

## Draft Health and Wellbeing Strategy Consultation Questions

We're consulting on Hackney's new Health and Wellbeing Strategy for 2022-26, a plan showing our approach to reduce health inequalities and improve the health of people who live and work in Hackney. This will set out the health and wellbeing priorities over the next four years.

This Strategy does not reflect all the work we will do to improve health and reduce health inequalities in Hackney: many other actions and activities will continue or start.

We are proposing that our Strategy should focus on three priorities: mental health, social connection and financial security. To read the draft strategy in full please see [\[link\]](#) or [contact](#) to receive a paper copy.

These priorities have been developed through a three month engagement phase, with residents and wider stakeholders, where we asked what we should focus on in our new Health and Wellbeing Strategy. We spoke to over 650 residents and organisations during this period in a range of different ways - through interviews, workshops, completion of paper surveys, meetings with organisations, visiting community groups and focus groups. You can find more information in the engagement report [here](#).

We would value your views on these three suggested priorities to ensure they make a real and sustainable difference to the health and wellbeing of Hackney's residents.

Feedback from this consultation will be used to help develop an action plan.

You may have given your views in 2021 about health and wellbeing, to help shape this Strategy. If you raised something as part of that, and it's not covered here but you would still like it raised - please get in touch with...[insert link](#)

This survey will take approximately 10-15 minutes to complete.
