

### Hackney's Night Time Economy Summit

London's Night Time Economy (NTE) is a major contributor to London's economy. The growth of Hackney's evening and night time leisure economy has contributed to the economic growth in Hackney and is key in making Hackney a vibrant and fashionable place for people to live, work, visit and locate their businesses. The night time economy and culture can help bring town centres to life and create new jobs and leisure activities for local communities and visitors. The desire is to achieve a diverse night time economy that meets the needs of residents, businesses, workers, customers and is a sustainable economy.

**The Skills Economy and Growth Scrutiny Commission** is hosting a discussion to talk about the future of the Borough's night time economy. This will be a space for residents, businesses and those that manage the night time economy to come together and talk about what action needs to be taken to implement the Council's vision. We will be joined by the Cabinet Member with lead responsibility for the night time economy **Cllr Caroline Selman, Cabinet Member for Community Safety, Policy and the Voluntary Sector**.

We will be coming together to talk about the following areas:

- Creating an Inclusive Night Time Economy
- Creating a Sustainable Night Time Economy
- Jobs in the Night Time Economy.

The Council has been working on its vision for the night time economy. In addition to this there has been a number of changes such as a review of their licensing policy, introduction of the late night levy and development of the new Local Plan (LP33 key strategic planning document used to direct and guide development in the borough up to 2033). All these changes have contributed to the council's work in developing its vision for Hackney's evening and night time leisure economy.
