Dear Cllr Hayhurst

Re: 2019-2020 Work Programme for Health in Hackney Scrutiny Commission

Thank you for your letter on the above dated 31 May 2019 and apologies for the delay in replying.

I have discussed this internally, and suggest the following items for ongoing input and scrutiny from this committee.

1. CAMHS Transformation (*this has been to CYP Scrutiny commission so may be best placed to return there, or to a joint commission*).

A range of new investment and interventions are in place as part of national and local transformation, in order to complement our CAMH services with earlier identification and work with universal partners (i.e. schools). We also want to strengthen our support for specific groups with high need – i.e. LGBTQ and YBM groups.

2. Mental Health. There are a number of significant 2019-20 mental health developments taking place which will inform the redesign of services:
 - High Intensity Users of A&E and LAS services – the piloting integrated pathway involving acute, mental health services and wellbeing services.
 - Personal Health Budgets are being piloted as part of the ELFT discharge pathway
 - Recovery Care Plans as a standardised part of the ELFT discharge pathway (ELFT CQUIN)
 - City and Hackney, alongside Newham and Tower Hamlets, have also bid for NHSE funding to re-shape mental health provision in Primary Care Neighbourhoods. As part of the bid process we have re-designed our mental health Enhanced Primary Care services to provide a more comprehensive neighbourhood offer.
3. Immunisations
Building on the recent measles outbreak response, we are committed to increasing uptake of immunisations and vaccinations across all communities. Political support

and championing of this agenda is key in supporting this, and giving weight to our ongoing dialogue with NHS England on effective commissioning arrangements.

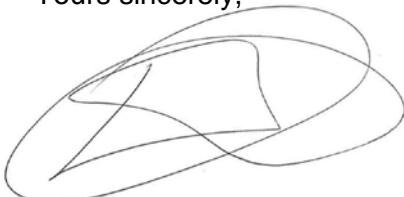

4. Using Neighbourhoods to address wider determinants.
We know that health and care services only make a small (10%) contribution to people's health outcomes. The neighbourhoods provide a structure for effective engagement with wider community partners to take a place based approach to improving health and wellbeing. The NHS Long Term Plan puts further emphasis on delivering support for people at a 30-50000 neighbourhood population through Primary Care Networks and work is underway on redesigning community services including social care. Significant progress should be made by ELFT, Confed and Homerton working in partnership with wider CCG and London Borough of Hackney colleagues over the course of the year and the commission may wish to scrutinise progress and pace of change.
5. Work to understand and tackle increasing A&E attendances including CYP
A&E attendances have increased outside of population growth in the last year. This is across a wide range of ages and conditions, including for children and young people. We are undertaking analysis and engaging with local residents to understand this, and developing plans to try to better support people through community services where possible.
6. Estates
To review the emerging plans for the City and Hackney public estate and how these plans are supporting our delivery models for health and social care services.

In addition, it would be helpful to continue with general Integrated Care Workstream updates along with updates from the Integrated Commissioning Board enabler groups.

I hope that's useful and I am looking forward to continuing to work closely with the commission over the coming months and years.

If you would like to discuss or ask me to think again on areas of focus, then I will be happy to do so.

Yours sincerely,

David Maher
Managing Director
NHS City and Hackney Clinical
Commissioning Group
