFSTED 2020**

Following a child protection enquiry, where concerns of significant harm are substantiated and the child is judged to be suffering, or likely to suffer, significant harm, social workers and their managers should convene an Initial Child Protection Conference (ICPC). An ICPC brings together family members (and children / young people where appropriate) with supporters, advocates and professionals to analyse information and plan how best to safeguard and promote the welfare of the child / young person. If the ICPC considers that the child / young person is at a continuing risk of significant harm, they will be made the subject of a Child Protection Plan (CPP).

Children who have a CPP are considered to be in need of protection from either neglect, physical, sexual or emotional abuse; or a combination of one or more of these. The CPP details the main areas of concern, what action will be taken to reduce those concerns and by whom, and how professionals, the family and the child or young person (where appropriate) will know when progress is being made. Five children were subject to a CPP in the City at the end of 2019/20. In 2019/20, 93% of CP visits took place within timescales compared to 83% in 2018/19. No children were on a child protection plan for over 12 months.

Children in Care

A child or young person who is 'looked after' is in the care of the local authority. They can be placed in care voluntarily by parents struggling to cope, they can be unaccompanied asylum-seeking children; or in other circumstances, The City of London Corporation and partners will intervene because the child or young person is at risk of significant harm. As of 31 March 2020, the City was responsible for looking after 24 children and young people, a further increase. The City of London's rate for looked after children (148 per 10,000) is well above statistical neighbours (48) and the England average (67) Proportionately, this reflects a high volume of work for the City of London social workers.

Placement Stability, Type and Location

In 2019/20, 20.8% of children looked after by the City had three or more changes of placement over the year. This is a significant increase from 3.7% in 2018/19, although caution should be observed in analysing these figures because variations of one or two children can have a major impact on the rate and this performance can therefore fluctuate. This continues to reflect good performance and means that children looked after by the City tend to enjoy good stability and placements that meet their needs well. The local authority does not have its own fostering service due to the size of the looked after children population, but spot purchases from the Pan London consortium. Ofsted rates all independent fostering agencies used by the City either Good or Outstanding. There are sufficient suitable placements available to meet the needs of the City's looked after children and young people. All placements are outside of the local authority with no young person being placed over 20 miles from the City.

Care Leavers

In some areas, particularly in relation to children in care and care leavers, services have improved, resulting in positive experiences and progress for young people. OFSTED 2020

There is a strong range of support for care leavers in the City of London. Care Leavers are well supported, workers remain in touch with them, there is availability of suitable accommodation and they are provided with health support. 26 out of 31 care leavers were in education, training or employment; three in university, 14 attending college; three in employment, and five Not in Education, Employment or Training (NEET) (March 2020). For lessons identified by the CHSCP in respect of working with care leavers, with a particular focus on their mental health, see the CHSCP's review [HERE](#).

Violence against Women & Girls

Children and young people who are exposed to domestic violence and abuse can grow up in a vacuum of what is expected in terms of a positive and healthy relationship. This can create additional vulnerabilities and/or harmful behaviours. Responding proactively and in collaboration with the Safer City Partnership (SCP), violence against women and girls remains a key priority for the CHSCP, recognising both the short and long-term impact on the safety and welfare of children and young people. During 2019/20, the SCP continued its focus on developing services and a new [Violence Against Women and Girls Strategy](#).

Operation Encompass has been rolled out by The City of London Police. Five of the City's schools have completed the training which has been delivered virtually due to COVID-19 restrictions. The remaining school is due to be trained shortly once the Designated Safeguarding Lead (DSL) has settled in post. Training material will be delivered to all schools so they can refresh staff as and when required.

MARAC

Operational arrangements for MARAC (multi-agency risk assessment case conference) processes are clearly defined in the City. The City MARAC operates a lower threshold than in other local authorities and takes cases where a preventative approach would be helpful. This is good practice and enables children with these families to have a better co-ordinated multi agency service. In 2019/20, one MARAC was held where children were involved.

Safeguarding Adolescents

Understanding the context in which children and young people live their lives is an essential feature of effective multi-agency intervention. For the CHSCP, this issue remains central to our overall approach in making children and young people safer. Context is key. During 2019/20, the CHSCP refreshed its defined strategy for safeguarding adolescents. This strategy builds on the progress made by the partnership in safeguarding children and young people at risk of child sexual exploitation (CSE) and those missing from home, care and education. It was developed in parallel to our improved understanding of the issues facing young people; established through focused problem profiles, national and local learning and intelligence pictures involving vulnerable adolescents.

The strategy continues draws on evidence about effective practice from contemporary research. It is a focussed document that sets the parameters for developing our understanding of the complexities of young people's vulnerabilities and finding more effective multi-agency responses to these issues. The strategy maintains a focus on making sure that professionals are getting the basics right whilst striving to develop best practice in terms of the following priorities:

Page 49

- Knowing our Problem, Knowing our Response
- Strong Leadership
- Prevention and Early Intervention
 - Protection and Support
 - Disruption and Prosecution

Factors in scope within the strategy include, but are not limited to the following:

- Child Sexual Exploitation (including Harmful Sexual Behaviours)
- Children missing from home, care and education
- Children and young people exposed to risk through gang involvement, county lines, trafficking and serious youth violence.
- Domestic Violence and Abuse (DVA)
- Violence Against Women & Girls (VAWG)

- Adolescent Neglect
- Self-harm and Suicide
- Substance Misuse
- Radicalisation
- Special Educational Needs and Disabilities (SEND)

Child Sexual Exploitation

Understanding the nature and prevalence of child sexual exploitation (CSE) and harmful sexual behaviour (HSB) and ensuring that partner agencies provide appropriate safeguarding responses and interventions remains a priority. ^{DRAFT} In February 2017, a revised definition of CSE was issued by the Department for Education (DfE).

Child sexual exploitation is a form of child sexual abuse. It occurs where an individual or group takes advantage of an imbalance of power to coerce, manipulate or deceive a child or young person under the age of 18 into sexual activity (a) in exchange for something the victim needs or wants, and/or (b) for the financial advantage or increased status of the perpetrator or facilitator. The victim may have been sexually exploited even if the sexual activity appears consensual. Child sexual exploitation does not always involve physical contact; it can also occur through the use of technology.' DfE 2017

The City of London continued to experience a low number of cases relating to Child Sexual Exploitation (CSE), with most contacts being about non- residents. Over the last four years, the crimes relating to CSE that have been recorded by the City Police include rape, sexual activity and possession of indecent images. Cases have also included grooming by offenders via the internet / social media.

Partner agencies engaged in the City continue to share intelligence that may influence the knowledge of the profile. Of significance is the City's location as a major transport hub. A quarterly data set of over twenty indicators produced for the MASE Group supplements the information provided by the City Police. This informs understanding, and the identification of risk indicators. In recognition of the overlapping vulnerabilities adolescents face, the City Multi-Agency Sexual Exploitation panel was changed to the Multi-Agency Child Exploitation panel to include all forms of abuse and exploitation that adolescents are at increased risk

of. Although few in number and type and relatively lower level risk in comparison to neighbouring LAs, the City is not complacent and maintains an 'it could happen here' stance.

Operation Make Safe (formerly Alarm Call) has been on hold due to Covid-19. Until restrictions are lifted it is not possible to use cadets to test the response of hotels, coupled with the fact that a large number of City hotels are currently closed due to a lack of trade the MPS have also placed their work on hold. A digital conference is being designed for release in January 2021 to enable engagement and education to take place even if lockdown restrictions are still place.

Children Missing from Home, Care and Education DRAFT

Responses to children who go missing are robust, and processes and procedures are followed and escalated to senior managers when required. There is a clear understanding of the additional vulnerabilities of unaccompanied asylum-seeking children (UASC) who go missing, and the potential for exploitation and trafficking and significant efforts made to locate them quickly. OFSTED 2020

The City Police lead on all children who go missing from home or care and a coordinated response takes place with the City Children and Families team, working closely with the child's parents or carers. Numbers of children who go missing in the City of London are very low. A specific part of the Safeguarding Adolescent Strategy focuses on the effective management of children who are missing. The City of London has reviewed its Missing from Care Procedures and the arrangements for Return Home Interviews. There remains senior leadership oversight through the missing period with robust partnership arrangements in place. All strategy meetings have health, social care and police engagement as a minimum. This has helped with the timely response to missing episodes and alerting relevant authorities to missing episodes.

NCH Action for Children is commissioned by the City of London Corporation to give missing children a return home interview within 72 hours. These interviews are followed up with therapeutic support depending on the outcome to address risk-taking behaviour. This is in line with statutory guidance published by the Department of Education in 2014. Return home interviews are reviewed and used by the partnership to understand the reasons why children go missing and inform strategy and service delivery.

Since 2015, the City of London Corporation has implemented a rigorous system to identify all children of statutory school age and where they attend school. The City of London maintains this record of where children are placed through the primary and secondary transitions process. A school tracker is updated and reviewed regularly.

Gangs, Criminal Exploitation and Serious Youth Violence

There are a number of ways in which young people can be put at risk by gang activity, both through participation in and as victims of gang violence which can be in relation to their peers or to a gang-involved adult in their household. The City of London Drugs Profile found that the largest area of drug misuse was among affluent City workers with the supply of drugs controlled by organised criminal groups involving male 'runners' in their 20s who often deal pre-ordered drugs out of their cars. While drug related crime involving resident CYPs is low, a case involving a trafficked young person highlights this as an emerging theme that requires close attention and partnership working between Police, Adult and Children's Social Care, and businesses in the City. There is concern in the north that young adults known to be associated with Islington gangs have started to hang around Golden Lane Estate. Community safety partners are monitoring this closely and report 'no hard issues' other than gang related graffiti to date. Work with the estate and Islington is needed to understand this emerging pattern and mitigate associated risks for CYP.

the
and
52

The City of London has completed a Contextual Safeguarding Assessment of the Square Mile bringing together intelligence from the City's vulnerable adolescents profile, City Youth Forum, Community Safety, Neighbourhood teams, and relevant intelligence from LAs on our border. This led to changes in the City's multi-agency arrangements to improve joint intelligence and planning around risks. The Safeguarding Adolescents Forum expanded its remit to consider all child exploitation, including criminal. This work has recently been able to help partners identify children who are being exploited by criminal gangs to steal. The City of London has also commissioned a County Lines peer review. The final report on this has been delayed because of the pandemic

Work in being undertaken to implement Operation Innerste, which is a process that enables police to obtain the fingerprints and photograph of unaccompanied asylum seeking minors when they present at the police station. The aim of the operation is to prevent the minors becoming 'attractive' to traffickers or potential exploiters because they have a footprint in the UK, in effect their identity is locked in before they are placed in local authority care. Pilot schemes have also seen it greatly reduce the number of minors who abscond from their placements and present in a different local authority area.

Adolescent Neglect

Identifying, naming and responding to adolescent neglect can be challenging due to misconceptions that adolescents become more resilient because of their age alone, over-reliance on older CYP to be responsible for themselves, and the assumption that they can and would ask for help if they needed. This is further exacerbated in affluent families where material wealth and access to private services can serve to keep neglect and emotional abuse of adolescents hidden. It is also the case that CYP in affluent families where there is parental substance misuse, mental ill health, or domestic violence can be harder to reach due to the way families use their resources to block access and can hide the extent of their needs through the use of privately funded services.

The City has previously sponsored research on neglect in affluent families. Conducted by Goldsmith University, this research identified teens as a particularly vulnerable cohort with complex safeguarding needs. Research by The Children's Society has also found a potential link between emotional neglect and those children living in more affluent families. Given the City's demographics, this remains a priority, ensuring that practitioners have the necessary skills to recognise and respond to the signs and symptoms of adolescent neglect.

Self-Harm & Suicide

The partnership's focus on self-harm and suicide continued over 2019/20 as a consequence of the deaths of a number of young people from Hackney. Learning from the published reviews into these cases is set out later in this report. The City of London's Suicide Steering Group continued to provide strategic oversight and operational planning covering adults and both children.

Radicalisation

The Counter Terrorism and Security Act received Royal Assent on 12th February 2015. Prevent was placed on a statutory footing in July 2015 to ensure all specified authorities in local areas, as a minimum, understand the local threat and take action to address it, assess if local frontline staff need training to recognise radicalisation, and to ensure that all of those who need to work together to deliver the programme do so in the most effective way. The City of London has not been identified as a Priority Area and as such, receives no additional Home Office funding to deliver its Prevent programme. The Safer City Partnership (SCP)

retains overall governance of this agenda, which includes a focus on ensuring there are sufficient arrangements in place to safeguard children and young people. The City of London Police delivers Prevent training to schools, youth providers and businesses.

Private Fostering

A child under the age of 16 (under 18, if disabled) who is cared for and provided with accommodation by someone other than a parent, person with parental responsibility or a close relative for 28 days or more is privately fostered. The arrangements for managing private fostering in the City accord with statutory requirements. No notifications were received in The City of London during 2019/20. Private Fostering continues to be promoted via the CHSCP Private Fostering App.

DRAFT

Children with Disabilities

Since the introduction of the special educational needs and disability (SEND) reforms in September 2014, the City of London Corporation has made good progress in implementing these. All former Statements of Special Educational Needs were transferred to Education, Health and Care (EHC) plans well in advance of the national deadline of 1 April 2018. All statutory assessments are completed within 20 weeks (the statutory timeframe). There remains a very high level of satisfaction rate amongst families accessing the City of London's services and their view of multi-agency working is good. The SEND Joint Strategy and self-evaluation form (SEF) has been developed with both partners and families to set out the City's priorities and to highlight the areas where the most progress is being made.

The City currently provides short breaks to 12 children and there are 21 children with EHC plans in place. There is a disability lead in the social work team who has specialist knowledge and supports the service when needing to progress assessment work with disabled children. During the Covid-19 pandemic, partners in the City of London have continued to offer close support to children with EHC Plans and their families through a weekly review and have a strong integrated offer between Special Educational Needs and Children's Social Care.

MAPPA

Multi-Agency Public Protection Arrangements (MAPPA) are the statutory measures for managing sexual and violent offenders. The Police, Prison and Probation Services (Responsible Authority) have the duty and responsibility to ensure MAPPA are established in their area and for the assessment and management of risk of all identified MAPPA offenders. The purpose of MAPPA is to help reduce the re-offending behaviour of sexual and violent offenders in order to protect the public from serious harm, by ensuring all agencies work together effectively. Across London on 31 March 2020, there were 6581 6452 Category 1 'Registered Sex Offenders' (RSOs) (an increase from 6452 in 2018/19 and 6317 in 2017/18), 3735 Category 2 'Violent Offenders' (and decrease from 4128 in 2018/19 and 3833 in 2017/18) and 37 Category 3 'Other Dangerous Offenders' (an increase from 27 in 2018/19 and 24 in 2017/18).

DRAFT

Safer Workforce

Despite all efforts to recruit safely there will be occasions when allegations are made against staff or volunteers working with children. Organisations should have clear procedures in place that explain what should happen when such allegations are raised. These should include the requirement to appoint a designated safeguarding lead (DSL) to whom these allegations are reported. It is ordinarily the responsibility of the DSL to report allegations to, and otherwise liaise with, the designated officer in the local authority (referred to as the LADO). The LADO has the responsibility to manage and have oversight of allegations against people who work with children. Reporting to the Assistant Director of People Services, the LADO role in the City is held by the Safeguarding and Quality Assurance Service Manager. The LADO should always be contacted when there is an allegation that any person who works with children has:

- Behaved in a way that has harmed a child, or may have harmed a child.
- Possibly committed a criminal offence against or related to a child.
- Behaved towards a child or children in a way that indicates they may pose a risk of harm to children.

Activity

- There were eight referrals made to the LADO during 2019/2020 period, which is an increase of two from 2018/2019. Five met the LADO threshold.
- There were six referrals to the LADO in 2018/19, six in 2017/18, seven in 2016/17 and eleven in 2015/16.

Categories of Concern

- Three cases were related to incidents in the professional's person life and raised concerns in respect of their professional role working with children.
- Two were related to the individual's behaviour
- Three were related to physical abuse.

Themes

Over the last eight years, the highest number of referrals have been made relating to those in the education sector. This overall trend continues. In 2019/20, noted themes included referrals about incidents in the personal life of the professionals concerned and referrals arising from outside of the City of London.

LADO Training & Awareness Raising

Awareness raising activities by both the CHSCP and the City of London continued during 2019/20. Designated Safeguarding Leads continue to access training through the CHSCP. Part of this training focuses on the role of the LADO and the City of London LADO has been involved in delivering this training in the City. This has enabled professionals who would not necessarily meet with the LADO to gain a better understanding around the role and when they need to refer. Sessions with partners through the staff induction and Multi-Agency Forums, such as the City of London's Children's Partnership Board and Education Safeguarding Forum have also promoted awareness. The Safeguarding Lead in the Education and Early Years' Service has been integral in supporting the message around role of the LADO by briefing early years settings on the procedures in reporting professional allegations. The LADO also maintains close links with the Designated Safeguarding Leads in Schools. The City of London also hosted the National LADO conference in May 2019, this has significantly raised the profile of the City not only within Greater London but also nationally.

Hackney Safeguarding Snapshot 2019/20

Approximately 63,655 children and young people under 18

23% of total population

28% of children living in poverty

27.9% of children in primary schools in receipt of free school meals (national average 15.7%) (Dec 2019)

33% of children in secondary schools in receipt of free school meals (national average 14.1%) (Dec 2019)

459 children were subject to a CAF and MAT intervention in 2019/20 ↑

291 new early help cases identified and supported through the MAT process ↑

Young Hackney are working with 600 young people through Early Help Teams, providing tailored support.

Approximately 170,780 attendances at activities delivered by Young Hackney from young people throughout the year. ↓

108 children missing from home or care ↓ / 821 episodes of children going missing from home or care ↑

16044 contacts to Hackney CFS ↑

5031 referrals ↑

15.8% re-referrals ↓

4923 assessments completed by Hackney CFS ↑

68% of assessments were completed within 45 days ↑

924 child protection investigations ↓

251 Children on a Child Protection Plan as of March 2020 ↑

3094 Children in Need episodes as of March 2020 (2904 in 2018/19) ↑

402 children with a disability (open to Disabled Children Service as of March 2020) ↑

432 children & young people looked after as of March 2018 ↑

253 MARAC meetings involving children and young people living in families with domestic violence ↓

309 referrals to the LADO ↑

Safeguarding in Hackney

Hackney Demographics

The London Borough of Hackney is an inner-city London borough. There are over 60,000 children and young people under the age of 18 years, representing 4% of the total population. Of these, around 19,000 are aged less than five years. Over 58% of children and young people living in Hackney belong to black or other minority ethnic backgrounds, compared with 21.5% in the country as a whole. It is a richly diverse community with significant numbers of Asian, Black African, Black Caribbean, Black British, Turkish, Kurdish and Charedi Jewish children. Hackney's Orthodox Jewish Community population of around 30,000 represents more than 10% of Hackney's total population and around 50% of the community is under the age of 19 years. There are over 180 languages spoken in the borough. Hackney is ranked the second most deprived borough in England and it is estimated that 35.6% of children and young people in Hackney are living in poverty, with around 28-32% eligible for and in receipt of free school meals.

DRAFT

Early Help

'Children and families are helped and supported by a range of effective early help services.' OFSTED 2019

Children and young people in Hackney continue to have access to and benefit from an extremely wide range of early help services that are sharply focused on meeting the diverse needs of local communities. These services are delivered by the Hackney Children and Families Service, Hackney Education and a range of partners, including 74 schools, a network of 21 children centres delivering a range of services and working closely with schools, GPs and health colleagues as well as other local service providers, including the community and voluntary sector.

Children's Centre Family Support and Multi-Agency Team (MAT) Meetings

Family support in children's centres seeks to improve parenting capacity, protect children from harm and neglect and improve outcomes for young children. Family support is part of the early help Universal Partnership Plus offer to families with children predominantly but not exclusively, under 6 years and is

coordinated by the MAT (Multi-Agency Team meetings), underpinned by the Common Assessment Framework (CAF) early help assessment. MAT meetings have continued to occur fortnightly in each of the six strategic Children's Centres in Hackney. Chaired by a qualified social worker employed by Hackney Learning Trust, MAT meetings are attended by a range of professionals including midwives, health visitors, Children's Centre family support teams, speech and language therapists and First Steps. Early help interventions delivered include: parenting programmes; individual and small group work to address family relationships and dynamics; support with: housing; finance; child behaviour; sleeping; toilet training; routines; and the transition to nursery and school.

MAT received 291 new referrals (277 in 2018/19) and worked with a total of 459 families subject to an early help assessment and referral (447 in 2018/19). In addition to the 459 early help assessments, MAT received 66 'handoffs' from the First Access & Screening Team (FAST) in order to coordinate a response following contact.

Young Hackney

Young Hackney provides early help, prevention and diversion service for children and young people aged 6-19 years old and up to 25 years if the young person has a special education need or disability. The service works with young people to support their development and transition to adulthood by intervening early to address adolescent risk, develop pro-social behaviours and build resilience. The service offers outcome-focused, time-limited interventions through universal plus and targeted services designed to reduce or prevent problems from escalating or becoming entrenched and then requiring intervention by Children's Social Care.

The number of named individuals accessing Young Hackney universal provision decreased by 5% in 2019/20 compared to the previous year. 22,787 named individuals accessed Young Hackney provision in 2019/20, compared to 24,024 named individuals in 2018/19. There were 170,780 attendances by named children and young people aged 6-19 years during 2019/20 at the wider youth provision delivered through Young Hackney and commissioned services for young people. This is a 3.6% decrease compared to 2018/19 when there were 177,299 attendances by named children and young people. Part of this decrease may be explained by the increasing concerns from parents about the risk of COVID-19 which began in March 2020, before the Government official lockdown date of 23 March 2020. Many people began to work from home, and vulnerable children or children in families with those at risk began to be educated virtually/at home. Hackney CFS Annual Report 2019/20

Children in Need of Help and Protection

Good practice with children and young people who are in need of help and protection can be seen when help is provided early in the emergence of a problem and there is a well-coordinated multi-agency response. Thresholds between early help and statutory child protection work are appropriate, understood and operate effectively. Risk is effectively mitigated and outcomes improved through good assessment, authoritative practice, planning and review.

Contacts, Referrals and Assessments

'Thresholds are applied consistently and effectively at the front door when concerns first arise, and children and families receive the right level of initial help when they need it.' OFSTED 2019

DRAFT

The First Access & Screening Team (FAST) acts as a single point of contact for referrals to Children's Social Care in Hackney and provides responsive screening activities. All contacts with FAST are immediately progressed as a referral to Children's Social Care if the threshold for a statutory assessment is met. Related supporting activity requires staff in FAST to have a continually updated knowledge of local services at their fingertips coupled with a sound understanding of the Hackney Child Wellbeing Framework. The FAST ensures children are quickly allocated resources to meet their needs or safeguard their welfare, working to a principle of right service, first time. Like other Multi-Agency Safeguarding Hubs (MASH) across London, FAST works alongside co-located partners from Hackney CFS, police, probation and health services to share information, jointly risk assess and promote access to services. This joined up approach enables proportionate and timely decisions about the type and level of services children need and facilitates timely access to resources. The FAST development continues to be co-ordinated by a multi-agency steering group of key partners. Hackney's FAST also supports children and young people to access universal and targeted early help provision. In 2019/20, FAST received 16044 contacts from a range of sources of which 5031 were accepted as a referral to CFS. This is a marked increase in the number of referrals compared to 2018/19 (4190). The percentage of re-referrals decreased from 16.5% to 15.8%. Against this indicator, Hackney continues to track well below the national average and either below or in line with statistical neighbours.

Following contact, the FAST aims to ensure that only those children meeting thresholds for statutory assessments are progressed as referrals to CFS. Local Authorities undertake these assessments to determine what services to provide and what action to take. The full set of statutory assessments under the Children Act 1989 can be found [HERE](#).

4,923 assessments were completed in 2019/20, an increase on 4290 in 2018/19 and 4,438 in 2017/18. 64% of assessments were completed within 45 days. This is lower than the most recently published statistical neighbour data – 88% of their assessments were completed within 45 days over a 12 month period as of 31 March 2019. Our assessment timescales have improved since March 2020, with 80% of assessments between April-August 2020 completed within 45 days, and 94% of assessments in September completed within 45 days. There was a significant increase in the number of assessments completed in the second half of 2019-20, from November 2019 onwards that impacted on our ability to improve assessment timescales following a continued focus on this area in 2019-20. Once this high volume of cases moved through the system, the decrease in the number of assessments in 2020-21 has meant that assessment timescales have improved significantly. **Hackney CFS Annual Report 2019/20**

Strategy Discussions

DRAFT

‘Strategy discussions do not involve all relevant partners sharing agency information until the initial child protection conference stage. This means that subsequent enquiries and assessments for many children don’t include key information, for example that held by the police about adults. Better practice in information-sharing is evident in strategy discussions concerning harm to children on open cases.’ OFSTED 2019

OFSTED’s inspection of Hackney’s children’s social care services in 2019 identified that in some strategy discussions, they do not involve all relevant partners sharing agency information until the initial child protection conference stage. In response, The CHSCP has developed [this protocol](#) as a practical guide for Hackney professionals involved in a child protection enquiry. It covers details about when strategy discussions should be convened, who needs to be involved and what factors need to be considered. The protocol includes an [agenda template](#) that will help you follow the process and understand the decisions that need to be made.

Children on Child Protection Plans

Following a child protection enquiry, where concerns of significant harm are substantiated and the child is judged to be suffering, or likely to suffer, significant harm, social workers and their managers should convene an Initial Child Protection Conference (ICPC). An ICPC brings together family members (and children / young people where appropriate) with supporters, advocates and professionals to analyse information and plan how best to safeguard and promote the welfare of the child / young person. If the ICPC considers that the child / young person is at a continuing risk of significant harm, they will be made the subject of a Child

Protection Plan (CPP). From 2011 to 2017, there has been an increasing trend in the number of children and young people subject to a CPP in Hackney. However, following a 30% increase seen between 2016 and 2017, there was a significant swing, with CP Plans decreasing by 39% as at the end of March 2018 (from 330 to 200). This reduced rate remained broadly the same as at the end of 2019 (194). Over 2019/20, there has been a growth in activity in this regard. At the end of March 2020, 251 children had a CP Plan in place.

Related to this indicator is the number of children subject to a CPP for a second or subsequent time. This measure is used as a potential indicator as to whether a CPP has been successful in effectively reducing risk. During 2019/20, the percentage of children being subject to a CPP for a second or subsequent time decreased from to 23% compared to 18.6 % in 2018/19.

DRAFT

Children in Care

***'Children in care and leaving care in Hackney benefit from a strong service.'* OFSTED 2019**

Page 6
A child or young person who is in care or 'looked after' is in the care of the local authority. They can be placed in care voluntarily by parents struggling to cope, they can be unaccompanied asylum seeking children; or in other circumstances, Hackney CFS and partners will intervene because the child or young person is at risk of significant harm. As of 31st March 2019, Hackney was responsible for looking after 432 children and young people compared to 405 at the end of March 2019. This is a 7% increase. Overall numbers have increased since 2011 (270), and whilst Hackney has historically had lower numbers of children in care per 10,000 population, 2018/19 saw Hackney's rate (64) exceed Statistical Neighbour rates (60.4) for the first time. In 2019/20, the rate is 64 per 10,000.

Placement Stability, Type & Location

On the whole, stability is associated with better outcomes for children. Proper assessment of a child's needs and a sufficient choice of placements to meet the varied and specific needs of different children are essential if appropriate stable placements are to be achieved. Inappropriate placements tend to break down and lead to frequent moves. The percentage of looked after children with three or more placements in one year decreased from 13% in 2018/19 to 12% in 2019/20. The children who experienced multiple placement moves were generally aged over 13 years; their placement changes were associated with issues

linked to higher levels of need and complexity related to adolescence. The percentage of looked after children aged under 16 looked after continuously for at least 2½ years who have been living in the same placement for at least 2 years (or placed for adoption and their adoptive placement together with previous placement lasting for at least 2 years) as of 31st March 2020 was 66%, a further improvement on previous reporting, although Hackney has historically tracked below statistical neighbour and national averages in this regard. Similar to earlier years, the vast majority of looked after children are in foster placements (75%). Of the 432 children looked after by Hackney at March 2020, 23% were placed in Hackney (26% in 2018/19). There has been an increase in the percentage and number of children placed within 20 miles of Hackney, with 329 (76%) of children placed within 20 miles during 2019/20, compared to 300 (74%) in 2018/19. This is in part due to the increased use of in-house fostering placements.

Care Proceedings

DRAFT

The rate of care proceeding applications in Hackney increased 10.3 per 10,000 in 2018/19 to 16.4 per 10,000 in 2019/20 (107 applications). This rate is higher than the national average (10.8 per 10,000).

[New Strategic Plan was launched by Cafcass in autumn 2019.](#) It has been developed with significant input and engagement from staff across all parts of the organisation, including the FJYPB, our family justice system partners and wider stakeholders. Ongoing engagement with each of these groups is a key feature of our new strategy which recognises the importance of working together to improve outcomes for all the children we work with as part of a wider family justice system.

Care Leavers

The Leaving Care Service ensures that young people are supported to develop independent living skills, offered career advice and training and educational opportunities, and supported to reach their full potential in all aspects of their life. 313 care leavers aged 17-21 were being supported by the Leaving Care Service, as of March 2020, a 2% increase compared to the 308 being supported at the same point in March 2019. This number has continued to rise and the service was supporting 326 care leavers aged 17-21 at the end of August 2020. 79 care leavers aged 22-24 were being supported in March 2020. This is a

20% increase compared to the 66 care leavers aged over 21 who were being supported by Leaving Care, as of March 2019. This number has continued to increase and the service was supporting 82 care leavers aged 22-24 at the end of August 2020.

Each year over 10,000 young people leave the care system and become care leavers . Their immediate transition to independence and the years that follow can be difficult for many. With little to no family support, the lived experience of some can be extremely challenging and isolating. In 2020, [the CHSCP published a briefing paper](#) building on our collective understanding of the challenges faced by care leavers. It provides a number of headline messages for improving multi-agency safeguarding practice. It summarises the lessons from the reviews of two cases involving care leavers who tragically died by suicide. Wherever you work, use this briefing paper to generate discussion about the vulnerability of care leavers, particularly in the context of their mental health. Talk about what you can do differently, reflect on the key messages and above all, ensure your individual practice is sufficiently attuned to them.

Violence against Women & Girls

It is estimated that 3 in 10 women (aged 16+) will have experienced domestic abuse at some point in their lives and that 1 in 5 children have been exposed to domestic abuse in the home. Applying these figures to local populations would suggest that 34,142 women have experienced intimate violence, with 5804 children and young people being either directly or indirectly affected by it. Responding proactively and in collaboration with the Community Safety Partnership remains a key priority for the CHSCP, recognising both the short and long-term impact on the safety and welfare of children and young people. The CHSCP is represented on Violence Against Women and Girls operational and strategic panels, which is comprised of statutory and voluntary sector organisations. The partnership in Hackney progressed its ambition to move from a strategy based on tackling DV to one that aims at a wider approach responding to all forms of VAWG. This development follows national and regional policy and aims to embrace all forms of violence that are committed against women and girls as they have a number of commonalities and therefore suggest a linked approach. Operationally, the Domestic Abuse Intervention Service (DAIS) in Hackney encompasses the following areas:

- **Intervention Officers.** The Intervention Officer posts allow for the recruitment of social workers, former police officers, probation officers as well as qualified domestic abuse advocates. This will build a service with a mix of skills and backgrounds who are experienced in assessing and managing risk.

- **Perpetrator interventions.** This model integrates allows for the flexibility for staff to engage with perpetrators directly as needed to deliver a responsive, holistic and victim-focused risk management service.
- **Operational and strategic management.** Managers are responsible for operational case work and for strategic / partnership working. This differs from the usual model whereby a 'VAWG co-ordinator' role sits separately from the delivery of risk management services working with clients.

From April 2017, the Domestic Abuse Intervention Service (DAIS) joined the Children and Families Service as part of the Early Help and Prevention Service. DAIS works with anyone experiencing domestic abuse who is living in Hackney, aged 16 or over, of any sex and gender, and of any sexual orientation. The service assesses need; provides information and support on legal and housing rights; supports service users with court attendance; supports service users to obtain legal protection; and works with service users and other professionals to address their needs. The service also works with perpetrators of domestic abuse to try to reduce risk.

*DAIS received an average of 25 referrals per week in 2019/20, similar to the rate received in 2018/19. This followed a 61% rise in referrals between 2015/16 and 2018/19. The impact of the lockdown in response to coronavirus led to a 50% increase in referrals between 23 March 2020 and 4 July 2020 as compared to the same period in 2019. DAIS adapted its core service delivery to ensure continuity of service while at the same time leading within the Council and across the Hackney partnership on the promotion of a joined up, adaptive and resilient response. DAIS remained fully operational and the Council has allocated additional resources to expand the staff team to meet this demand. Referral numbers have now stabilised to an average of 26 between August and September 2020. **Hackney CFS Annual Report 2019/20***

MARAC

The number of cases considered at MARAC (multi-agency risk assessment case conference) continues to reflect a robust response to providing multi-agency support to victims and children at risk of domestic violence and abuse. 492 cases were heard at MARAC in 2019/20, a 9% increase from 2018/19 when 450 cases were heard. 110 of the total number of cases heard at MARAC in 2019/20 were 'repeat' referrals, a 3% decrease from 2018/19 when 113 of the total were repeat referrals. In 2019/20 of the 492 cases, 253 (49%) there were children in the household.

The Primary Care MARAC Liaison service at Homerton University Hospital received a Highly Commended Safeguarding Initiative award from the Health Service Journal. The judges felt that this team provided a comprehensive overview of the development, and demonstrated excellent outcomes in relation to improved engagement in primary care. It was great to see the multi-agency team working together to optimise the opportunity to safeguard patients. Webinars on domestic abuse have also been delivered by the Homerton Safeguarding Children Team with subject specific experts, Hackney DAIS, Safe and Together Team and the Specialist Health Visitors for Domestic Abuse.

Safeguarding Adolescents

Understanding the context in which children and young people live their lives is an essential feature of effective multi-agency intervention. For the CHSCP, this issue remains central to our overall approach in making children and young people safer. Context is key. During 2019/20, the CHSCP refreshed its defined strategy for safeguarding adolescents. This strategy builds on the progress made by the partnership in safeguarding children and young people at risk of child sexual exploitation (CSE) and those missing from home, care and education. It was developed in parallel to our improved understanding of the issues facing young people; established through focused problem profiles, national and local learning and intelligence pictures involving vulnerable adolescents.

The strategy continues draws on evidence about effective practice from contemporary research. It is a focussed document that sets the parameters for developing our understanding of the complexities of young people's vulnerabilities and finding more effective multi-agency responses to these issues. The strategy maintains an unswerving focus on making sure that professionals are getting the basics right whilst striving to develop best practice in terms of the following priorities:

- Knowing our Problem, Knowing our Response
- Strong Leadership
- Prevention and Early Intervention
- Protection and Support
- Disruption and Prosecution

Factors in scope within the strategy include, but are not limited to the following:

- Child Sexual Exploitation (including Harmful Sexual Behaviours)
- Children missing from home, care and education
- Children and young people exposed to risk through gang involvement, county lines, trafficking and serious youth violence.
- Domestic Violence and Abuse (DVA)
- Violence Against Women & Girls (VAWG)
- Adolescent Neglect
- Self-harm and Suicide
- Substance Misuse
- Radicalisation
- Special Educational Needs and Disabilities (SEND)

DRAFT

Page 6

The partnership has continued to develop its understanding of exploitation and extra-familial harm including criminal exploitation, county lines and trafficking. This has been supported by the ongoing work of the Contextual Safeguarding Project. The Extra-Familial Risk Panel, a key operational component, continued to be held fortnightly to ensure consistent oversight and planning for cases where young people are at risk of experiencing, or are involved in, harmful behaviours outside the home. There is strong multi agency attendance from Police, Education, Health, Youth Offending Team, Young Hackney and the Integrated Gangs Unit. The Panel develops operational actions which looks to reduce harm and disrupt exploitation of children. Themes and strategic issues from the Extra-Familial Risk Panel are shared with the Multi-Agency Child Exploitation (MACE) group for wider consideration and agency action. Both forums also report back any significant issues via the CHSCP Safeguarding Adolescents Group.

The contextual safeguarding project in Hackney has been evaluated and this was published in November 2020: <https://www.researchinpractice.org.uk/all/news-views/2020/november/evaluating-a-contextual-safeguarding-system-to-address-extra-familial-risk-and-harm/> This is an independent evaluation of the implementation of the contextual safeguarding system in Hackney published by the Department for Education (DfE). The evaluation, led by the University of Sussex in partnership with Research in Practice, was part of the second wave of DfE Innovation Programme funding. The evaluation findings indicate that:

The implementation of Hackney's new Contextual Safeguarding system is progressing well. Systems and approaches to support Level 1 work are now almost fully embedded in Hackney and further advanced than comparators' systems in most respects (based on interviews with professional leads and social workers, staff surveys, and documentary analysis in Hackney and with the comparator local authorities). While not all Level 2 interventions, or the procedures that support them or assess their impact, are in widespread and consistent use across Hackney, the Contextual Safeguarding approach means that Hackney is now much better equipped to address extra-familial risk and harm at Level 2 than comparable local authorities.

Child Sexual Exploitation

Understanding the nature and prevalence of child sexual exploitation (CSE) and harmful sexual behaviour (HSB) and ensuring that partner agencies provide appropriate safeguarding responses and interventions remains a priority. In February 2017, a revised definition of CSE was issued by the Department for Education (DfE).

'Child sexual exploitation is a form of child sexual abuse. It occurs where an individual or group takes advantage of an imbalance of power to coerce, manipulate or deceive a child or young person under the age of 18 into sexual activity (a) in exchange for something the victim needs or wants, and/or (b) for the financial advantage or increased status of the perpetrator or facilitator. The victim may have been sexually exploited even if the sexual activity appears consensual. Child sexual exploitation does not always involve physical contact; it can also occur through the use of technology.' DfE 2017

Analytical research has been undertaken to interrogate data relating to CSE and HSB and to identify emerging themes and trends which inform service development. The research has highlighted three broad CSE profiles in Hackney:

- **CSE risk resulting from peer-on-peer abuse (sexual offences/exploitation against one or more victims and usually perpetrated in a group setting)**
- **CSE risk from an adult perpetrator (typically a young person believing themselves to be in a 'relationship' with an adult after being introduced to them by a normally vulnerable friend, or through online contact)**
- **Exploitation via social media (inciting or encouraging a victim to take and send explicit images of his/herself)**

Children Missing from Home, Care and Education

The Police lead on all children who go missing from home or care and a coordinated response takes place with Hackney CFS working closely with the child's parents or carers. For those young people who repeatedly go missing this co-ordinated response often involves a lead professional from education, Young Hackney, Youth Justice Service and the Integrated Gangs Unit.

Hackney CFS has led on strengthening the partnership's understanding of and response to children and young people who go missing from home and care. Missing episodes are considered as part of a broader spectrum of vulnerabilities effecting adolescents which include CSE, harmful sexual behaviour (HSB), radicalisation and gang and youth violence.

DRAFT

When a young person returns from an episode of going missing, they are offered an independent return home (IRH) interview by the Children's Rights Service. The use of Independent Return Home Interviews continues to be effective in supporting young people to share information about push and pull factors, what happens when they go missing and what support they need to reduce further episodes. The implementation of a daily meeting with Missing Police has supported better working relationships, information sharing and development of robust risk assessments and timely plans to locate children and offer the appropriate support. The most prominent themes in reasons children and young people have been going missing is 'difficulties at home or school', with overcrowding being highlighted in a number of cases. Mental health and emotional wellbeing was also a key precipitating factor for missing episodes and additional learning needs whereby young people became confused with how to get home or made poor decisions due to peer influences.

In 2019/20, 108 young people went missing from home or care on 821 occasions (compared to 144 young people on 568 occasions in 2018/19). In 66% of the occasions where a young person went missing it is recorded that they were offered an interview and in 42% of cases, the interview was accepted. A daily discussion is held with Hackney Missing and Exploitation Police to review cases of missing children and consider their vulnerabilities and support required. A fortnightly 'High Risk Case Alert' is sent to the Director and Heads of Service in Hackney CFS to ensure senior managers are sighted on young people who are presenting with the highest risk and ensure plans are in place to reduce this risk and minimise harm.

In respect of children missing education, The Children Missing Education (CME) Team continues to identify, monitor and track children missing or not receiving a suitable education. This includes liaison with FAST when there are safeguarding concerns. The work of the CME team fits closely with other strands of work to support vulnerable pupils including supporting schools and families to prevent poor school attendance, truancy, exclusions and supporting schools and families to get children back to school once absence has occurred. The team liaises closely with the Education Attendance and Admissions services.

When looking at the rolling number of cases, the overall CME figure had been relatively low before the identification of pupils previously attending independent settings. Between October 18 and January 19, the service received a high number of referrals following the closure of a school in the Charedi community. Between October and November 2019, the service also experienced a sharp rise in CME numbers, with an increase of 226 children. In addition, the service recorded a slight increase in August 19 following an intensive review of those children registered as Electively Home Educated (EHE). A significant number of children 385 children (all the Charedi community) remain open to the CME Team due to a lack of clarity on the child's circumstances, a lack of engagement or refusal to comply with Hackney's EHE services.

Gangs, Exploitation and Serious Youth Violence

There are a number of ways in which young people can be put at risk by gang activity, both through participation in and as victims of gang violence which can be in relation to their peers or to a gang-involved adult in their household. Over 2018/19, the CHSCB's focus on this aspect in the context of vulnerable adolescents was further developed. The CHSCB's annual conference in 2018/19 specifically focused on the criminal exploitation of young people, with further training rolled out over 2019/20. In late 2020, the CHSCP published a Serious Case Review Concerning Child C.

On 1 May 2019, Child C, a 15 year old male, died as a result of being stabbed whilst in the street. Child C had been permanently excluded from school and three months before his death, he had been seriously injured in another stabbing incident. There had been a noticeable increase in police contacts and concerns about deteriorating behaviour and escalating risk. Child C was going missing and local intelligence suggested he was being criminally exploited and possibly involved in county lines. On 19 December 2019, a 15-year-old boy was found guilty of his murder at the Old Bailey. A 16-year-old boy and an 18-year-old male were both convicted of manslaughter. A fourth suspect, a boy aged 16, died in custody prior to trial after becoming unwell. The [Serious Case Review \(SCR\)](#)

[of Child C](#) makes nine findings and fifteen recommendations for practice improvement. Read the statement of Jim Gamble QPM, the Independent Child Safeguarding Commissioner of The CHSCP [HERE](#). The findings of this SCR include:

Exclusion from mainstream school can heighten risk. As identified in the Child Safeguarding Practice Review Panel's report on criminal exploitation: '*exclusion from mainstream school is seen as a trigger point for risk of serious harm*' and permanent exclusion can be '*a trigger for a significant escalation of risk*'. Both statements resonate with the lived experience of Child C.

Education settings need access to local intelligence. Pupil Referral Units (PRU) and Alternative Education Provision (AP) have minimal influence over which children are placed in their facilities. This can result in young people who live in rival gang areas being in the same classroom. Whilst staff had a good understanding of the needs of individual pupils, the risk dynamic created by the cohort of pupils was less understood.

A focus on the individual child is important. When working with children who are victims of serious youth violence, emphasis needs to be placed on their individual needs. For young people from black and minority ethnic backgrounds, practitioners should explore what their racial and cultural identity means for them in the context of where they are growing up and how they live their lives on a daily basis. It is essential that practitioners are confident to explore these issues, have a good understanding of the implications and can tailor plans appropriately.

Clarity is needed about interventions to mitigate extra-familial risk. Whilst local procedures were followed, the difference this made to Child C's outcomes is less tangible. The review recognises that at the time of Child C's death, multi-agency contextual safeguarding practice in response to extra-familial risk was new and developing. It is also important to recognise that the circumstances involving Child C were complex and extremely challenging. There were no easy solutions.

Developing positive relationships with young people is important. As with many children in need or at risk, Child C is likely to have benefitted from a strong relationship with a trusted adult with whom he could build a relationship. There is a firm evidence base showing how this can make a significant difference in the lives of children, but it is acknowledged that Child C became progressively harder and harder to engage.

Involving and supporting parents is essential to effective safety planning. As noted by the Child Safeguarding Practice Review Panel's report on criminal exploitation: '*When parents are active in safety planning and implementation there appears to be a greater chance of success.*' Whilst it was good practice to engage Child C's family, the

review found that there was an over-reliance placed upon them. A curfew, increased adult supervision and adult escorts were agreed, but were all contingent on the family to action.

Inconsistent judgements about risk creates uncertainty. There was a lack of consistency in how different agencies defined risk, its implications and the responses to it. In the opinion of the lead reviewer, there was adequate information to conclude that the risk to Child C was imminent after the stabbing incident in February 2019. The collective judgement arrived at by agencies, did not equate to the actual risks facing Child C.

The use of child protection procedures. There was ambiguity about the 'status' of intervention with Child C. This led to a lack of structure and confusion about multi-agency action. The overall consequence of this lack of clarity was that planning and management oversight was weak and opportunities to intervene were missed. No agency had a sufficient grip or a true appreciation of the risks facing Child C, his interactions with other young people in his community, or where and how he socialised.

Poor case recording can directly impact on practice. Poor recording features as an issue in many reviews, although it can sometimes be difficult to see how this directly impacts on children. In Child C's case, inaccurate recording by the hospital (that Child C was going to live with his father) resulted in no onward referrals being made for community-based services. Opportunities to meaningfully engage with Child C at a critical moment after being injured were lost.

Page 73

Adolescent Neglect

Like younger children, adolescents are more likely to experience neglect at home than any other form of child harm. A report by the [Children's Society](#) into adolescents and neglect found that there was evidence that professionals struggle to identify adolescent neglect and are unsure what to do when they come across it. This has partly been based on misconceptions, including that adolescents become resilient to neglect and that neglect is less harmful than other forms of maltreatment. Neglect has been linked to a variety of problems for adolescents, including to 'challenging' behaviours e.g. poor engagement with education, violence and aggression, increased risk-taking (offending or anti-social behaviour, substance misuse, early sexual intercourse). It can lead to poor physical health, difficulties with relationships (with peers and adults) and be behind 'internalised' problems – e.g. low levels of well-being or mental ill health.

Self-Harm & Suicide

The partnership's focus on self-harm and suicide continued over 2019/20 as a consequence of the deaths of a number of young people from Hackney. Learning from the published reviews into these cases is set out later in this report.

Radicalisation

Statutory guidance expects Local Authorities to assess the threat of radicalisation in their areas and to take appropriate action. The Community Safety Partnership (CSP) retains overall governance of this agenda, which includes a focus on ensuring there are sufficient arrangements in place to safeguard children and young people. The Prevent Strategy is a key part of the Government's counter-terrorism Contest strategy. It aims to stop people becoming terrorists or supporting terrorism and has three objectives - challenging ideology, supporting vulnerable individuals and working with sectors and institutions. A strategic priority for Hackney's Prevent work is to ensure the safeguarding of children and young people to prevent them becoming drawn into supporting terrorism. In Hackney a multi-agency Channel Panel, chaired by the Head of Safer Communities, works at the pre-criminal stage to support vulnerable individuals where a risk of radicalisation is assessed and a plan of action devised.

During 2019/20, there were 26 referrals to the Hackney Channel Panel (an increase from 17 in 2018/19). All referrals concerned male subjects, with the highest number being generated from the education sector. As with the previous year, eight of these referrals involved young people under 18.

Substance Misuse

Young Hackney provides specialist treatment for young people affected by substance misuse – either directly or because a family member is using drugs. The service also has a dedicated officer who provides support and interventions for young people in contact with youth justice. Over 2019/20, the team worked with 210 young people on a targeted basis – as compared to 202 in 2018/19. The service also delivered outreach sessions to young people in schools and youth hubs.

Private Fostering

A child under the age of 16 (under 18, if disabled) who is cared for and provided with accommodation by someone other than a parent, person with parental responsibility or a close relative for 28 days or more is privately fostered. Comparison with national and statistical neighbours has not been undertaken following the DfE ceasing to publish statistics on notifications and closing the private fostering data collection for local authorities. A review of all private fostering arrangements (15 in total at the time) was conducted in January 2020 and a new Private Fostering Policy was rolled out the following month. Numbers remained broadly in line with last year. As of 30 September 2020, only nine private fostering arrangements were open to Hackney. The team had been in the process of assessing a number of new arrangements but these children returned to their families due to COVID-19.

DRAFT

Young Carers

Young carers are children and young people under 18 who provide regular or on-going care and emotional support to a family member who is physically or mentally ill, disabled or misuses substances. A young carer becomes vulnerable when the level of care giving and responsibility to the person in need of care becomes excessive or inappropriate for that child, risking impacting on his or her emotional or physical well-being or educational achievement and life chances'.

40 new referrals were received for Young Carers in the first three months of the service coming in-house, a large number being made following a Young Carers Awareness Day in January 2020. At the end of March 2020, there were 290 identified young carers in Hackney. Hackney Young Carers Project provides a variety of support services which includes group work, and one to one work with children in more complex situations. **Hackney CFS Annual report 2019/20**

Disabled Children

Following this deterioration in services, senior leaders took remedial action earlier in the year and implemented a plan for improvement. This is beginning to have some positive impact in improved safeguarding practice and more robust management oversight of the progress of children's cases. OFSTED 2019

At the end of March 2020, the service was working with 402 children and young people. Of these, 267 were male and 132 were female (3 children were not yet born). This is an increase of 20% compared to 2018/19, when the service was working with 336 children and young people, In 2017/18, the service was working with 241 children and young people.

Children's Mental Health

The Child and Adolescent Mental Health Services (CAMHS) in City and Hackney are provide by Homerton University NHS Foundation Trust (First Steps and the CAMHS disability team, a joint service with the ELFT CAMHS); Clinicians employed by London Borough of Hackney's children's social care and the Specialist Service is provided by the East London NHS Foundation Trust (ELFT). ELFT CAMHS provides the specialist (tier 3) community based service, the CAMHS provision within the Young Hackney Service and a service for adolescents with more complex mental health needs, for example, first onset psychosis and complex eating disorders. East London NHS Foundation Trust also provides the inpatient service (tier 4) and the out-of-hours service for City and Hackney.

CAMHS did (and still does) a clinical rag rating of children who should be seen face to face for clinical reasons, but also prioritises children in terms of digital inclusion/digital poverty (i.e. those who can't connect or don't have access to privacy etc). Before schools re-opened, CAMHS were very aware that not all vulnerable children weren't being 'seen' in school or by other agencies as regularly and safeguarding was considered by CAMHS practitioners when contacting those families. The CAMHS risk assessment covers safeguarding, DV, exploitation and other safeguarding issues

Since the first Covid-19 lockdown in March 2020, there been a significant increase in the number of children and young people admitted to Homerton hospital in emotional distress. In the first 3 months of 2020/2021, there have been 11 admissions of which eight young people were transferred to the Coborn adolescent psychiatric unit. This is a 73% increase compared to the same period last year.

Kooth – A new online counselling and emotional wellbeing service for children and young people (11-19yrs) was launched from 1 April 2020. The service provides a safe and secure means for young people to access online support from a team of qualified counsellors who provide guided, outcome-focused help. The service provides additional support through moderated, scheduled forums to facilitate peer led support and self-help articles (many written by service users) to provide self-help support. Kooth has no referrals or waiting lists, and young people can access this service anonymously by signing onto the Kooth site.

MAPPA

Multi-Agency Public Protection Arrangements (MAPPA) are the statutory measures for managing sexual and violent offenders. The Police, Prison and Probation Services (Responsible Authority) have the duty and responsibility to ensure MAPPA are established in their area and for the assessment and management of risk of all identified MAPPA offenders. The purpose of MAPPA is to help reduce the re-offending behaviour of sexual and violent offenders in order to protect the public from serious harm, by ensuring all agencies work together effectively. Across London on 31 March 2020, there were 6581 6452 Category 1 'Registered Sex Offenders' (RSOs) (an increase from 6452 in 2018/19 and 6317 in 2017/18), 3735 Category 2 'Violent Offenders' (and decrease from 4128 in 2018/19 and 3833 in 2017/18) and 37 Category 3 'Other Dangerous Offenders' (an increase from 27 in 2018/19 and 24 in 2017/18).

DRAFT

Youth Offending

Overall, Hackney has a relatively low proportion of 10-18 year olds involved in the youth justice system. The number of young people re-offending in Hackney within a 12 month period has significantly decreased over the last year, from 71 at the end of March 2019 to 47 at the end of March 2020, a 33% decrease year on year. The number of young people entering the Youth Justice System for the first time in Hackney increased from 82 in 2018/19 to 88 in 2019/20. Hackney's first time entrant rate per 100,000 has increased from 326 in 2018/19 to 349 in 2019/20, this is higher than the most recent 2018/19 statistical neighbour average (312).

Unregistered Educational Settings

Unregistered Educational Settings (UES) provide 'full-time' education to children of compulsory school age, but teach a curriculum that is too narrow for the setting to constitute a 'school'. The consequence is that they cannot be registered (or regulated) and this is a significant concern for The CHSCP. Large numbers of children in Hackney attend UES and are outside the line of sight of safeguarding professionals. There is no direct mechanism to ensure that the premises within which children congregate in these settings are safe and that practice meets established minimum standards for safeguarding. Whilst the Independent Child Safeguarding Commissioner, Hackney Council and the wider safeguarding partnership have endeavoured to find a resolution to this problem (and despite continuing efforts to engage community leaders), no real progress has been made. In 2020, the CHSCP developed a protocol to help manage the response to

the identification of UES and any concerns arising in respect of them. It is disappointing that this has been necessary, but in the absence of any appetite from either community leaders or Yeshivas themselves to cooperate, this is the best we are able to do as a partnership. The Department for Education's consultation concerning the regulation of UES and other settings closed at the end of November 2020. Government need to use this opportunity to strengthen both registration requirements and regulation. Without such change, children and young people will continue to be exposed to a two-tier safeguarding system that is simply unacceptable.

To help the multi-agency safeguarding partnership respond to this issue, The CHSCP has launched The Unregistered Educational Settings Hackney Operational Protocol to provide a framework to coordinate action and make children and young people safer. It is available on the CHSCP website [HERE](#). The protocol covers two stages. Stage 1 is focused on the actions to be taken when potential UES are identified in Hackney. Stage 2 deals with the multi-agency response when safeguarding concerns are raised about UES.

Out-of-School Settings

Many children and young people participate in some form of organised activity outside of school at some point during their primary and secondary school years. There is plenty of excellent local practice which provides a wide range of activities and opportunities to young people and the community, for example improving cultural awareness, building self-esteem and encouraging our children to be active citizens within their community. In Hackney, the Out Of School Settings (OOSS) project has been launched to help parents and carers make sure that their children are happy, safe and protected in after school and extra-curricular activities. Led by Hackney Education, this DfE funded project intends to strengthen the safeguarding arrangements within Out of School Settings and work includes the following:

- The development of an OOSS portal (completion spring 2021)
- The development and launch of an OOSS app (completion spring 2021)
- The development and launch of the CHSCP Self-Assessment Audit Tool for OOSS (underway)
- Parent/carers comms (launch summer 2021)
- A piece of work to support unregistered settings within the Orthodox Jewish community (preliminary work underway)

Safer Workforce

Despite all efforts to recruit safely there will be occasions when allegations are made against staff or volunteers working with children. Organisations should have clear procedures in place that explain what should happen when such allegations are raised. These should include the requirement to appoint a designated safeguarding lead (DSL) to whom these allegations are reported. It is ordinarily the responsibility of the DSL to report allegations to, and otherwise liaise with, the designated officer in the local authority (referred to as the LADO). The LADO has the responsibility to manage and have oversight of allegations against people who work with children. The LADO should always be contacted when there is an allegation that any person who works with children has:

- Behaved in a way that has harmed a child, or may have harmed a child.
- Possibly committed a criminal offence against or related to a child.
- Behaved towards a child or children in a way that indicates they may pose a risk of harm to children.

DRAFT

Page 78

There were 309 referrals to the LADO in 2019/20, a 16% increase from 266 referrals in 2018/19. The annual increase is in line with the trajectory since the inception of the LADO database and record keeping, although there was a reduction in referrals during lockdown and the impact on referral rates after April 2020 is still to be analysed.

There is a strong and effective working relationship between Hackney Education and the LADO service. This is particularly important as the majority of LADO referrals are from education settings. The LADO has worked extensively with the Head of Wellbeing and Education Safeguarding over the last year to address the ongoing difficulties posed by unregistered educational settings and the challenges around safeguarding in these settings.

Activity

There were 309 referrals to the LADO in 2019/20, a 16% increase from 266 referrals in 2018/19. The annual increase is in line with the trajectory since the inception of the LADO database and record keeping, although there was a reduction in referrals during lockdown and the impact on referral rates after April 2020 is still to be analysed.

There is a strong and effective working relationship between Hackney Education and the LADO service. This is particularly important as the majority of LADO referrals are from education settings. The LADO has worked extensively with the Head of Wellbeing and Education Safeguarding over the last year to address the ongoing difficulties posed by unregistered educational settings and the challenges around safeguarding in these settings.

Categories of Concern

Physical abuse remains the highest category of concern.

The other three categories (neglect, sexual and emotional) are less prevalent during LADO contacts.

The second highest category is concerns in private life. Settings and employers are increasingly more aware of the potential risks the experiences or behaviour in the private lives of employees may have upon their performance and approach to working with children in their employment. The employing organisation also needs to consider potential reputational damage if the concerns are serious and warrant a criminal investigation.

The 'other' category continues to record a relatively high number of contacts (9.3%). These relate to information sharing with the police or other organisations (non-recent matters mostly), parental complaints rather than allegations of harm or concern, and notification of unregistered settings without specific harm by individual being identified.

Themes

The increase in contacts with the LADO during 2019/20 is likely to be attributable to continued awareness raising, the LADO service being well embedded and improved professional familiarity. The role of Hackney Education encouraging referrals is also identified as a likely reason for additional activity. This is good practice.

One new theme identified relates to parents directly contacting the LADO service to make a referral. Four calls were recorded on the LADO database. In addition, we have noticed that parents have contacted the police before notifying the school of their concern or allegation or if they are dissatisfied with the outcome of a school's investigation. This has been echoed by colleagues at a number of London LADO Network meetings. Another theme relates to the involvement of the LADO service in relation to the conduct of police officers. The position as applied by the LADO service in Hackney (and for other local authorities as agreed at the London LADO Network) is that harm caused to children and young people as a result of the conduct of police officers needs to be

dealt with through police internal procedures i.e. the local professional standards unit. Police officers have a niche occupation whereby they are not in regulated activity with children, they are policing the public. Their work inevitably brings them into contact with children and young people who are arrested or in custody, which will on occasions include elements of physicality, such as restraints or managing resists to arrests.

Where complaints arise in respect of the conduct of the police, although a LADO investigation will not necessarily follow, it has been agreed that the LADO will follow up to ensure that the complaint is being dealt with and that the police will share the outcome of their investigation. This provides reassurance that a) the matter had been investigated and b) an official outcome had been reached. The MPS Child Safeguarding Development Group has attended two London LADO Network meetings to work in collaboration with the LADOs as they are in the process of refining a draft MPS LADO Engagement Protocol. This has unfortunately been placed on hold due to the current impact on services as a result of the COVID-19 pandemic.

LADO Training & Awareness Raising

The Safeguarding in Education Team (Hackney Education) run an extensive training programme throughout the year covering safe practice and the procedures for dealing with allegations against adults who work with children and young people. They continue to run specific training dealing with managing allegations for managers in the early years and school sector, once every academic year for schools and twice for early years managers. The training that the LADO facilitates, is set up following an identified need either by the organisation that expressed an interest/need or through referrals (either quality or number) that indicate a training session would prove helpful.

NHS Staff Training: *The training was co-presented by the LADO and the Head of Safeguarding at Homerton University Hospital NHS Foundation Trust. One session included staff working in Mental Health and the second session was attended by mostly health visitors. The training was well received and positive feedback was given regarding the training's applicability and the helpfulness of the case examples. The immediate feedback following the first session was applied to the delivery of the second session. One particular discussion about indecent images of children stimulated thinking about practices regarding the sharing of images of children in health settings. This generated amendments in protocol to set clear guidance on what is permissible and what the responsibilities of health staff are.*

Learning & Improvement

Since implementing a revised Learning & Improvement Framework in 2013/14, there has been significant activity undertaken across both the City of London and Hackney. A range of lessons have been identified leading to tangible impact and improvement across the safeguarding system. To identify lessons, the CHSCP applies a focus on the following areas:

The Voices of the Child, Family & Community

As part of the CHSCP pledge, safeguarding partners have committed to supporting and enabling a culture of working that routinely seeks out and reflects the voices of children and young people. They have further committed to engaging directly with children and young people and that the lived experience of local children and young people will be evident in the policies we create, the practice we review and the communication channels that our wider partnership creates. Importantly, it will be evident in our multi-agency casework and our intervention to improve the outcomes of children and young people. In summary, the lived experience and voice of children and their families are central to the CHSCP's shared vision, ambition and approach to multi-agency safeguarding.

However, it is important that we respond to this issue beyond the rhetoric. Safeguarding partners have agreed the need to avoid tokenistic initiatives that do little to strengthen practice, improve outcomes and potentially replicate ongoing work. The CHSCP is currently considering a range of actions to strengthen its approach in this context and will report on progress next year.

Reviews of Practice

Child Safeguarding Practice Reviews (CSPR) are undertaken on 'serious child safeguarding cases' to learn lessons and improve the way in which local professionals and organisations work together to safeguard and promote the welfare of children. These reviews were previously known as Serious Case Reviews (SCRs) but were transitioned to a new CSPR structure from July 2019. The detailed arrangements for CSPRs are set out in the CHSCP's local protocol [HERE](#). In determining whether or not a CSPR is required, the following criteria must be considered:

- The case highlights or may highlight improvements needed to safeguard and promote the welfare of children, including where those improvements have been previously identified.
- The case highlights or may highlight recurrent themes in the safeguarding and promotion of the welfare of children.
- The case highlights or may highlight concerns regarding two or more organisations or agencies working together effectively to safeguard and promote the welfare of children.
- The case is one which the Child Safeguarding Practice Review Panel have considered and concluded a local review may be more appropriate.

The following circumstances should also be considered:

DRAFT

- Where the safeguarding partners have cause for concern about the actions of a single agency.
- Where there has been no agency involvement, and this gives the safeguarding partners cause for concern.
- Where more than one local authority, police area or clinical commissioning group is involved, including in cases where families have moved around.
- Where the case may raise issues relating to safeguarding or promoting the welfare of children in institutional settings.

Page 82

Some cases may not meet the definition of a 'serious child safeguarding case', but nevertheless raise issues of importance to the City of London and /or Hackney. This might include cases where there has been good practice, poor practice or where there have been 'near-miss' events. The CHSCP may choose to initiate a local child safeguarding practice review in these or other circumstances.

Activity

- During 2019/20, the Case Review Sub-Group met on four occasions.
- Five serious incident notifications were submitted to the Child Safeguarding Practice Review Panel. All children were Hackney residents.
- Three notifications resulted in Serious Case Reviews being commissioned (pre-July 2019).
- One SCR and a review involving two care leavers who died by suicide remained ongoing.

- The review of the care leavers was published in November 2020. Child C was published in December 2020
- Full details of all the reviews published by the CHSCP are available [HERE](#).

One case raised at the Case Review Sub-Group related to a young mother who died by suicide (Ms A). She had two children of her own and was also caring for her two siblings as her own mother had drug and alcohol problems in another LA area. The case did not meet the criteria for a Safeguarding Adults Review or Serious Case Review however questions were raised around the rationale to place the siblings with Ms A. The CHSCP subsequently wrote to the local safeguarding partnership to bring the case to its attention. The response received noted that thoroughness in Section 20 Children Act placements (with particular regard to agency checks undertaken as part of the risk assessment/guardian suitability process) had recently been explored in a similar case ([Child LH](#)). Practice issues and learning had been embedded and multi-agency audits undertaken to review whether practice has changed. The case of Miss A preceded the Child LH review and subsequent procedural changes.

Previous Reviews

MULTI-AGENCY CASE REVIEW – CHILD E 2014

This review was initiated following a professional's visit to Child E's home that identified significant concerns regarding neglect. Questions were raised about the opportunities for earlier identification of the environment in which Child E was living; with an independent review subsequently being agreed by the Independent Chair. The following summary sets out the key areas of learning identified, some of the specific actions undertaken by the CHSCB and a range of examples of the impact that this review has had on the safeguarding system.

Key Learning

- **Children need to be seen, heard and helped, the importance of home visits and escalating concerns**
- **The importance of identifying and dealing with neglect**
- **The need for all staff to “Think Family”**
- **The importance and clarity of information sharing**

SERIOUS CASE REVIEW – FC 2015

In 2015, the CHSCB published a Serious Case Review (SCR) in respect of Case FC. The review involved a Hackney foster carer who, prior to his recruitment, was anonymously reported to the police about his use of indecent images of children. The police failed to investigate this complaint properly at the time and although information was retained about the anonymous report, it was never disclosed to Hackney Council. Over thirty children were subsequently placed by Hackney Council with this foster carer. In 2014, he received a custodial sentence after being found guilty of rape and a range of other sexual offences. Some of the victims were children in care. He is known to have sexually abused five children of primary school age, one victim in the community and one other unidentified victim abused some 30 years earlier. The SCR found that despite the police knowing about the initial allegation, on each of the occasions when the foster carer was subject to the regular criminal record checks that carers are required to undergo, a decision was made not to share that information with Hackney Council. At no time was Hackney Council given the opportunity to make an informed decision about the foster carer's employment. He escaped this scrutiny due to repeated professional judgements being made by the police on the basis of a particular understanding of legislation and case law regarding the sharing of 'soft intelligence'.

Page 84 Key Learning

The weaknesses in the guidance relating to the disclosure of 'soft intelligence' under the Police Act 1997

- **The need for GP contracting of counselling services to be clear about how to handle a disclosure**
- **An explicit recognition that children who are in public care need to be kept safe**
- **Educational work with children and young people to reduce the likelihood of further sexual abuse**

MULTI-AGENCY CASE REVIEW – CASE K 2015

In September 2013 (when they were aged 8 and 2) the police removed both children from their family home because of the extremely poor home conditions. It is now known, prior to this intervention, the family home had not been visited by any professional since late 2008. Both children were well known to a number of agencies and there were concerns about their health and development, which in the case of Child 1 were long-standing. He had a statement of special educational needs (SEN), a severe communication disability and developmental delay. Child 2 had more recently been diagnosed as having a significant developmental delay. Historically there had been concerns about possible neglect. Mother was convicted of cruelty and received a community sentence. They

have remained in the care of the local authority and there is currently no plan to return them to her care. After the children were removed the mother was diagnosed with severe depression.

Key Learning

- **The importance of home visits and not only seeing families in ‘settings’**
- **The importance of identifying and naming neglect as a potential concern – to ensure swift action is taken to protect children.**
- **The importance of robust and thorough assessments of potential neglect**
- **The importance of joint working across children’s and adult services and ‘thinking family’**
- **The need for robust arrangements for safeguarding children in education settings.**
- **The recognition of neglect and children with disabilities – additional vulnerabilities for this cohort.**

SERIOUS CASE REVIEW – CHILD H 2016

Child H was a baby girl who lived with her mother and father at the home of the maternal grandparents. Child H died at the age of six weeks. Medical advice indicated that the death had been caused by inflicted injuries. Child H’s parents, Ms M and Mr F, were arrested but subsequently no charges brought. No one has been held to account for Child H’s death. The circumstances of the death met the statutory requirement that a SCR be conducted.

Key Learning

- **The importance of distinguishing between parental learning difficulties v disabilities – the thresholds for engagement by other services and the assessment of any needs in the context of parenting capacity.**
- **The importance of thinking family and engaging relevant specialisms (whether adult or children) as part of the assessment process.**
- **The importance of management oversight and supervision of case work to ensure its quality.**
- **Ensuring a clearer understanding of Psychosocial Meetings held at Homerton Hospital.**

JOINT SERIOUS CASE REVIEW / DOMESTIC HOMICIDE REVIEW – CHILD D 2016

Child D and her mother were murdered by mother's ex-partner (father of Child D). There was no significant multi-agency involvement prior to the deaths, although mother reported concerns regarding domestic violence to police and their response has been subject to separate investigation by the Independent Police Complaints Commission (IPCC).

Key Learning

- **Professional curiosity in the context of people experiencing domestic violence and abuse.**
- **Accurate risk assessments of the risk of domestic abuse.**
- **The need for agencies to work together effectively.**
- **The need for robust supervision to ensure high quality work.**
- **The importance of sufficient resources being made available for front-line staff to do their jobs effectively**

MULTI-AGENCY CASE REVIEW – CHILD L 2016

Child L was a 17 year old male who was fatally stabbed. The assailants (who were found guilty of murder) were of a similar age and were known to Child L. Child L came to the attention of statutory services in the months before he died. On two occasions he was reported missing to the police and had been arrested or had contact with the police on at least seven separate times for drug offences in a number of cities across the UK - including in the period when he had been reported missing.

Key Learning

- **Seeing beyond criminal behaviours to consider if a young person, in particular young men, are potential vulnerable or at risk of harm/exploitation.**
- **Recognition of the increase vulnerability of young people who move across geographical areas as there is greater risk of them falling through statutory service gaps.**

SERIOUS CASE REVIEW – CHILD M 2018

Child M and his sibling were subject to Child Protection Plans following injuries that Child M's sibling sustained whilst in the care of Child M's father. In 2016, Child M was taken to hospital by his mother and on examination was found to have bruising to his face and transverse fractures to both femurs. In criminal proceedings father was found not guilty in relation to the GBH against Child M. Both mother and father were found guilty of child cruelty.

Key Learning

- **The recognition of avoidant behaviour & disguised compliance**
- **The need for professional curiosity and challenge in the context of ensuring children are safe.**
- **The need to guard against professional optimism**

MULTI-AGENCY CASE REVIEW – CHADRACK 2018

Chadrack was 5 years old when both he and his mother were found dead at their home in 2016. Chadrack had Special Educational Needs and Disabilities and was non-verbal. From the inquest into their deaths, it was concluded that Chadrack lived alone in the family home for over a fortnight after his mother's death. He was unable to feed himself or seek help. He died of starvation and dehydration.

Key Learning

- **The importance of thinking safeguarding first when dealing with absence, attendance and missing from education.**
- **Ensuring professionals attempt to understanding the context of the child's life and that of the parents / carers.**
- **The practical application of professional curiosity; beyond rhetoric.**
- **The need to rule safeguarding 'in or out' as an issue before anything else.**
- **Keeping children safe in education; proactively asking for information on vulnerabilities which may impact on the child or family network.**

SERIOUS CASE REVIEW - CHILD N & CHILD O 2018

In March 2017, Child N was assaulted by his father and pronounced dead in hospital. His female twin (Child O) sustained serious injuries in the same incident. Father subsequently pleaded not guilty to murder but admitted manslaughter on the grounds of diminished responsibility and in October 2017 was sentenced to indefinite detention.

Key Learning

- **The need to consider identified or unidentified fathers in terms of potential value or risk in the context of parenting capacity.**
- **The need for routine enquiries to be made with respect to the possibility of domestic abuse.**
- **The relevance of cultural / linguistic barriers to understanding and the need to understand the context of the family.**

MULTI-AGENCY CASE REVIEW – RACHEL 2019

Rachel was 16 years and 3 months when she took her own life. Her family, school and local Child and Adolescent Mental Health Services (CAMHS) had been concerned about her well-being for some time, including a risk of self-harm, suicidal ideation and acts. She had also become known to her GP, the local Emergency Department, the London Ambulance Service, the Police and Children's Social Care.

Key Learning

- **The need for professionals to have an holistic family view of support and/care.**
- **The importance of supporting parents/carers in safety planning and providing opportunities for engagement with professionals.**
- **The need to consider parents' worries and observations in the assessment process.**
- **The impulsivity of young people and the fact sometimes they will tell adults what they think they want to hear.**
- **Professionals needing to remain curious and maintain healthy scepticism in all contexts.**
- **The influence of social media, internet use and media.**
- **The importance of robust safety planning and ensuring all key agencies are alert to potential risks.**

MULTI-AGENCY CASE REVIEW - X 2019

X took his own life in October 2016. He had just had his sixteenth birthday and was in Year 11 at school, preparing for GCSEs. X lived with his mother and father. His older sister had just moved away from home to university, outside London.

Key Learning

- **Drug use and alcohol use amongst young people – particularly the use of Xanax.**
- **The use of the internet and social media in self-harm and suicide.**
- **The need for professionals to support awareness of mental health in young people - Peers as Supporters.**
- **The need to create environments where boys / young men can seek help.**

Auditing

The CHSCP's Self-Assessment Framework

During 2019/20, the CHSCP designed a new Safeguarding Self-Assessment Framework to help organisations make children safer. It replaced the Section 11 audits and Section 157 / 175 audits and is intended to make the process easier to access and update. Whether an organisation is a safeguarding partner, a relevant agency or is one named within our local arrangements, there is an expectation that the self-assessment is completed.

The Safeguarding Self-Assessment process involves the completion of an on-line tool. There are three different formats depending on the size and type of the organisation. Once completed and submitted, organisations will automatically be sent a pdf report of results and identified actions. The system can be updated by an organisation at any point a change is identified or an action complete. At the time of writing, the self-assessment process is ongoing. Results will be formally reported in the next annual report. There remains work to be done, particularly with the cohort of individual out of school settings in the City and Hackney to help them understand their responsibilities to complete this assessment.

*To date, a number of organisations have queried whether returns can be submitted by 'umbrella organisations' that oversee particular settings in our area (they can't). Some have also responded stating that as they don't believe they are a relevant agency under the Relevant Agency Regulations, then there is no requirement for them to engage. We believe this is an incorrect interpretation as will be taking further legal advice. Our current position is that Section 16H Children Act 2004 resolves any debate about relevant agency status. This section contains a wide power exercisable by the safeguarding partners to request a **person or body** to provide information to them (or various other persons or bodies identified in the section). There is no limitation or definition of 'person or body' therefore the request can be made to anyone. The information in the self-assessment is being requested pursuant to enabling or assisting the performance of functions conferred to safeguarding partners by Section 16E. This information is essentially needed for making the local arrangements to safeguarding children and the need to work together to identify and respond to the needs of children in our area. In this context, organisations have an obligation to comply (s16H(2)) and safeguarding partners retain a power to enforce compliance by injunction (s16H(3)).*

Multi-Agency Case Audits

The CHSCP multi-agency case auditing identified a range of examples of good safeguarding practice being undertaken by the partnership. Lessons have also been identified that have led to tangible improvements. Multi-agency case auditing allows the CHSCP to deliver one of the best learning opportunities for front-line workers; directly engaging them in a process that reflects upon, assesses and measures the quality of professional practice. One round of multi-agency case auditing was held in 2019/20 focusing on the mental health of children and young people. All audits result in an outcome focussed action plan that the QA Sub-Group use to track and evidence improvements in front-line practice. Learning is also disseminated to agencies/front line staff via the [Things You Should Know \(TUSK\)](#) monthly briefings. Full details are available on the CHSCP auditing webpage however strengths and key messages are detailed below.

THE CITY OF LONDON (MENTAL HEALTH OF CHILDREN & YOUNG PEOPLE)

GOOD PRACTICE

Education Services were involved in the case even though there was no statutory requirement

There was a good level of professional attendance at Child in Need and Care Programme Approach (CPA) meetings.

The Children and Families Team reflected on the young person's social media usage (a component of the local assessment framework), suicide contagion and learning from recently published CHSCP Local Reviews to help assess risk and inform their approach to working with this family.

The voice of the child was confidently relayed by the CAMHS Care Coordinator and seen to help assess risk and support safety planning.

Evidence of timely interventions (strategy discussion with key partners, CAMHS intervention and a face-to-face discussion following disclosure of abuse).

Ongoing thought was given to the most appropriate professional to engage the young person.

Sensitive decision making by the social worker on whether it would be helpful to speak to the young person at the point of their being critically unwell.

Overall, the positive work undertaken by CAMHS in a challenging and uncertain set of circumstances was acknowledged.

KEY MESSAGES FOR PRACTICE

Understanding of Autism Spectrum Disorder (ASD)

The cases audited (in both City of London and Hackney) presented a common factor in the late identification of ASD. As a partnership, there are opportunities to explore how professionals can be supported in early identification, communicating with ASD young people, working with parents (who may themselves have witnessed traumatic events) and understanding the impact ASD may have on a young person in the context of self-harming behaviour.

Information Sharing

This case highlighted areas for continued improvement in information sharing:

Sharing of safety plans with appropriate professionals (on agreement and as changes are made).

Ensuring that a core list of key professionals are invited to planned and emergency meetings.

Outcomes of meeting being consistently communicated to key professionals.

The need for increased awareness of the School Nursing Teams to ensure that the right professionals are informed of CIN meetings, sent relevant correspondence, and involved in discharge planning for school aged children.

Absent Fathers

One audited case highlighted the need for professionals to seek clarity on the identity of absent fathers or other male figures who play/have played a role in the family. This is especially important for young people who struggle with, or display self-harming behaviours linked to their identity. Continued professional curiosity around absent fathers / paternal extended families can help professionals identify the wider support network, fully assess risks and increase the young person's understanding of themselves and their emotional wellbeing.

HACKNEY (MENTAL HEALTH OF CHILDREN & YOUNG PEOPLE)

age

GOOD PRACTICE

Evidence of professionals working with parents to engage in services resultant in good attendance at appointments.

The use of family therapist from the same cultural background to engage family and online interpreting service to ensure mother understood conversations.

When a young person attended a sexual health clinic, their named person was informed to ensure consistency of care. This avoided the young person having to retell their story (an issue fed back by the young person).

Professionals ensured a young person had access to home education and they subsequently exceeded prior expectations by completing a number of GCSEs.

The young person now has plans to attend college.

Good information sharing, with CAMHS letters copied to the Adult Mental Health Consultant and evidence of good information sharing between social workers and CAMHS practitioners.

A young person was able to express insight into their condition, including warning signs and when to call the emergency services.

Evidence of effective multi-agency working. The Home Tuition Service and School worked flexibly to transition learning and support for a young person. Allegations of assaults were responded to line with standard procedures. It was agreed a young person to be seen with a paediatrician (not normal practice for over 13s). Good multi-agency working between CSC and Police to locate young person when missing.

The Child in Need plan had a clear set of contingency arrangements for escalating concerns.

Evidence of challenge and escalation, professionals meetings being convened and CAMHS use of the complex care forum to ensure the service was delivered at the right level of need.

Effective escalation with professionals recognising the parent's strengths but also identifying the extent to which they could consistently engage with the plan.

KEY MESSAGES FOR PRACTICE

Understanding of Autism Spectrum Disorder (ASD)

The cases audited (in both City of London and Hackney) presented a common factor in the late identification of ASD. As a partnership, there are opportunities to explore how professionals can be supported in early identification, communicating with ASD young people, working with parents (who may themselves have witnessed traumatic events) and understanding the impact ASD may have on a young person's in the context of self-harming behaviour.

Information Sharing

Health professionals should be aware that they are able to access records outside of their caseload if there is a child protection/safeguarding concern.

If professionals experience a lack of response from adult mental health professionals (e.g. information requests) this should be escalated to the ELFT Named Professional for Safeguarding Children.

Safety plans should be shared with appropriate professionals (on agreement and as changes are made).

There is a need for increased awareness of the School Nursing Teams to ensure that the right professionals are informed of Child in Need meetings, sent relevant correspondence, and involved in discharge planning for school aged children.

Communication from Hackney's First Access & Screening Team about 'no further action' / closure letters should contain enough detail for agencies to understand the rationale for closure and clear direction for future re-referrals.

Calling Professionals Meetings

Any professional in the network who has concerns about a case can call a professionals meeting. A professionals meeting may be important: where there is uncertainty amongst professionals about the necessary steps to safeguard the welfare of a child; where there is concern that the family is undermining attempts to understand potential risks to children; where professional disagreements arise that are impacting on effective work with the family, or where professionals need an opportunity to reflect on the plans for working with a family when progress is not being made.

Social Media Footprint

One case highlighted a general reminder, where possible, for professionals to assess young people's social media footprint. This is especially important for young people with increased vulnerabilities.

Consideration of Young Carers

All young carers are entitled to a local authority carer's assessment. This is especially important for care givers who are reaching adulthood and who may not meet the threshold for support by the community mental health team.

Wider Family

A reminder for professionals to formally include the wider family network in discussions around safety planning and to gain their views on what is happening within the family. This learning was also identified in the CHSCB Local Review on Rachel. This case highlighted the need for professionals to consider the lived experience of siblings and support from early help services in relation to traumatic experiences they have witnessed.

Page 9

Performance Data

The scrutiny of key performance data continued to be a key function of the Quality Assurance Sub-Group in 2019/20, with reports on performance being regularly provided to key safeguarding leaders during 2019/20. The CHSCP has agreed to review its dataset going forward to ensure this remains proportionate and avoids duplication of metrics already captured. The CHSCP will report on progress next year, although it should be noted that the pandemic has delayed this work.

Front-Line Intelligence

DRAFT

The CHSCB undertook a staff survey in 2018/19. This aligned with the partnership's focus on 'A Healthy Workforce' and was designed to measure how organisations support their staff and the subsequent impact on safeguarding practice. The CHSCP will undertake its next full survey in 2021-22.

External Learning

The CHSCP is a learning organisation and is constantly looking outwards to identify relevant learning opportunities that may help assist in its role of co-ordinating and ensuring the effectiveness of the safeguarding systems across the City of London and Hackney. Where relevant, national reviews and inspection reports are considered by the CHSCP. Links to NSPCC thematic briefings and wider learning from other local areas continued to be disseminated to front-line staff via CHSCP training and [TUSK briefings](#).

Key Messages for Practice

Safeguarding First

For many organisations, safeguarding is one priority amongst many. Because of this, risk to children and young people can escalate when safeguarding is absent from an organisation's culture and how its professionals and volunteers discharge their duties. It is essential that leaders promote such a culture. If anyone has any doubts as to the importance of this message, read The CHSCP's review on [Chadrack Mbala-Mulo](#). To help promote such a philosophy of 'Safeguarding First', always think about safeguarding whatever you are doing, whatever policy you are following and whatever action you might be taking. Professionals should also listen to what children and young people have said they need from those who work with them (Working Together 2018).

Children have said they need

Vigilance: to have adults notice when things are troubling them

Understanding and action: to understand what is happening; to be heard and understood; and to have that understanding acted upon

Stability: to be able to develop an ongoing stable relationship of trust with those helping them

Respect: to be treated with the expectation that they are competent rather than not

Information and engagement: to be informed about and involved in procedures, decisions, concerns and plans

Explanation: to be informed of the outcome of assessments and decisions and reasons when their views have not met with a positive response •

Support: to be provided with support in their own right as well as a member of their family

Advocacy: to be provided with advocacy to assist them in putting forward their views

Protection: to be protected against all forms of abuse and discrimination and the right to special protection and help if a refugee.

Context

Context is key and understanding the context of a child's life is essential for effective safeguarding. In terms of practice, this is about how the partnership works together to better understand the lived experience of children at home, in education and in health, alongside those aspects that are typically outside of the family environment; such as peer groups, places and spaces, and the virtual world that children occupy through their use of technology and social media. Knowing about these contexts will help us determine whether they reflect pathways to harm or pathways to protection. However, it is usual that no one individual has oversight on the detail of everything. In this respect, a first and important step is to make sure that professionals are confident in sharing information and talking with each other. If you are worried about a child or young person, you are allowed to talk with other professionals without fearing you are doing something wrong. You aren't. Talking to each other and sharing information when trying to protect people from actual or likely harm or to prevent a crime is lawful and in the substantial public interest.

Curiosity

Professional curiosity is the capacity and communication skill to explore and understand what is happening within a family rather than making assumptions or accepting things at face value. This has been described as the need for practitioners to practice 'respectful uncertainty' – applying critical evaluation to any information they receive and maintaining an open mind. In safeguarding the term 'safe uncertainty' is used to describe an approach which is focused on safety but that takes into account changing information, different perspectives and acknowledges that certainty may not be achievable. Professional curiosity can require practitioners to think 'outside the box', beyond their usual professional role, and consider families' circumstances holistically. Professional curiosity and a real willingness to engage with children, adults and their families or carers are vital to promoting safety and stability for everyone.

Much has been written about the importance of curiosity during home visits and the need for authentic, close relationships of the kind where we see, hear and touch the truth of their experience of 'daily life' and are able to act on it and to achieve similar closeness with parents or carers. Practitioners will often come into contact with a child, young person, adult or their family when they are in crisis or vulnerable to harm. These interactions present crucial opportunities for protection. Responding to these opportunities requires the ability to recognise (or see the signs of) vulnerabilities and potential or actual risks of harm, maintaining an open stance of professional curiosity (or enquiring deeper), and understanding one's own responsibility and

knowing how to take action. Children in particular, but also some adults, rarely disclose abuse and neglect directly to practitioners and, if they do, it will often be through unusual behaviour or comments. This makes identifying abuse and neglect difficult for professionals across agencies. We know that it is better to help as early as possible, before issues get worse. That means that all agencies and practitioners need to work together – the first step is to be professionally curious.

Curious professionals will spend time engaging with families on visits. They will know that talk, play and touch can all be important to observe and consider. Do not presume you know what is happening in the family home – ask questions and seek clarity if you are not certain. Do not be afraid to ask questions (and difficult questions) of families, and do so in an open way so they know that you are asking to keep the child or young person safe, not to judge or criticise. Be open to the unexpected, and incorporate information that does not support your initial assumptions into your assessment of what life is like for the child or young person in the family.

DRAFT

Challenge

Differences in professional opinion, concerns and issues can arise for practitioners at work and it is important they are resolved as effectively and swiftly as possible. Having different professional perspectives within safeguarding practice is a sign of a healthy and well-functioning partnership. These differences of opinion are usually resolved by discussion and negotiation between the practitioners concerned. It is essential that where differences of opinion arise they do not adversely affect the outcomes for children, young people or adults and are resolved in a constructive and timely manner. Differences could arise in a number of areas of multi-agency working as well as within single agency working. Differences are most likely to arise in relation to the criteria for referrals, outcomes of assessments, roles and responsibilities of workers, service provision, timeliness of interventions, information sharing and communication. Safeguarding is everyone's responsibility and front-line staff need confidence in talking with each other about decisions that have been made, discussing any concerns regarding those decisions and where there isn't agreement; escalating those concerns as appropriate. Remember, equally important is the culture of how we work; and it is vital that front-line staff are encouraged to remain professionally curious and to raise issues where they feel that their concerns for children and young people aren't being addressed. To help staff resolve professional differences, the CHSCP has issued a simple [Escalation Policy](#).

Child Death Reviews

New CDR Arrangements

Local authorities and clinical commissioning groups (CCGs) are now the named Child Death Review (CDR) partners. CDR partners must make arrangements for the review of every death of a child normally resident in the local authority area. The purpose of child death reviews is to identify and act on learning at local and national level that could prevent future deaths. Formal collaboration between regional CDR partners is in place to ensure that child death reviews are undertaken at greater scale. This covers the City of London, Hackney, Newham, Tower Hamlets and Waltham Forest.

DRAFT

Facts & Figures 2019/20

Page 99

- At the time of writing, the CDOP annual figures remain inaccessible due to the cyberattack on Hackney Council.
- National data reflects that the rate of infant mortality (deaths of children under the age of 1) in Hackney is 4.0 per 1000 live births (2016-18). This rate is similar to the England average of 3.9 per 1,000 children but worse than the London average of 3.3 per 1,000 children.
- In 2018/19, the CHSCB reported that child mortality rates (deaths in children and young people aged 1-17) in Hackney and the City of London were 11.7 per 100,000 children for 2015-17 which is similar to both the England and London average of 11.2 and 11.0 per 100,000 children respectively. It represents the boroughs lowest rate since 2010 when rates stood at 16.3 per 100,000 children and is in line with the trend in most London boroughs, of declining rates in child mortality.

As part of its functions, CDOP is required to categorise the preventability of a death by considering whether any factors may have contributed to the death of the child and if so, whether these could be “modified” to reduce the risk of future child deaths. During 2018/19, the CDOP identified modifiable factors in a third (33% or 5) of the deaths reviewed. A national comparison is not possible as NHS Digital is yet to publish year end data 2019/20. The CDOP is confident that all cases are reviewed comprehensively, and that professional challenge remains a central part of the review process.

Training & Development

Training Summary 2019/20

The training opportunities offered by the CHSCP are designed to meet the diverse needs of staff at different levels within the wide range of organisations that work with children, young people or adult family members. Sessions range from those that raise awareness, about safeguarding and child protection to specialist topics aimed at more experienced staff. **The training programme focuses on areas of practice prioritised by the CHSCP, with learning from local and national case reviews integrated into the training material.** Based on the evidence gathered during 2019/20, The CHSCP remains confident that single and multi-agency training is of high quality. The training programme continues to improve the knowledge and skills of the safeguarding workforce and is helping contribute towards positive outcomes for children and young people.

Page 100

- **70 training sessions in total (increase from 58 in 2018/19).**
 - 50 training courses (full and ½ day sessions)
 - 11 Reducing Parent Conflict (RPC) training sessions (funded through Department for Work & Pension),
 - Two Serious Case Review Learning Seminars and Seven Masterclasses/ Seminars.
- 1459 available training places, of which 1391 (95%) were booked in advance of the course date.
- Of the 1391 booked places, 209 delegates (15%) did not attend the training or cancel their booking in advance of the course.
- 60% of attending delegates worked in Hackney, 9% in the City of London, and 31% worked across both Boroughs.
- The CHSCP also updated its core Safeguarding training presentations, which have been positively received by delegates.
- Increased the number of Safeguarding Children with Disabilities/SEND courses delivered.
- Increased the training offer in relation to FGM, Breast Flattening and Cultural Awareness training.
- Maintained an enhanced offer in relation to Exploitation, including Young People and Substance Misuse, County Lines, and Safeguarding in a Digital World.
- Delivered a bespoke Safer Recruitment course in the City of London.

Annual Conference: Safeguarding & The Digital Thread

The CHSCP Annual Safeguarding Conference was held on Wednesday 4th March 2020 at the Guildhall in The City of London. The theme of this year's conference was Safeguarding & the Digital Thread with a specific focus on youth produced imagery, social media apps and offenders and technology.

- The conference was attended by a total of 167 delegates.
- 229 delegates originally booked to attend the conference
- 24 cancelled before the date of the conference.
- Of the remaining 205 potential delegates 153 (75%) attended the conference and 52 (25%) did not attend the conference or did not cancel their booking.
- A further 14 delegates attended without having previously booked a place.
- Of the 167 delegates who attended the conference 25% work in the City of London, 25% work in the London Borough of Hackney and 50% work in both boroughs.
- **92% felt the conference met their expectations of the day**
- **93% felt that learning from the conference would impact upon their safeguarding practice.**
- **96% of the delegates rated the conference sessions as either EXCELLENT (56%), VERY GOOD (29%) or GOOD (11%).**

Page 103

I will be more curious about how the young people I work with use online platforms, and to have more open conversations with young people regarding their online behaviours.

I have gained awareness of the many social media platforms and will consider the language we use when investigating/ supporting a Safeguarding incident.

I am now more aware of social media platforms & dangers and have increased awareness of potential avenues for exploitation.

Evaluation & Impact

Supported by its Training Evaluation and Analysis Framework, the CHSCP continues its practice in monitoring and evaluating the effectiveness of training, including multi-agency training, for professionals in the area. Work undertaken to review the quality of training in 2019/20 has enabled the CHSCP to gain important insight into the difference it is making towards improved outcomes for children and young people.

- **BEFORE** training **62%** of delegates believed their knowledge was **GOOD, VERY GOOD or EXCELLENT**.
- **AFTER** training **98%** stated their knowledge was **GOOD** (19%) or **VERY GOOD** (57%) **EXCELLENT** (22%).
- **96%** of those who answered the question stated that the training would enable them to practice more effectively and **97%** stated that the trainers facilitation skills, teaching style and knowledge were **GOOD** (9%) **VERY GOOD** (31%) or **EXCELLENT** (57%). This is really excellent feedback and a testament to the skill and expertise of our internal & commissioned trainers.
- **90%** of delegates rated the content of SCR Learning Seminars as **GOOD** (6%) **VERY GOOD** (30%) or **EXCELLENT** (54%).
- **98%** stated what they had learned would be useful to them in their roles and **94%** stated what they had learned would help them safeguarding children & young people more effectively.

Page 104

How will you use the experience gained in training within your work?

I feel more confident in identifying families that need to be referred & most important knowing how to complete the forms correctly. (Early Help)

I am now able to identify specific factors of the implications of neglect and abuse and how this may affect their relationships! (Neglect)

I will feel more confident to recognise & support victims. Will be able to support other staff more effectively. (DVA Seminar)

Assessment of intoxication using the signs I learnt today. (Young People & Substance Misuse)

Remembering professional curiosity/ challenge. Standing still is falling behind. Reading lessons learned from Serious Case Reviews (DSL)

I now have a better knowledge of apps & platforms that can be used when discussing issues with young people & families. (Safeguarding in a Digital world)

Feeling more confident to challenge & address things immediately and in a way that leaves everyone feeling heard. (Difficult conversations)

I now have better insight into the reality of county lines working for young people & how to break the myth. (County Lines)

Any other comments?

The delivery was exceptional. The lecturer really captured the audience. Very well delivered. (Neglect)

This was by far and away the best safeguarding course I have attended. The facilitator was EXCELLENT Thank you. (DSL Refresher)

This was as close to life changing training as it can practically get - it was uncomfortable and at times it hurt - exactly as it should be in order to learn. (BRAVE)

This is by far the most informative course I've been on for a long time. Plenty to think about and apply. (Safeguarding in a Digital world)

I have a better understanding of what young people I work with are facing every day. Also helps me think about interactions with young people affected by gangs/ county lines that I work with currently (BRAVE)

Excellent facilitators - knowledgeable, contextualised everything, kind, caring and humorous (County lines)

Priorities & Pledge

CHSCP PRIORITIES 2020/21

Priority 1: Health & Stability of the Safeguarding Workforce Outcome: Safeguarding partners and relevant agencies attract, retain, develop and support their workforce. A healthy and stable workforce contributes to high quality safeguarding practice.

Priority 2: The Voice of Children and Young People Outcome: Multi-agency safeguarding practice reflects the lived experience of children and young people. The voices of children and young people are central to all aspects of intervention. These influence action and improve outcomes.

Priority 3: Getting the Basics Right Outcome: Safeguarding practice in the City of London and Hackney is at least good. Children and young people are effectively protected from harm by early, robust, timely and coordinated multi-agency intervention and support.

Priority 4: The Appetite to Learn Outcome: Safeguarding partners and relevant agencies are actively engaged in the CHSCP's learning & improvement framework. Leaders encourage the independent scrutiny of their safeguarding arrangements by the CHSCP, challenge performance and disseminate and embed lessons across their agencies.

A key commitment for the CHSCP remains in 'making the invisible visible' and our focus on better understanding vulnerability. This reflects the importance that safeguarding partners and relevant agencies apply to ALL children and young people living in hard-to-reach groups and communities that are less engaged with public safeguarding services. It also includes a focus on improving outcomes for ALL people through close cooperation with other key strategic forums.

CHSCP PLEDGE 2020/21

Health & Stability of the Safeguarding Workforce - *Without a healthy and engaged workforce, no agency can fully participate in and support the work of the partnership. The CHSCP will therefore seek to develop a better understanding of the pressures that staff and volunteers face and the steps that can be taken to mitigate them. This work will be undertaken in the context of what we know about the current conditions - organisational change and restructure, reduced resourcing levels and increased demand. It will include regular evaluation of workforce stability, its capacity and the support available to help deliver consistently high quality practice.*

The Voice of Children and Young People - *We will support and enable a culture of working that routinely seeks out and reflects the voices of children and young people. This will include the CHSCP engaging directly with children and young people. The lived experience of local children and young people and their voices will be evident in the policies we create, the practice we review and the communication channels that our wider partnership creates. Importantly, it will be evident in our multi-agency casework and our intervention to improve the outcomes of children and young people.*

Getting the Basics Right - *Whilst committed to driving change and innovation, the CHSCP is aware that good practice begins with getting the basics right. We will maintain a focus on ensuring that such basic principles are embedded in our work. This will include an emphasis on issues such as the effectiveness of multi-agency meetings, ensuring that not only that the right agencies attend, but that they send the right people and share relevant information. We will concentrate on issues such as identifying and responding to neglect, the timeliness of engagement, maintaining good records and the application of strong visible leadership.*

The Appetite to Learn - *We are committed to maintaining our improvement journey and to that end, we will actively seek out and embrace opportunities to learn. We will refocus our quality assurance activity and ensure our commitment to undertaking local reviews is maintained, whilst capturing opportunities to learn from others. We will routinely revisit the action plans of previous reviews to ensure that identified improvements are reflected in contemporary partnership practice. Critically we will respect the independent scrutiny role of the Independent Child Safeguarding Commissioner, the right to 'roam', the right to ask difficult questions and the right respectfully challenge. Whenever required, safeguarding partners and relevant agencies will provide whatever information they can to address a relevant enquiry or concern.*

Vulnerability & Making the Invisible Visible - *The CHSCP will seek to better understand the vulnerabilities that can negatively impact on the outcomes for children and young people, particularly with those for whom oversight and engagement is limited. We will seek to develop a more complete understanding of what vulnerability looks like in the City of London and Hackney and work to mitigate and prevent harm. We will map vulnerability as we know it based on age, location, need and the context of young people's lives, at home, in care and in the public spaces and places (including the internet) they frequent. We will identify existing and emerging harms, including neglect, physical, emotional and sexual abuse, abusive relationships, CSE, CSA, peer on peer abuse, the impact of negative digital collateral and criminal exploitation, including county lines.*

DRAFT

What you need to know

CHILDREN AND YOUNG PEOPLE

Nothing is more important than making sure you are safe and well cared for.

As adults, sometimes we think we always know best...we don't..... and that's why your voice is so important.

This is about you and we want to know more about how you think children and young people can be better protected.

We want to talk to you more often and we want to know the best way to do this.....please help.

If you are worried about your own safety or that of a friend, speak to a professional you trust or speak to ChildLine on 0800 1111

PARENTS AND CARERS

Public agencies are there to support you and prevent any problems you are having getting worse...Don't be afraid to ask for help.

Tell us what works and what doesn't when professionals are trying to help you and your children.

Make sure you know about the best way to protect your child and take time to understand some of the risks they can face.

You'll never get ahead of your child when it comes to understanding social media and IT – but make yourself aware of the risks that children and young people can face.

THE COMMUNITY

You are in the best place to look out for children and young people and to raise the alarm if something is going wrong for them.

We all share responsibility for protecting children. Don't turn a blind eye. If you see something, say something.

If you live in Hackney, call the **First Access Screening Team (FAST) on 0208 356 5500**

If you live in the City, **call the Children & Families Team on 0207332 3621**

You can also call the NSPCC Child Protection helpline on 0808 800 5000

FRONT-LINE STAFF AND VOLUNTEERS WORKING WITH CHILDREN OR ADULTS

Make children and young people are seen, heard and helped. SAFEGUARDING FIRST, CONTEXT< CURIOSITY & CHALLENGE

Your professional judgement is what ultimately makes a difference and you must invest in developing the knowledge, skills and experiences needed to effectively safeguard children and young people. Attend all training required for your role.

Be familiar with, and use when necessary, the Hackney Child Wellbeing Framework and/or The City of London Thresholds of Need tool to ensure an appropriate response to safeguarding children and young people.

Understand the importance of talking with colleagues and don't be afraid to share information. If in doubt, speak to your manager.

Escalate your concerns if you do not believe a child or young person is being safeguarded. This is non- negotiable.

Use your representative on the CHSCB to make sure that your voice and that of the children and young people you work with are heard.

If your work is mainly with adults, make sure you consider the needs of any children if those adults are parents.

LOCAL POLITICIANS

You are leaders in your local area. Do not underestimate the importance of your role in advocating for the most vulnerable children and making sure everyone takes their safeguarding responsibilities seriously.

Councillors Anntoinette Bramble (Hackney) and Randall Anderson (The City of London) are the lead members for Children's Services and have a key role in children's safeguarding – so does every other councillor.

You can be the eyes and ears of vulnerable children and families... Keep the protection of children at the front of your mind.

CHIEF EXECUTIVES AND DIRECTORS

You set the tone for the culture of your organization. When you talk, people listen. Talk about children and young people. Talk about SAFEGUARDING FIRST.

Your leadership is vital if children and young people are to be safeguarded.

Understand the capability and capacity of your front-line services to protect children and young people - make sure both are robust

Ensure your workforce attend relevant CHSCB training courses and learning events.

Ensure your agency contributes to the work of CHSCB and give this the highest priority. Be compliant with minimum standards for safeguarding.

Advise the CHSCB of any organisational restructures and how these might affect your capacity to safeguard children and young people

THE POLICE

Robustly pursue offenders and disrupt their attempts to abuse children.

Ensure officers and police staff have the opportunity to train with their colleagues in partner agencies.

Ensure that the voices of all child victims are heard, particularly in relation to listening to evidence where children disclose abuse.

Ensure a strong focus on MAPPA and MARAC arrangements.

HEAD TEACHERS AND GOVERNORS OF SCHOOLS

Ensure that your school / academy/ educational establishment is compliant with statutory guidance KCSIE.

You see children more than any other profession and develop some of the most meaningful relationships with them.

Keep engaged with the safeguarding process and continue to identify children who need early help and protection.

CLINICAL COMMISSIONING GROUPS

CCGs in the health service have a key role in scrutinising the governance and planning across a range of organisations.

Discharge your safeguarding duties effectively and ensure that services are commissioned for the most vulnerable children.

THE LOCAL MEDIA

Safeguarding children and young people is a tough job.

Communicating the message that safeguarding is everyone's responsibility is crucial - you can help do this positively.

Hundreds of children and young people are effectively safeguarded every year across the City and Hackney.

This is news.

Overview & Scrutiny

Children & Young People Scrutiny Commission

Date of meeting: 12th January 2021
Title of report: Unregistered Education Settings
Report author: Chris Roberts, Head of Wellbeing & Education Safeguarding
Authorised by: Annie Gammon, Director of Education
Brief: Provide the Commission with an update on the work being undertaken by Hackney Education in relation to unregistered education settings.

Report to the Children & Young People Scrutiny Commission

Report title: Unregistered Education Settings

Meeting date: 12th January 2021

Report originator: Chris Roberts, Head of Wellbeing & Education Safeguarding

1. Purpose of the report

- 1.1. This report will provide councillors with an update on the work being undertaken around unregistered education settings (UES) in Hackney.

2. Recommendations

- 2.1. Commission members are asked to note the contents of this report.

3. How an unregistered education setting differs from a registered setting?

- 3.1. Independent schools and other education settings are required to register with the Department for Education (DfE) as independent schools if they provide full time education to five or more pupils of compulsory school age or one or more pupils either with an EHCP or is looked after by a local authority. This is a legal requirement.
- 3.2. Independent schools are also required to comply with the Independent School Standards. These standards cover:
 - 3.2.1. quality of education;
 - 3.2.2. spiritual, moral, social and cultural development;
 - 3.2.3. welfare, health and safety;
 - 3.2.4. suitability of proprietors and staff;
 - 3.2.5. premises and accommodation;
 - 3.2.6. the provision of information;
 - 3.2.7. the handling of complaints; and the
 - 3.2.8. quality of leadership and management.
- 3.3. Ofsted, on behalf of the DfE, inspects registered independent schools to ensure compliance with registration requirements and the independent school standards.
- 3.4. There are two types of unregistered education setting. The first is not required to register as an independent school because they do not meet the qualifying criteria, whereas the second type is required to register as they meet the qualifying criteria but has not done so. The first is legal and the second is illegal
- 3.5. It is an offence to operate an unregistered school and Ofsted has powers, under the Education Act 2002, to prosecute proprietors who do so. If found guilty they can be fined up to £5,000 and/or face up to six months imprisonment.

4. Unregistered Education Settings in Hackney

- 4.1. In Hackney unregistered education settings are predominantly Yeshivas operated by the Orthodox Jewish community. These settings provide a full time, wholly religious based education to boys aged 14-16.
- 4.2. These settings are not currently required to register as schools because, despite offering a full time education, the DfE consider the curriculum to be too narrow to warrant registration. They are considered to be places of religious instruction rather than schools.
- 4.3. This narrowness of the curriculum is also not considered to be suitable for the purposes of elective home education either due to the lack of a secular component
- 4.4. Hackney Education is aware of 29 Yeshivas and 387 children from the Orthodox Jewish community who are believed to be educated in unregistered education settings.
- 4.5. The 387 from the Orthodox Jewish community does not constitute the entirety of this cohort, only those whose identities are known to us. The majority of these became known to us following the decision of a registered independent school to close and reopen as an unregistered education setting with the children continuing to be educated on the same site.
- 4.6. The identities of the majority of children being educated in Yeshivas are not known to Hackney Education as these settings are not legally required to share information and have not been forthcoming in providing details of the children they educate. Therefore the exact number of children being educated in unregistered education settings is not known, though estimates put the figure in the region of 1,500-2,000.
- 4.7. Many parents claim that by arranging for their children to be educated in a Yeshiva they are opting to educate their children otherwise than at school. Guidance from the DfE states that for any elective home education to be considered suitable it should '*enable a child to participate fully in life in the UK by including sufficient secular education*'. This means those parents who choose to solely educate their children in a Yeshiva are not providing a suitable education due to the wholly religious nature of the curriculum offered. For it to be considered suitable parents would need to supplement the education in the Yeshiva with sufficient secular education outside of the setting.

5. Unregistered Education Settings Protocol

- 5.1. In September 2020, Hackney Education, in conjunction with the City & Hackney Safeguarding Children Partnership (CHSCP), launched a protocol to co-ordinate the oversight of and response to unregistered education settings.
- 5.2. The protocol has two stages. The first stage outlines the response to when a new unregistered education setting is identified, whilst stage 2 covers the response to a serious safeguarding and/or health & safety incident within or relating to the setting.
- 5.3. Hackney Education is the lead service for the protocol but the implementation ensures that there is a co-ordinated, multi-agency response to any setting. This draws upon the expertise of other Hackney Council services such as planning, environmental protection and children and Families as well as external partners such as health, the police and the fire brigade.
- 5.4. Since its launch there has been one stage 2 incident that has been put through the protocol, which led to a successful multi-agency response.

6. Out of School Settings Project

- 6.1. As part of Hackney Education's wider work to improve safeguarding practice in out of school settings there is a workstream focused upon Yeshivas.

- 6.2. A meeting has already been held with Interlink to discuss how we could support Yeshivas in relation to safeguarding practice. This will focus on ensuring each Yeshivas has an appropriately trained safeguarding lead and Hackney Education is able to assure itself as to the safety of the children who attend. A follow up meeting has been set up with a representative of the Yeshivas to discuss this further.
- 6.3. This is still at a preliminary stage but it is hoped that this is the beginning of a constructive relationship with Yeshivas in respect of safeguarding.

7. DfE Consultation of Regulating Independent Education Institutions

- 7.1. The absence of a regulatory framework for unregistered education settings is recognised by the Department for Education, who have recently consulted on proposals to expand the criteria for registration to encompass these settings. The proposals would see unregistered education settings that currently offer a full time but narrow education to children of compulsory school age during the school day required to become registered and regulated in the same way as independent schools.
- 7.2. Hackney Education responded to the consultation and believes these proposals would improve the breadth of the education these children receive and enhance the safeguarding of those children who attend. However the proposals are likely to be met with concern by the Orthodox Jewish community.
- 7.3. While the Department for Education believes registration would lead to higher standards in what is currently the unregistered sector, it should be recognised that a number of settings will struggle to comply with the regulatory requirements. If so this may have a knock on impact upon other Hackney Education services if they are forced to close.
- 7.4. As a consequence there could be increased demand for school places or, as is more likely, increased numbers of parents opting to educate their children at home. This could have future resource implications for us as a borough around elective home education and children missing education.

8. Conclusion

- 8.1. While initiatives undertaken by Hackney Education, such as the UES protocol and the out of school settings project, unregistered education settings continue to present a number of significant challenges.
- 8.2. It is a priority for Hackney Education to develop a working relationship with the Orthodox Jewish community so we are able to assure ourselves around the safeguarding of children and identify those not receiving a suitable education.
- 8.3. Undertaking this work places an increasing demand on the service as the Orthodox Jewish community plays such a major part in the unregistered education setting context in Hackney.

03 December 2020

Dear Cllr Conway and Cllr Gordon

Child friendly borough

Thank you for your [letter](#) of 6 August 2020 regarding the Council's approach to developing a child friendly borough, which followed your Commission meeting in January. We are grateful for the time taken by the Commission to consider this matter, and for the observations and recommendations set out in your letter. We apologise for the delay in responding.

Following approval at the Council's Cabinet on 19 October, you'll be aware that a consultation has now been launched on the draft Child-Friendly Places Supplementary Planning Document (SPD), which runs until 12 January 2021. The new design guidelines will ensure all those who play a key role in planning and designing spaces in Hackney actively consider and plan for people of all ages, abilities and backgrounds by establishing child-friendly principles and design guidelines for any proposed developments.

The ambition is to ensure that any proposed development in Hackney accommodates and supports children and young people in moving through the borough, providing them with opportunities to get physically active, connect with nature, and play in safe, healthy and unpolluted public spaces.

Last month saw the launch of the Valuing the Future Through Young Voices report, from the Young Futures Commission. We are incredibly proud of their work, which has been the most comprehensive youth engagement exercise the borough has ever seen - over the last year, the Commission has spoken to over 400 young people through street based engagement and hosted a series of events with over 1,000 attendees. However, our success will truly be judged, and rightly so, on the change that comes out of this process, and the Council is committed to working with our partners to engage with the findings and deliver the recommendations within the report.

The insight gained through the Commission is, of course, just a snapshot in time, a picture of young people’s lives in Hackney in 2019/20. Since most of this work was carried out, the world has changed irrevocably through the Covid-19 pandemic, we are entering an unprecedented economic downturn, the murder of George Floyd in America has had a profound impact on our communities, and our young people face greater social, educational, and economic challenges than ever before. It is vital that the thousands of young people who gave us their time can see the impact that they have made, and that they have not just been listened to, but heard, and we are committed to finding ways to permanently put the voice of young people at the heart of decision making and policy making in Hackney.

We have set out our response to each of the Scrutiny Commission recommendations below.

Recommendation One	Response
<p>That the final report of the Young Futures Commission (HYFC) is presented to the CYP Scrutiny Commission together with an action plan which sets out how recommendations to improve engagement and involvement with young people will be embedded across the Council directorates. In addition, the Commission would welcome plans on how statutory partners can be supported to implement principles and practice of youth engagement</p>	<p>Hackney Young Futures Commission published their report, <i>Valuing the Future Through Young Voices</i>, on 14 November. This is supported by a draft strategic delivery plan which prioritises the 19 "Asks" identified within the report and sets out how these can be delivered by the Council and its partners. All of the recommendations have been agreed in principle; the target date for completion of the high priority solutions, of which there are 72 identified under the 19 "Asks" in the report is 31 January 2021.</p> <p>The expectation is that the remainder of the solutions will be completed by December 2021. Progress of these will be monitored on a regular basis by the Commission.</p>

	<p>The draft Plan sets out the Commission's values and principles which will underpin how the "Asks" will be delivered. The Plan will be jointly led by young people and Partner leads.</p> <p>The Plan sets out a formal accountability structure between various delivery partners and key stakeholders (including statutory partners) to ensure the division of accountabilities and responsibilities for progress, delivery and monitoring is clearly understood by all.</p> <p>The Commission will receive regular reports on progress and will provide an end of project assessment report to young people and the Council by 31 January 2021.</p>
--	--

<p>Recommendation Two</p> <p>That the principles of engagement and involvement of children and young people highlighted in this correspondence, are used alongside emerging recommendations from HYFC to inform consultation guidance across the council.</p>	<p>Response</p> <p>The Commission's draft strategic delivery plan clearly and formally puts children and young people at the centre of leading, actively contributing and influencing guidance and decision making of specific projects in response to the 19 "Asks". These are reflected in the principles and values and the accountability structures referred to above.</p> <p>More broadly, Communications is developing a Young Person's Communications toolkit for Public Health, co-produced with young people, to support and inform future Council consultations - the intention is that this can then be adapted by other Council services to information consultation practice across the Council.</p>
--	---

<p>Recommendation Three</p> <p>The Commission welcomes the development of Child Friendly Special Planning Document (SPD), and would recommend:</p> <ol style="list-style-type: none"> 1. Further inclusion of the views of wider range of children and young people; 2. Greater clarity on the expected outcomes of the Child Friendly 	<p>Response</p> <ol style="list-style-type: none"> 1. Agreed. Further engagement opportunities, with a wider range of children and young people are available through the formal consultation process, which launched in October 2020 and is in accordance with the Council's adopted Statement of Community Involvement. The Council strongly believes that such proactive engagement will ensure that the final version of the SPD is sound and
---	---

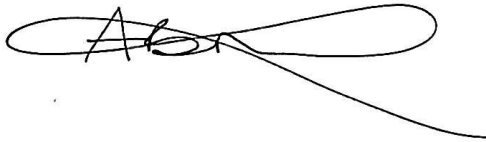

<p>Borough SPD and how this may influence local infrastructure;</p> <ol style="list-style-type: none"> 3. Further work to establish those criteria through to measure and monitor the success of this planning policy; 4. Further detail on how young people themselves will understand this initiative, and the criteria through which they can assess local provision and success of this SPD (could there be a child friendly version of the SPD); 5. That the final Child Friendly SPD is presented to Scrutiny. 	<ol style="list-style-type: none"> 2. Agreed. This is being addressed through the expected and aspirational outcomes of the 8 Principles for a Child Friendly Built Environment in Hackney. This will be further addressed, in respect of how this may influence local infrastructure, through the Implementation and Delivery section of the emerging SPD. <p>The primary objective of the emerging Child Friendly SPD is to guide the delivery of new growth, and associated supporting infrastructure, that is sustainable and inclusive. This specifically relates to how it supports the independent mobility and play experience of children and young people in the Borough. These outcomes will be measured through the Local Plan Annual Monitoring Report (AMR) process, which provides an assessment of quantitative and qualitative indicators.</p> <p>In respect of infrastructure planning, the emerging Child Friendly SPD will, just like the Hackney Local Plan, have a direct link to the Hackney Infrastructure Delivery Plan (IDP). The latter document identifies anticipated investment in infrastructure improvements that will be required to support the Borough's planned-for future growth; namely, the growth identified through the Hackney Local Plan. The IDP will also seek to prioritise investment, in order to ensure that the delivery of infrastructure improvements corresponds with growth across the Borough.</p> <p>In both cases, the Local Plan AMR provides a mechanism for not only monitoring performance of new development but also triggering interventions - whether they be related to policy or infrastructure investment.</p> <p>Additionally the SPD will be used to influence and shape projects coming forward outside of</p>
---	--

	<p>the planning application process. This includes improvements being delivered by Hackney Council in relation to Streetscene and highway works; open spaces; green infrastructure and regeneration. These improvements will bring benefits to children and young people living in those parts of the Borough that are less likely to experience change through new growth.</p> <ol style="list-style-type: none"> 3. Agreed. The Council will measure and monitor success of planning policy through the Implementation and Delivery Tool sections of the emerging SPD. 4. Agreed. A number of measures are underway: <ol style="list-style-type: none"> a. The Council is addressing how young people understand this document through the key messaging and methods used in the current engagement and consultation period. b. The Council's Design Team was utilised to ensure the language, graphics and layout of the document is user friendly for a variety of ages and abilities. c. The Council will address how young people themselves understand the criteria through the Implementation and Delivery Tool section, with specific focus on the language used for the Child Friendly Design Standard criteria tool. 5. Agreed. The Council will seek to present the draft SPD to the Scrutiny Commission; anticipated December 2020.
--	---

Recommendation Four	Response
<p>The Commission would recommend that the planned consultation to update the Statement of Community Involvement incorporates:</p> <ul style="list-style-type: none"> • The views of children, young people (and their parents); • The emerging findings of the Young Futures Commission; • The Draft report being considered by Skills Economy and Growth Commission before finalisation. 	<p>Agreed. The future review of the Council's Statement of Community Involvement will seek to incorporate improvements identified through this process; including recommendations from the Commission. Drawing on the lessons learnt from the SPD programme, the Council will seek to include a specific chapter, in the updated Statement of Community Involvement, on engagement with children and young people. This is because the Council acknowledges them as being a group often unrepresented in plan-making and planning decision processes.</p>

	<p>The Council continues to seek inclusive engagement with all of its stakeholders on the preparation of the Hackney Local Plan and its associated thematic, area-based and procedural documents. Future draft versions of emerging policy, supplementary planning guidance and relevant procedural documents will be made available upon request to our stakeholders.</p>
--	--

Yours sincerely

Cllr Anntoinette Bramble

Deputy Mayor and Cabinet member for education, young people and children's social care

Cllr Caroline Woodley

Cabinet member for families, early years and play

Overview & Scrutiny

Children and Young People Scrutiny Commission Minutes of 12th January 2021

Attendees

Sophie Conway (Councillor) (Chair)
Margaret Gordon (Councillor) (Vice Chair)
Ajay Chauhan (Councillor)
Clare Potter (Councillor)
Katie Hansen (Councillor)
James Peters (Councillor)
Sharon Patrick (Councillor)
Clare Joseph (Councillor)
Sade Etti (Councillor)
Humaira Garasia (Councillor)
Justine McDonald (Statutory Co-optee)
Jo Macleod (Co-opted member)
Ernell Watson
Shabnum Hassan
Michael Lobenstein

In attendance:

- Cllr Anntionette Bramble, Cabinet Member for Children, Education and Children's Social Care
- Cllr Caroline Woodley, Cabinet Member for Early Years, Families and Play
- Anne Canning, Group Director, Children and Education
- Annie Gammon, Head of Hackney Learning Trust and Director of Education
- Annie Coyle, Interim Director of Children and Families
- Chris Roberts, Head of Wellbeing & Education Safeguarding
- Yusuf Erol, Head of Finance, Children, Families and Education Services
- Jim Gamble, Independent Child Safeguarding Commissioner, City & Hackney Safeguarding Children Partnership
- Rory McCallum Senior Professional Adviser, City & Hackney Safeguarding Children Partnership
- Richard Brown, Head of Urswick Secondary School

Cllr Conway in the Chair

1. Apologies for absence

- 1.1 Apologies for absence were received from the following members of the Commission:
- Shuja Shaikh.
- 1.2 Apologies for lateness were received from the following members:
- Cllr Sharon Patrick.

2. Urgent Items / Order of Business

- 2.1 In response to the third national lockdown, the Commission received an update from the Director of Education and the Director of Children & Families Service. This was taken after Item 3.

3. Declarations of interest

- 3.1 The following declarations were received by members of the Commission:
- Cllr Chauhan was a member of NEU and a teacher at a school external to Hackney;
 - Cllr Peters was a governor at a school in Hackney;
 - Jo Macleod was a governor at a school in Hackney.

Urgent Item - Covid-19 Update from Directorates

U.1 The Chair welcomed the Director of Education and the Director of Children & Families to the meeting. At the outset, both Directors and their staff were thanked for the help and support they have provided to local children in young people during the pandemic to date.

Education Service

- U.2 the Director of Education provided a brief update to the Commission on the most recent developments for schools and education in relation to the third national lockdown. A summary of the key issues is presented below:
- Schools remain open to vulnerable children and those children of key workers. Those children who do not have access to IT facilities are also able to attend. As a result of the broadening of the vulnerability criteria there are more children on site and some schools have needed to prioritise children attending (with guidance from the Education Service);
 - With the experience of two earlier lockdowns, the authority was confident that schools had a robust programme of on-line teaching available to pupils.
 - Secondary schools had been preparing for mass testing (lateral flow tests) though the urgency of the roll-out has diminished with the lockdown and fewer children on site. Schools had the equipment and would be testing those children that were on site. Testing pilots would also be running in both primary and early years settings locally.
 - All three special schools are all open with the support of SEND transport. Covid testing was also taking place in special schools alongside SEND transport staff.
 - Whilst early years settings are required to be open fully, concerns remain about the increased risk to staff and children given the limits to which social distancing can be applied.
 - The Council is lobbying government to change its plans to continue with the early years census in January 2021, as the number of children on roll would be significantly lower than would be expected, and would have a detrimental impact on future funding;
 - Almost all schools have received IT devices from the government programme, and schools were generally in a better position than they were in the summer. It was clear however, that additional devices were still needed.
 - New arrangements for exams have been announced, and although these have yet to be finalised, it was understood that teacher assessments would play an important role in the assessment process. SATS for KS1 and KS2 had also been abandoned.

- Schools had been asked to step in to provide FSM either through hampers, vouchers or use of Edenred Scheme. Given the issues raised over the quality of FSM provided at the moment, a longer term solution was expected to be announced shortly.
- The Education Service continued to work with the Children and Families Service to support vulnerable children.

Children & Families Service

U.3 The Director of Children and Families presented to the Commission key issues arising in the service:

- The service has developed guidance to ensure that staff are able to operate safely and also keep local children and families safe;
- Every family within the Disabled Children Service had been contacted in the last lockdown and this exercise was being repeated and would be completed by 22nd January 2021.
- Young Hackney continued to support young people virtually and through the active outreach programme.
- The Vulnerable Children's Group, which is composed of officers from Education, Early Help and Social Care, continues to meet to develop and maintain oversight of vulnerable children.
- As expected (and has been experienced in other authorities) referrals into the FAST Team have reduced since the start of the 3rd lockdown.
- As far as possible, the CFS was continuing to operate a 'business as usual' programme in the safest way possible.

Questions from the Commission

U.4 Had any assessments been carried out on the impact of virtual learning and children being isolated at home? How had virtual schooling impacted on child wellbeing?

- Schools are working to develop a varied programme of activities for children receiving their education at home. Lessons may be live or recorded which allow for different levels of engagement and varied learning pace.
- It is undeniable that there were concerns around children's wellbeing, not only in relation to their home environment, but also their mental wellbeing. It was noted that referrals had increased for mental health services. In response schools had also increased pastoral care for students and every child is at least seen weekly by a tutor. Many schools continue to have form time and year group and all-school assemblies.

U.5 What advice is being given to schools to help them prioritise children who are able to attend in this third lockdown?

- The advice to schools is that vulnerable children should be prioritised. Critical workers who are single parents also gain priority as too do children whose parents are both critical workers.

U.6 In relation to ongoing issues relating to the digital divide (devices and internet access), what is known about the quantum of need locally? How is the council improving access to IT?

- At the outset of the pandemic, it was estimated that over 2,000 laptops were needed locally but this would have been reduced by recent allocations. Needs were of course changing particularly as family circumstances change and evolve. Advice about free internet access was being collated and disseminated among local schools. A further school audit was planned to ascertain current IT needs.
- A local school had 235 laptops delivered on Monday 11th January and these were being configured for use and delivery to pupils.

U.7 School staff and pupils were receiving abuse about wearing masks in and around the school perimeter. What role can the council play in improving awareness of Covid related safety measures around schools?

- The Council would look to update advice and guidance issues through the Communications team to ensure that this reflected the principles of health and safety adhered to in local schools.

U.8 As many early years settings are dependent on parental fees for income, how will early years settings fare financially in the 3rd lockdown?

- It was an uncertain picture for early years at the moment, as future funding methods have not been agreed and published. A number of smaller settings who have been able to furlough staff, have remained closed in this lockdown.
- The Cabinet member for Families Early Years and Play noted that central government was being lobbied to retain existing funding levels for early years using the January 2020 census data. Further information about finance was expected from the Department of Education shortly. It was important that information was provided soon to ensure that the sector retained confidence in both central and local government.

U.9 Covid 19 has created additional pressures on the local authority in finding appropriate placements for looked after children. Can the Children and Families service provide assurance that all placements of looked after children - including in semi-independent care settings - are made with providers which are registered with Ofsted and of good quality?

- The service reassured the Commission that at present no children had been placed in any setting which was not registered with Ofsted (and subject to regulatory oversight).
- All looked after children's placements were managed through the Children's Resource Panel which reviewed and monitored looked after children's placements in residential care.
- Placement stability was very important for young people and additional resources were being used to help children maintain placements where this was needed. It was acknowledged however that national conditions were difficult and that the use of the unregistered placement would be an absolute last resort.

U.10 The Chair thanked officers for updating the Commission.

4. Children and Families Service - Budget Monitoring

- 4.1 Budget monitoring is a key function of Overview & Scrutiny and the Commission reviews in-year budgets of services supporting children and young people. The Children and Families Service produced a budget monitoring report for 2020/21 which highlighted key budget lines for the Children and Families Service. The Head of Finance for Children, Adults and Community Health presented the report highlighting the following:
- Including the use of government grants and reserves, £73.1m of funding has been provided for services within the Children and Families Service in 202/21. A forecast overspend is projected of £3.6m, this was mainly due to budget pressures in the Corporate Parenting budget.
 - Each residential placement costs on average £200k per year and there were a number of management actions in the Corporate Parenting budget area to help reduce costs.

Questions from the Commission

- 4.2 The Commission sought clarification on the use of £1.6m of reserves set aside for increased staffing for Ofsted, and whether this was used for requirements set out by Ofsted or to offset budget pressures in the wider Children and Families Service?
- Additional funding was provided to support improvement required by Ofsted this was focused on two areas a) £900k was used to increase capacity in the assessment team which had experienced significant pressures in 2019 b) £700k was used to bring additional managerial oversight to case management, the appointment of external inspection partner as well as additional capacity for leadership and systems management.
- 4.3 What factors are driving the increased pressures in the Corporate Parenting budget? Is shortage of supply driving up prices? How is the CFS ensuring that value for money is being obtained for the placements? Can any services be provided in-house?
- There is extraordinary pressure within the system to secure quality and value for money placements. £200k annual costs for residential placements were not uncommon. A number of projects had been established to assess how the provision of early help may reduce the need for these costly placements (e.g. Edge of Care Board). It was acknowledged that Covid 19 and the Cyberattack had limited progress in this area.
 - Hackney was working across other boroughs in North East London to develop a collaborative commissioning process for children's residential placements.
- 4.4 The Mockingbird Project is cited as a management action to reduce costs in the Corporate Parenting budget. If this is a service reduction, is this not counter productive in that the Council needs to extend support to the in-house foster care team and make it more attractive to improve retention and increase take-up by local foster carers?
- The Mockingbird Project was designed to help improve placement stability by building a wider and more enhanced model of foster carer support. This was

an' investment to save' management action and there are no planned cuts for this service.

- 4.5 Whilst acknowledging that there are very complex issues behind residential childcare budgets, these cost pressures have been identified for some period of time in Corporate Parenting. Has sufficient priority been given to finding long term solutions which can help to reduce budget pressures?
- The financial pressures on children's service are significant both within this council and nationwide. Covid-19 and the cyber attack provide an opportunity to review and reset the budgets for this service. The engagement of partners will be critical to the budget reset however, as a new local settlement will be needed in how services are resources, for example the borough-wide early help offer.
 - There is a paucity of good quality value for money placements for children at present which is driving up costs. To give a recent example, the local authority was no.37 on a waiting list for a specific residential placement for a child in the week beginning 4/1/21. Where possible Corporate Parenting will provide extensive wraparound care and support to a vulnerable child if this can reduce the need for residential care.
- 4.6 With referrals and assessments into the Children and Families Service decreasing by $\frac{1}{3}$, can you provide further detail as to why there is a forecast overspend of £461k in the Access and Assessment Team?
- Whilst referrals into the system have reduced, the journey of children through the system has been slower due to the limitations placed on the service by Covid-19 (e.g. time taken to assess and deliver interventions and court delays). Thus the service is holding young people for longer at present.
 - It was also noted that the number of referrals did not always reflect the complexity of cases which may require additional and more longitudinal care and support.
- 4.7 The Chair concluded that it would be useful for members of the Commission to meet officers within the Corporate Parenting team to further understand the placement commissioning process. This could help inform the planned review of the Commission for this year.
- 4.8 The Chair thanked officers for attending and responding to questions from the Commission.
- 5. City & Hackney Safeguarding Children Partnership**
- 5.1 The Annual Report of the City & Hackney Safeguarding Children Partnership is presented to the Commission each year for review. The Independent Child Safeguarding Commissioner presented a number of key issues from within the report which are summarised below:
- 2019/20 was a year of transition to the new arrangements for safeguarding, in which the LA, CCG and Police became the main safeguarding partners.
 - As a result of Covid, meetings of the Safeguarding Partnership had become more frequent, but shorter in duration and more focused.

- The strategic aims of the partnership had been adjusted in response to Covid 19, these now included the health and wellbeing of the workforce; a recognition that safeguarding practices would need to be adapted to reflect new and emerging risks and the loss over oversight of children during lockdown and interoperability - ensuring that there was a consistent digital framework which safeguarding partners used to communicate and share information.
- Covid presented a number of challenges to staffing, but it was clear that staff had rallied and had gone over and above to ensure service continuity. There is a need to ensure that there is sufficient capacity and Occupational Health is correctly focused to the needs of staff.
- There have been a number of emerging safeguarding concerns which have arisen during the pandemic a) increased incidence of head injuries among young people and b) increased incidence of child accidents in the home. This data is being evaluated to help identify specific risk factors and to inform preventative interventions. Similarly, on-line risks to children have increased for children during lockdown as children were spending more time on-line.
- The number and quality of safeguarding training sessions delivered in 2019/20 has increased. Attendance has also improved, though there were still some areas where improvement was needed. It was likely that improvements in attendance would be continued into 2020/21 as training has shifted on-line.
- The Partnership continues to engage with the Orthodox Jewish Community in an attempt to improve safeguarding arrangements at local Yeshivas. This work is ongoing and there has been some positive engagement with the community in this process.
- The Partnership is seeking to develop a process involving Child Safeguarding Statements which would be updated every two years. These would encourage and support a process of self-assessment to help demonstrate how local agencies meet safeguarding requirements.
- The CHSCP is and overseeing is driving the development of anti-racist practice in child safeguarding and would encourage partners self-assessments to reflect this.

5.2 The Independent Commissioner also wished to place on record the CHSCP's thanks and gratitude to all frontline staff who had worked hard to ensure that children have been effectively safeguarded during the pandemic. This included not only health staff, but educators, police and those working in the voluntary sector. The Commissioner also noted that local safeguarding work had benefited from strong leadership from the Council during this time.

Questions from the Commission

- 5.3 A letter was sent to the Council from Interlink about safeguarding in Yeshiva but had not yet received a response?
- It was noted that this letter concerned a training offer to be delivered by interlink to the Haredi community and was being handled by the Safeguarding Children's Partnership. A response would be sent.

Overview & Scrutiny

- 5.4 There are new plans to develop a Scrutiny Board to strengthen the Partnerships approach to independent scrutiny. Can the CHSCP explain who will sit on this Board and how will the Board function to improve independent scrutiny?
- The proposed new Safeguarding Board would include the Lead Scrutiny Member in the Council and the Independent Commissioner who would work with leads at LA, Police and CCG to collaborate and agree areas of scrutiny each agency would focus upon. This would remove duplication and streamline and focus scrutiny to better effect.
- 5.5 Under the new arrangements for serious child safeguarding cases, do individual safeguarding partners (Council, CCG, and Police) solely determine which cases are reviewed? Does the CHSCP have any role in such decisions?
- When a case arises which causes concern, this is presented to the Safeguarding Partnership at which all agencies are represented. The ultimate decision as to whether a case goes forward for further review is that of the Independent Commissioner. The Chair also sets the terms of reference and the parameters for any review.
- 5.6 The annual report notes that there has been an increase in the number of referrals to the LADO. Can you explain what factors may be behind this increase?
- Increase in referrals to the LADO was seen as a positive indicator as this would suggest an increased level of awareness of risk and knowledge /understanding of the LADO's role among local officers.
- 5.7 The Children and Families Service has seen a decline of about $\frac{1}{3}$ in the total number of referrals it usually receives since the start of the pandemic. What is the Safeguarding Children Partnership's view on how to improve surveillance and oversight of children and young people to ensure that safeguarding risks are being identified and help is available to those who need it? How can services work together to improve oversight? Can a child self-refer vulnerable and in need of help and support?
- With reduced oversight of children during the pandemic, it was clear that new ways of developing safeguarding interventions would be necessary. Partnership and effective communication and information sharing is central to this process. The partnership has audited all partners to ascertain how local safeguarding systems had adapted to the lack of oversight of children due the lockdown. This is not easy, as it underlined the centrality of schools in provisioning regular oversight of children and young people.
- 5.8 At page 42/43, the annual report notes the significant year-on-year variations to Children on a Child Protection Plan e.g. a 30% increase to March 2017 followed by a 39% decrease to March 2018. How can such large variances be explained? Has there been significant changes to local thresholds, management decisions or other local policy and practice which give rise to such wide variations? What outcomes was the Safeguarding Partnership hoping to see from any internal review of the Ofsted inspection?

- Such variations would prompt questions on the systematic application of thresholds. This application of thresholds does require some work by the Partnership over the coming year and this would focus on the 'front end' of the care pathway where perhaps too many cases were being referred which do not require any statutory intervention. In this context, a lot of effort goes into assessing and referring families when more preventative intervention could have been provided earlier. It was underlined however, that thresholds were a partnership issue as it required all stakeholders to understand these and to refer appropriately within them.

5.9 How were safeguarding systems being adapted in response to the increased number of children who are now in Elective Home Education, some of whom are on Child Protection Plans? It was also noted that there have been difficulties in engaging the Gipsy and Irish Traveller Communities since the pandemic and that to date, attempts to encourage children to restart school had been unsuccessful. What strategies was the Partnership employing to overcome these challenges?

- The Director of Education noted that if a child was on a Child Protection Plan the child would be monitored closely by both the School and Children's Social Care. All parents home educating must be assessed for the education that they are responsible for providing.
- The Director of Education noted that there had been real and genuine concerns within the Traveller Community about Covid which had impacted on school attendance. A dedicated officer was liaising with the Traveller community to help build confidence and to help them re-engage with schools.

5.10 What level of bereavement support is available for vulnerable children and their families?

- This was an important local issue. Information has been sent out to all partners on this issue. In addition, how individual partners had supported bereaved children during the pandemic had been audited by the Commission to help develop and extend good practice. This was also undertaken in relation to staff bereavement.

5.11 At page 56, the annual report notes a worrying increase of 73% in acute mental health admissions for children and young people via the Homerton Hospital since the start of the pandemic. What assurance do we have that local preventative and early help services provided through CAMHS are accessible, appropriate, and acceptable to young people? Has the RAG rating system of the CAMHS providers been tested? Is there sufficient recognition of the digital divide and access to private settings when support can be provided virtually?

- The Partnership was alive to this issue as significant pressures on mental health services have been noted as children's needs increased. The Partnership would look at CAMHS provision locally and work was being undertaken to ascertain how quickly young people were assessed and referred for support they needed.
- The Partnership was also committed to reviewing early help provision across the partnership to ensure that the correct application of thresholds and pathways into the FAST team.

- Since the start of the pandemic there has been a spike in mental health needs among young people and an on-line preventative offer has been developed in response (e.g. Kooth). CAMHS had also prioritised those young people that continue to need face-to-face support using RAG ratings similar to that adopted by Children and Families Service. Those assessed to be in lower need have been visited less frequently. There is of course some additional risk in this and partners were alive to these, but there were no easy solutions.
- The Director of CFS noted that a working group had been set up to support young people in acute mental health settings, to ensure that the placement remained the most appropriate setting for them.

5.12 The Commission had a number of further questions which there was no time to respond to but it was agreed a brief written response be provided for the next meeting:(these are provided at the end of this section).

5.13 The Commission welcomed the Safeguarding Partnership's suggestion to move toward quarterly reporting as this would move away from 'historical' discussions of within annual reporting. The Chair suggested that it would be useful to meet with the Independent Commissioner to agree format and focus of future CHSCP reporting at CYP Scrutiny in 2021/22. The Chair thanked the Independent Commissioner and Senior Professional Adviser for attending the meeting and responding to questions raised.

Agreed: Chair and Independent Commissioner to meet to discuss future scrutiny arrangements

Agreed: that short written responses be provided to the following:

1. To improve accountability, the Safeguarding Children Partnership is considering requiring partner agencies to complete Annual Child Safeguarding Statements. How will these plans be published, and will there be opportunities for these to be tested or challenged?
2. To what extent have local 'Relevant Agencies' (who then have a duty to comply with child safeguarding requirements) cooperated with the local Safeguarding Children Partnership? Are there any local compliance issues in any sectors?
3. What testing and challenge has the Safeguarding Children Partnership provided for virtual assessments developed by Children and Families Service and other children's services to ensure that they are robust and help to safeguard local children? How is the Partnership disseminating information and best practice about virtual assessments across local agencies working with children and young people?
4. The Ofsted inspection highlighted the need for earlier involvement and improved information sharing from safeguarding partners (in particular from the

Police) in strategy discussions and decision making. Has any improvement been seen in the engagement and involvement of the Metropolitan Police over the past 12 months?

5. Effective safeguarding of children is dependent on effective partnerships not only amongst professionals but also with the community. The Commission has received reports which note that social care intervention rates are disproportionate for some groups of local children, particularly with children from Black Caribbean and some other minority ethnic backgrounds. What work has the Safeguarding Children Partnership undertaken in relation to combat racial inequality and to support cultural competence in assessing safeguarding risks and assessments?

6. How is funding for Safeguarding Children Partnership determined and apportioned between partner agencies - is there a national formula? How does funding for the Safeguarding Children Partnership in City & Hackney compare to neighbouring boroughs? For transparency should individual contributions from partner agencies be included in annual reporting?

6. Unregistered Educational Settings

- 6.1 In 2017/18 the Commission reviewed Unregistered Educational Settings in Hackney and made a number of recommendations for improvement. Given the complexity of this issue and the difficulties encountered in making sustained improvements, the Commission continues to maintain oversight and to review and monitor progress against the recommendations.
- 6.2 The Education Service presented the report, key highlights of which are summarised below:
- The curriculum taught at local Yeshiva was too narrow for these to be considered as Independent Schools, therefore were more likely to be defined as religious institutions given the absence of secular teaching. Parents of children attending Yeshiva consider their children to be Electively Home Educated which was a point of tension, as children being Electively Home Educated are required to have an element of secular education.
 - The DfE was aware of this tension and has recently conducted a public consultation related to this matter. The government was proposing that any setting which offered education for children, irrespective of the breadth of the curriculum taught, would be expected to register with the DfE and be subject to the same regulatory framework as Independent Schools. If implemented, this may improve regulatory oversight of children and young people in attendance at Yeshiva.
 - Unregistered Settings Protocol has been established to improve regulatory and enforcement coordination of key partners (e.g. police, planning, education, children's social care).
 - The Out of School Settings project continues to work with local organisations to help improve safeguarding in non-statutory settings which work with children and young people.

- The Education Service had met with Interlink and representatives from local Yeshiva to discuss safeguarding proposals to ensure that recruitment conformed to safeguarding principles and that effective safeguarding systems were in place. Although discussions were at an early stage, it was reiterated to stakeholders that progress was needed.

Questions from the Commission

- 6.3 The report noted that following the closure of an Independent School last year, the school reverted to an unregistered setting, meaning that a further 387 children were now outside the regulatory control and safeguarding oversight of the Local Authority. Were these children automatically put on the Elective Home Register? Given that the Local Authority now has the details of the parents (which was a barrier to regulatory action before), what action has been taken by the Council to support this group of parents to ensure that their children receive an appropriate and effective education?
- These children have been recorded as a subset of Children Missing Education as they cannot be considered as being Electively Home Educated as there is no secular learning. Some parents have engaged with the Education Service and have been able to provide evidence that their child's education at the Yeshiva is being supplemented with secular education and have therefore been placed on the Elective Home Register and subject to regular review.
 - In terms of Children Missing Education numbers were relatively small at the current time given the decline in the numbers of children and families moving in and out of the borough. The work is supported by 0.5 WTE officer and the Education Service is currently recruiting additional capacity to the team. This will enable additional focus and support to be provided to those 387 children who had previously attended the Independent School and were now attending local Yeshiva.
- 6.4 At 4.7 of the report it was stated that Yeshivas do not provide a 'suitable' education. Could this be clarified?
- As Yeshivas provide a solely religious education, by legal definition, this is not considered a suitable education. If there is no secular education then it cannot be considered as suitable. If Yeshivas are providing a wider curriculum, then of course, they will need to register as an Independent School and therefore comply with the regulatory framework for these settings.
- 6.5 The Commission noted that an Unregistered Settings Protocol was established in September 2020. Can further details be provided a) to confirm whether the Metropolitan Police and Lond Fire Brigade are included and b) details of the Stage 2 Incident which occurred in September, including what enforcement action was taken?
- The Police and Fire Brigade are both included in the Unregistered Settings Protocol. Stage 1 shares intelligence about the location of new unregistered settings. Stage 2 is where health, safety or safeguarding incidents have occurred. Two Stage 2 incidents have occurred since September in relation to

a fire and to Public Health concerns (Covid 19). Further investigation of the fire revealed that the setting was in fact an Independent School.

- 6.6 The Commission noted from last year's update that an audit of safeguarding arrangements at all Out of School Settings was being undertaken (including Yeshiva). Can you provide further details of the outcome of this audit, as this will provide the Commission with further context as to how Yeshivas compare to other Out of School settings in complying with safeguarding requirements?
- A dedicated project team was working with Out of School settings to support the development of safeguarding protocols and processes. Data was not available at the meeting and a briefing would be provided to the Commission.
 - The Independent Commissioner noted that Michael Lobenstein had been very supportive in helping to engage and involve Yeshiva on safeguarding issues. Issues did remain with the curriculum and in gaining knowledge as to where Yeshiva were located. It was acknowledged however, that further statutory developments were needed there to be progress in this area.

Agreed: The Education Service would provide a briefing for the Commission on the Out of School Settings Project.

- 6.7 The Chair thanked officers for attending and responding to questions from the Commission.

7.0 Cabinet Member for Children, Education and Children's Social Care - Q & A

- 7.1 Relevant Cabinet members are invited to the Commission each year to respond to questions within their portfolio. Cllr Bramble, the Cabinet member for Children, Education and Children's Social Care attended to the meeting to respond to three policy areas identified by the Commission:

- A. To address how Covid-19 has impacted on the number of children being Electively Home Educated - and the arrangement that the Council has to ensure that these children are receiving an appropriate education and effectively safeguarded.
- B. With reduced oversight of children - how is the Children and Families Service working with local partners and the Local Safeguarding Children Partnership to help identify and support children at risk?
- C. How has Covid-19 impacted on the provision of extracurricular activities and what role can the council play to develop and improve young people's access to local sporting, cultural and other community resources as the pandemic eases.

- 7.2 The Cabinet Member firstly thanked everyone connected with children's education and children's services for all the support provided to local children and families throughout the pandemic. This included not only Council staff, but also the wider partnership and voluntary sector who had continued to provide

high quality services to young people despite the limitations and constraints of the pandemic.

Elective Home Education

7.3 The Cabinet Member reported the following in respect of Elective Home Education in Hackney:

- Since March 2020, 166 children have moved to EHE. This has had a significant impact on the service and how children and families are assessed and supported. Covid has restricted how these assessments have taken place. Assessments were generally taking approximately 12 weeks to complete. There were two staff in the EHE team (1.5 WTE) undertaking these assessments and signposting parents to help and support available. Information on EHE was also available on the council website.
- Parents were responsible for all on-costs of education including any private tutoring arrangements and any other teaching resources used. Some parents were under a misconception that these costs were funded by the Local Authority.
- 148 children were currently on the EHE Register and 24 had returned to mainstream education.
- A significant increase in referrals to EHE came in September 2020, with some parents continuing to home educate in response to the pandemic. As of December 2020, there were 289 children registered and receiving home education.
- Children and Families are assessed to ascertain if a suitable education is being provided through EHE. If the education is suitable, then an annual review is scheduled. If requirements are needed then more frequent checks are undertaken.
- Parents are still not required to register their children if they are EHE, so assessment and support can only be provided to those children and families known to the service,
- Whilst not suitable for all children, Children on a Protection Plan or Children in Need can be home educated.

Questions from the Commission

7.4 What support is available for parents home educating children with SEND?

- If a child has an EHCP, then those arrangements stay in place for the child.
- Information and guidance is provided to parents whose children who have SEND and are in EHE. It remains the case that it is the responsibility of parents to support children's needs, including SEND. There were home education support groups which can offer mutual support to parents.

7.5 Is there any further data on the demographic of children entering EHE? Are there any patterns or trends? Is there any association between increased uptake of EHE and increased household vulnerability to Covid?

- Although data was not to hand, it was noted that for many of the children that moved to EHE in September 2020 there was a household vulnerability to Covid, and therefore this presented a safer option.

- Some parents had enjoyed teaching their children at home in the lockdown and wished to continue.

Agreed: that further demographic data on those children in EHE to be provided to the Commission.

- 7.6 For children moving into EHE, is there any vulnerability assessment undertaken to assess if additional support may be needed?
- 79% of children and families assessed for EHE were identified as receiving a suitable education, with the 15% requiring improvement or for whom it was assessed that provision was not suitable.
 - Advice, guidance and information is provided to parents on effective EHE and there were support groups for families. It was reiterated that it was the responsibility of the parent to provide for all educational support and it was the duty of the LA to assess whether such support was 'appropriate' and 'effective'.
 - It should be acknowledged that both schools and the Education Service provide extensive support to parents throughout this important decision.
 - The Education Service holds a twice yearly conference to support parents who are home educating their children. This not only provides key information about effective EHE, but also provides an opportunity for parents to meet and develop their own peer support networks. A range of voluntary and community bodies were also able to support parents in EHE.

Children and Families Service

- 7.7 The Cabinet member outlined the response to the Commission's questions on improving surveillance and oversight for the Children and Families Service.
- The Cabinet member thanked the CHSCP for all its work in this area and in supporting local agencies and staff in providing effective safeguarding of local children.
 - CFS has been under intense pressure not only in relation to the pandemic, but also in responding to the cyber attack.
 - A key development from the pandemic has been the closer working relationship between CFS and the Education Service and oversight and support provided to vulnerable children and young people. The systems and structures created to support this will continue beyond the pandemic.
 - Young Hackney continued most of its offer on-line and so was able to maintain contact with local young people in need, particularly those with mental health challenges.
 - The Council operated a helpline during the pandemic for children and families to get information and signpost to support. It was important to ensure that experienced front-line staff were at hand during initial screening so that informed advice and support could be provided. This will help parents to get help earlier and in the least 'invasive' way.
 - The CFS was using the Working Together 2018 safeguarding framework to help frame assessments and ensure that these were holistic and captured the real lived experience of children and young people.

Overview & Scrutiny

- A dedicated Contextual Intervention Unit has been established to offer practical and pragmatic support for social workers.

Questions from the Commission

- 7.8 How does the Context Intervention Unit work across the CFS and the rest of the Council and partners (e.g. housing, education, parks)?
- The Context Intervention Unit mainly works with older children as their safeguarding risks evolve to factors outside the family home. The CFS is embedding this work across the service, but this is at an early stage.
 - The learning from the initial Contextual Safeguarding project was still being disseminated, and it was hoped that the principles of contextual safeguarding will soon be reflected in everyday practice.
 - There has been a contextual safeguarding training offer developed for staff.

Agreed: that an update on Contextual Safeguarding is taken as part of the CYP work programme for 2021/22.

- 7.9 Is there any data on which categories or groups of young people where referrals have decreased disproportionately?
- Most referrals to the Children and Families Service come through local education services, so there was a significant decline in the number of children from these age groups. To compensate for this, the CFS and Education Service worked together to develop a list of vulnerable children and ensure that they received regular contact and support.

At 21.58, the Commission voted to extend the meeting by 10 minutes to 22.10.

Extra Curricular Activities

- 7.10 The Cabinet member outlined the response to the Commission's questions on the impact of Covid 19 restrictions on extra curricular activities in schools.
- Whilst schools have worked hard to provide a balanced curriculum, it has been difficult with the requirements to maintain bubbles and social distancing requirements. Some activities such as breakfast clubs and after school clubs have continued.
 - Whilst many sports and team activities have been restricted, other physical activities have been taking place such as the daily mile challenge (around the perimeter of schools).
 - The School Music Team had been helping to migrate to an on-line tutoring system, though it was clear that music provision had been greatly reduced in both primary and secondary school settings.
 - School assemblies are generally on-line which does provide some collective experience for children throughout the pandemic and when schools have been closed.

Questions from the Commission

- 7.11 When the schools reopened in September a reduced curriculum was offered with fewer opportunities for extra curricular activities. What impact has this had on

young people who experience difficulties in accessing the main curriculum, such as those children with SEND or have lower attainment?

- Ensuring that schools remain Covid compliant was a priority for schools and this presented difficulties in offering extracurricular activities. Schools were also under pressure to help children catch up with learning lost during the lockdown.

7.12 What financial help is available for out of school clubs to ensure that these are available as lockdown eases?

- The Mayor and Cabinet member were aware that this sector needed financial support and would continue to lobby central government for additional funding for this sector. It was noted that health and safety requirements and other sundry costs were increasing pressures on school budgets which limited spending on other areas.

8.0 Child Friendly Borough - Cabinet Response

8.1 As part of its work programme for 2019/20, the Commission made a number of recommendations to support the Child Friendly Borough initiative, including improvements to future consultation and engagement with children and young people. The Cabinet response to these recommendations is contained within the link to this agenda. It was noted that all recommendations had been agreed.

8.2 The Commission also highlighted a number of developments which would now take place as a result of its work to support a Child Friendly Borough:

- The Communications and Engagement team were developing a toolkit to improve consultation and engagement with children and young people across the council.
- The Statement of Community Involvement (a planning document which sets out how developers must consult and involve the local community) will now include specific guidance on how to involve children and young people in planning decisions as a result of recommendations of this Commission.

9.0 Work Programme

9.1 The Commission noted the work programme for the remainder of 2020/21.

10.0 Minutes

10.1 The minutes of the last meeting held on 7th December are contained within the report pack. Actions arising from the last meeting:

- The Commission has drafted a response to the Child Friendly SPD proposals which were presented at the meeting on the 7th December and submitted these to the consultation. This will be published in the next agenda (8th February)

- In relation to discussions around Childhood Poverty, further information is being prepared for the Commission on the Discretionary Crisis Support Grant in readiness for the next meeting on the 8th February.

11. Any other Business - Directorate Updates

11.1 The date of the next meeting was the 8th February 2021.

The Meeting concluded at 22.10.

Item 6b Action from CYP Scrutiny Commission on 12th January 2020

CHSCP Annual Report 2019/20

Responses to written questions from CYP Scrutiny

- 1. To improve accountability, the Safeguarding Partnership is considering requiring partner agencies to complete Annual Child Safeguarding Statements. How will these plans be published, and will there be opportunities for these to be tested or challenged?**

Our emerging thinking is that organisations will be required to undertake a safeguarding risk assessment to determine their strengths and areas for improvement against a set of minimum standards. This will be similar to our existing Safeguarding Self-Assessment process.

On completion, organisations will produce their Child Safeguarding Statements. There will be an expectation that organisations publish these themselves and make them available for the public. This could be via a website or printing hard copies that can be seen or sent to anyone using their services.

There will be opportunities to test and challenge content. The process for doing this will mirror some of the arrangements we currently have in place, such as through peer reviews, auditing and dip-sampling, but is also likely to form a key function of the Independent Child Safeguarding Commissioner and his role as our local independent scrutineer.

- 2. To what extent have local 'Relevant Agencies' (who then have a duty to comply with child safeguarding requirements) cooperated with the local Child Safeguarding Partnership? Are there any local compliance issues in any sectors?**

We have a good level of cooperation from the vast majority of organisations in Hackney. As set out in the Annual Report, our main concern relates to the continued difficulties in establishing any oversight of safeguarding in the Unregistered Educational Settings sector – namely yeshivas.

- 3. What testing and challenge has the Child Safeguarding Partnership provided for virtual assessments developed by Children and Families Service and other children's services to ensure that they are robust and help to safeguard local children? How is the Partnership disseminating information and best practice about virtual assessments across local agencies working with children and young people?**

A range of relevant Covid-19 guidance developed by Hackney CFS has been reviewed by the CHSCP as part of its Contingency Oversight Planning Meetings developed after the first lockdown. This includes visit guidance and guidance for virtual CP Conferences. The visit guidance outlines that all newly allocated assessments will include at least one face to face direct visit except in exceptional circumstances- so assessments will be through a blended approach to contact with

the child and family. Whilst the CHSCP has not reviewed the quality of these assessments, they remain subject to the management oversight and internal audit processes by Hackney CFS as per usual.

- 4. The Ofsted inspection highlighted the need for earlier involvement and improved information sharing from safeguarding partners (in particular from the Police) in child protection discussion and decision making. Has any improvement been seen in the engagement and involvement of the Metropolitan Police over the past 12 months?**

Through both the catalyst of the inspection and the need for partners to work differently as a result of Covid-19, there has been good engagement in the context of virtual meetings, such as strategy discussions. The CHSCP recently launched a multi-agency protocol on strategy discussions and this is intended to help drive the expectations on information sharing and engagement further. Available [HERE](#)

- 5. Effective safeguarding of children is dependent on effective partnerships not only amongst professionals but also with the community. The Commission has received reports which note that social care intervention rates are disproportionate for some groups of local children, particularly with children from Black Caribbean and some other minority ethnic backgrounds. What work has the Safeguarding Partnership undertaken in relation to combat racial inequality and to support cultural competence in assessing safeguarding risks and assessments?**

The Independent Child Safeguarding Commissioner and CHSCP partners are alive to this issue. In 2020, the ICSC engaged with HCVS and representatives from the voluntary sector to talk about this very issue following the death of George Floyd and the BLM protests. A follow up session has been scheduled.

More recently, the CHSCP has agreed to scrutinise the anti-racist position statements and training provisions of Partner organisations at its Executive meeting scheduled for 9 February 2021. The safeguarding self-assessment process will also be adapted to include reflection upon and evidence of action to address this issue.

Furthermore, two recent Reviews one a published SCR and the other an ongoing Safeguarding Practice Learning Review will be used to help identify and respond to key safeguarding practices, evidence of bias (unconscious or otherwise) and specific community needs and concerns.

- 6. How is funding for Child Safeguarding Partnership determined and apportioned between partner agencies - is there a national formula?**
- 1. How does funding for the Child Safeguarding Partnership in City & Hackney compare to neighbouring boroughs?**
 - 2. For transparency should individual contributions from partner agencies be included in annual reporting?**

There is no national formula to determine funding. At present, it is a complicated and mixed picture and comparisons are difficult to make. Some agencies provide

funding determined locally, others where contributions are agreed on a pan-London and some on a national level. Partnership contributions for the CHSCP have remained the same as they were under the CHSCB arrangements, with the exception of CAFCASS, that has withdrawn contributions nationally.

The CHSCP committed to review funding following the launch of the new arrangements in September 2019. Covid-19 has delayed this work. Sir Alan Wood is currently undertaking Phase 2 of his review into safeguarding arrangements and the inconsistency of this has been flagged as an issue for him to consider.

Overview & Scrutiny

Children & Young People Scrutiny Commission

Date of meeting: 12th January 2021
Title of report: Post-meeting additional information
Report author: Chris Roberts, Head of Wellbeing & Education Safeguarding
Authorised by: Annie Gammon, Director of Education
Brief: In the Scrutiny Commission meeting on the 12th January 2021 officers undertook to provide the Commission with additional information in relation to a) the demographic profile of the elective home education cohort and b) an update on the Out of School Settings project. This report provides this additional information.

Report to the Children & Young People Scrutiny Commission

Report title: Post-meeting additional information

Meeting date: 12th January 2021

Report originator: Chris Roberts, Head of Wellbeing & Education Safeguarding

1. Purpose of the report

- 1.1. To provide the scrutiny commission with additional information in relation to a) the demographic profile of the electively home educated cohort in Hackney and b) an update on the Out of School Settings project.

2. Recommendations

- 2.1. Commission members are asked to note the additional information.

3. Demographic profile of electively home educated children in Hackney

- 3.1. At the time of writing this report there are 262 electively home educated children and young people known to Hackney Education.

- 3.2. Of these 125 (47.7%) are male and 137 (52.3%) are female.

- 3.3. The children and young people are in the following National Curriculum years:

■	Years R-2	38
■	Years 3-6	90
■	Years 7-9	78
■	Years 10-11	56

- 3.4. The children and young people are from the following ethnicities:

■	Asian	6	(2.2%)
■	Black	71	(27.0%)
●	Of these:		
○	Black Carribean	38	
○	Black African	26	
○	Black Other	7	
■	Mixed	25	(9.5%)
■	Other	7	(2.6%)
■	White	80	(30.5%)
●	Of these:		
○	White British/Irish	32	
○	Irish Traveller/Gypsy Roma	29	
○	White Other	19	
■	Not recorded	73	(27.8%)

- 3.5. There are 13 children and young people with EHCPs (4.9%)

4. Update on the wider work of the Out of School Settings project

- 4.1. Engaging with the Orthodox Jewish community in relation to safeguarding arrangements in unregistered education settings or Yeshivas is one strand of the work undertaken as part of the Out of School Settings project.
- 4.2. This piece of work is still at a preliminary stage where we are looking to develop a relationship with the leaders of Yeshivas. This will focus on ensuring each Yeshivas has an appropriately trained safeguarding lead and Hackney Education is able to assure itself as to the safety of the children who attend.
- 4.3. Interlink brokered an initial meeting between senior managers at Hackney Education and a representative from the Yeshivas, which took place early in January 2021. From that meeting a proposal is being developed and a further meeting will be arranged for February 2021.
- 4.4. The project also covers two other strands of work, which are underway and currently are the primary focus for the project. These currently form the majority of the project's work.
 - The first was to gain a better understanding of safeguarding arrangements in out of school settings by enabling them to undertake their own self-assessment, which would assist them in identifying areas for development.
 - The second was the development and launch of an online safeguarding portal for out of school settings which would provide free access to training, advice and guidance.
- 4.5. The focus of the projects work in the first phase was to develop, in partnership with the City & Hackney Safeguarding Children Partnership (CHSCP), the online self-assessment tool. This was distributed to out of school settings by email or letter in early October, with a submission deadline of 30th November 2020.
- 4.6. The return rate by the deadline has been disappointing with only 6% of settings returning their self-assessment. Most of these self-assessed as either fully or partially meeting the strands within the tool.
- 4.7. However this is a new area of work and the project shows that some settings are willing to engage with the safeguarding self-assessment process and develop action plans.
- 4.8. The return rate settings the deadline for submission has been extended until the 31st January and a reminder email or letter has been sent to settings requesting that the self-assessment be completed and returned. Settings will also be contacted by phone.
- 4.9. An initial analysis of the returns and follow up work with settings has identified the following in respect of the return rate:
 - A few sectors/settings sought a more contextual and nuanced approach, for example Scouts and Girl Guiding organisations requesting returns done on a regional basis as opposed to group by group basis.
 - The impact of COVID 19 as some out of school settings have either closed down or remained closed since March 2020.
 - There has been no contact from the large denominational churches, and little contact from the smaller and independent churches.

- This is also the case for other types of out of school settings such as privately owned/run clubs

- 4.10. An interim report was presented to CHSCP in December 2020. Further follow up and analysis will take place over the Spring term with the next report scheduled to be presented to CHSCP in May 2021.
- 4.11. In parallel work is also underway to develop an online portal to act as a one stop shop for out of school settings. This will provide settings with access to safeguarding guidance, good practice and training, including pre recorded 'live' safeguarding training that settings can access.
- 4.12. The portal is being designed in collaboration with other safeguarding partners to ensure it is comprehensive and has had input from Children's Social Care, the Contextual Intervention Unit and the PREVENT Education Officer.
