

Skills Economy and Growth Scrutiny Commission 22 nd October 2018 Capacity and Connectivity	Item No 6
---	---------------------

OUTLINE

Capacity & Connectivity

The discussion will cover capacity and connectivity taking into consideration the changes to bus routes and the management of stations and interchanges in relation to passenger numbers. Looking at the ability of Hackney's transport system to respond to the growing numbers of passenger/commuters following the growth of the local economy e.g. Hackney Downs, Dalston, Clapton and Hackney Wick.

The Panel

- Chair of Commission
- Transport for London
- London Borough of Hackney
- London TravelWatch
- RMT Union
- Social Eyes and Disability Backup

Question
1. How do TfL make decisions about changes to bus routes? What factors are taken into consideration and what factors are excluded?
2. What policies do TfL have in place to support the delivery of zero carbon connectivity for transport?
3. What is the maximum capacity level before TfL decide further investment is needed in the transport infrastructure?
4. The Council recently carried out a bus service consultation what was the outcome of this consultation?
