- 2.2 The Scorecard provides a quarterly overview of the Council's Corporate risks, along with a selection of leading Directorate risks (to ensure a comprehensive overview is provided). These are assessed in advance of each Audit Committee meeting and after being ratified by HMT, are updated accordingly. There is sometimes as little as two months between updates which means that scores can remain static for periods of time. This is not a reflection of a lack of dynamism within the approach, but rather the fact that high level scores are unlikely to change dramatically within short spaces of time. New risks are regularly incorporated into the Corporate Register and will always be marked as 'new'. The Scorecard will contain clear reference as to the movement (of the score) of the risk, and clarity as to the exact nature of the risk (whether it is of an internal or external nature to the Council).
- 2.3 In terms of this latest iteration of the (Corporate) register, there are 13 red risks and 10 amber risks. Clearly, numerous external events and influences are having a considerable impact on the Council's objectives, whether budget cuts, security breaches, or political upheaval (notably Brexit, and the increased chance of elections, new legislation, interest rate changes). Two new risks have been escalated to Corporate level in the last four months. The first concerns the creation of new companies within the Council, reflecting the fact that there are risks attached to these new companies (Housing, Energy and Waste) being brought into existence. The second new risk concerns Insourcing, and the way in which the Council needs to handle its approach to this.

Brexit continues to have a major influence on risks throughout the Council. Since last reported on, there have been numerous developments and votes relating to the potential of a final deal, or failing that, there being no deal. Now, with the final deadlines (October 31st) approaching, we are still awaiting clarity on whether there will be an extension, a deal, a general election or no deal (although at the time of writing, this would seem to contravene a new law passed on September 9th.) Clearly, the nature of any deal (or lack of one) will impact on the future work of the Council so the risk remains very highly rated whilst we await some clarity on exactly what will be agreed.

Some risks have remained red with no change – this score reflects the continued severity of both the impact and likelihood of the risk. For example, financial cuts (and their effects) are likely to remain a significant risk, simply because they will always have a high impact on service delivery, and in the light of the current economy the chances of this continuing remain very probable. However, even in the light of this continued red rating, the controls should still be able to provide assurance that the risk is being managed so far as is possible, and that the Council is taking appropriate action to best position itself in the light of challenging circumstances. Areas which are alluded to in the Corporate register, such as Integrated Commissioning and major programmes like Britannia, have their own separate registers going into much more detail with regards to all areas of risk.

In addition to the Corporate risks, the Scorecard also contains a selection of other major risks within the organisation. This assorted selection will usually be pulled from Directorate level and assist in providing an improved overview of risks around the Council, which don't necessarily always get escalated to Corporate level. This extra level of risks was requested by Committee and will usually be comprised of high scoring areas which have previously been on the Committee's radar, or areas of general importance (which may be on the threshold of being escalated to the Corporate Register). This should assist in providing an even more comprehensive overview.

3. FUTURE REPORTING TO AUDIT COMMITTEE

3.1 The reporting of the Corporate risks to Audit Committee will continue at future meetings, on a quarterly basis. With twice yearly updates of the full Corporate Register, the next one is scheduled for January 2020, so the full details on all risks will be provided then.
