

**Skills Economy and Growth Scrutiny Commission**22<sup>nd</sup> October 2018**Economic Growth and Transport**

Item No

**4****OUTLINE****Economic Growth & Transport**

This theme discussion will cover the importance of the transport system in supporting economic growth. How transport can impact the growth of businesses and connectivity to work - the ability of a resident to take advantage of work opportunities.

**The Panel**

- Chair of Commission
- Transport for London
- London Borough of Hackney
- RMT Union.

<b>Question</b>
1. How important is transport in supporting a growing local economy and local regeneration work?
2. What challenges does the changing patterns of transport pose to economic growth - specifically, the uptake in Mobility as a Service (MaaS) transport i.e. Uber etc. Transport that is putting people back onto the roads, causing an increase in congestion and a slowing down of travel times. Is there any data on this?
3. What transport infrastructure or services are needed to ensure the local economy can thrive and continue to support growth at all levels of employment?
4. In relation to any proposed or current consultations. How do you plan to engage residents, community groups and other relevant stakeholders beyond normal means of consultation?
