Tracey Fletcher Chief Executive Homerton University Hospital

NHS Foundation Trust

Tim Shields Chief Executive London Borough of Hackney

1. Welcome, Introductions and Apologies for Absence

- 1.1. The Chair, Dr Mark Rickets, opened the meeting.
- 1.2. Apologies were noted as listed above.

2. Declarations of Interests

- 2.1. The City Integrated Commissioning Board
 - **NOTED** the Register of Interests.
- 2.2. The Hackney Integrated Commissioning Board

NOTED the Register of Interests.

3. Questions from the Public

- 3.1. There were none.
- 4. Minutes of the Previous Meeting & Action Log
- 4.1. The City Integrated Commissioning Board
 - APPROVED the minutes of the previous meeting.
 - **NOTED** the action log.
- 4.2. The Hackney Integrated Commissioning Board
 - APPROVED the minutes of the previous meeting.
 - **NOTED** the action log.

5. Anchor Alliance Update

- 5.1. Jonathan McShane introduced the item. Due to an emergency on the part of the attendees expected to present this item, detailed consideration would be deferred until the next ICB in June.
- 5.2. Jake Ferguson asked if organisations in HCVS would be included in this. Jonathan McShane responded that they would. Jake Ferguson responded that he would, in the first instance, nominate himself as the named person in HCVS to engage with this work.
- 5.3. Honor Rhodes was concerned that co-production and patient representation was insufficiently represented in this work. Jonathan McShane responded that he would feed this back to Renaisi.
- 5.4. Dr Sandra Husbands added that there was a missing element of adding social value. This was not just about jobs and training, and should be fed into what we did locally and our values in interacting with the community around us. Jonathan McShane agreed that we could learn from partners who have done work in this area and he would feed this back.
- 5.5. Sunil Thakker added that there was a NE London procurement committee and he was interested to see how financial governance teams could feed into this. Jonathan McShane stated that he would meet with Sunil on this matter.
- 5.6. The City Integrated Commissioning Board
 - NOTED the report.
- 5.7. The Hackney Integrated Commissioning Board
 - NOTED the report.
- 6. Update on ICPB and NHCB Terms of Reference

- 6.1. Sunil Thakker provided an update on the financial context of this work. We were now operating as NE London CCG, and our contracts and financial commitments had been transferred to NEL CCG.
- 6.2. Haren Patel added that City & Hackney had historically been good at implementing new changes and innovation, and asked if there was a risk that this could be lost if we became a single organization. Sunil Thakker responded that the budget for the ICP was consistent with what had been allocated previously. We also had strategic enablers who had financial allocation. Henry Black added that our goal was levellingup, not levelling-down.
- 6.3. Jonathan McShane provided a further introduction to the item. He noted that the terms of reference would be reviewed in six months after operating and this should be viewed as a transitional document.
- 6.4. Charlotte Harpin introduced the presentation. She noted that the ICPB would still operate on a committee-in-common model, and whilst it would not formally function as a singular committee, it would still have conversations which would similar to those that take place in formal committees. The differences from the ICB arrangements would be minor, however there would be more of a focus on partnership working as opposed to a commissioner focus under the ICB.
- 6.5. Randall Anderson raised the matter of formal delegation of funding; it would be helpful to have more clarity around this as it related to the means by which the ICPB would take decisions. Charlotte Harpin responded that there was ICB, ICP and local authority funding streams the framing of ICP budgets / ICP delegations was slightly inaccurate however it reflected the approach of integrating plans and priorities. Randall Anderson responded that in the transition period we needed to be clear about which organisations were taking which decisions.
- 6.6. Haren Patel added that the ICPB terms of reference was slightly lacking in terms of reference to clinical leadership, and he would pick this up outside the meeting.
 - Cllr Kennedy asked if a one-page document could be produced that would explain what decisions would be taken where in an accessible format for members of the public. Action for Jonathan McShane.
- 6.7. Jon Williams added that we needed to keep talking about public understanding of the changes taken place. We also need to keep bringing back discussions on the relationship between clinicians, management and the public. He also asked where the link to the Nolan principles were in this document. Charlotte Harpin responded that the Nolan principles were part of the NEL CCG governance and they were embedded in everything that occurs across the CCG and was not board-specific.
- 6.8. Gary Marlowe felt it was important that we treat the ICPB as if it were a legal entity as this would enable us to feel more confident in our roles and enable us to take better decisions and argue our position better.
- 6.9. Charlotte Harpin also added that part of the purpose of the forthcoming governance manual would be maintenance of corporate memory.

- 6.10. Marianne Fredericks noted that the membership of the committees was at odds with the current terms of reference as the current terms of reference required one member to be the chair of the Health and Wellbeing Board this member was not required to be a member of the Community & Childrens' Services Sub-Committee.
- 6.11. Tracey Fletcher added that whilst we needed to be clear about how the ICPB and NHCB relate to each other, we needed to think about this in the context of how those boards would inter-relate and which ones would take which responsibility. Otherwise, there would be a danger of duplication of work. Charlotte Harpin responded that this would be tested in the next six months.
- 6.12. Gary Marlowe added that we needed to be clear about the difference between delivery decisions and strategic decisions. Tracey Fletcher added that we needed to establish clarity on the difference between decision-making and approval mechanisms and business-as-usual delivery. The ICPB should seek assurance that vision is being enacted upon and that this fit with the overall financial sustainability envelope. The detail could be better fleshed-out elsewhere.
- 6.13. Mark Rickets added that the area committee would likely not meet outside of the ICPB and that is where it would transact its work.
- 6.14. Haren Patel added that clinical representation was not just about numbers of clinicians on boards but also the meaningfulness of the representation.
- 6.15. Cllr Kennedy added if the ICPB making recommendations to the Health and Wellbeing Board also worked the other way.
- 6.16. Ida Scoullos asked if the future manual would include reference to the public. Jonathan McShane added that there were a number of fora through which this would happen, such as: the people and place group and the HCVS assemblies. However he noted that the manual could include more of a reference to this.
- 6.17. Tracey Fletcher added that this board would seek assurance on programs to ensure that responsibilities around co-production, etc. had been appropriately discharged.
- 6.18. Mark Rickets highlighted the nomenclature with regard to the Chairing arrangements as he was not, technically speaking, a Borough Chair as the City of London was not a borough. Charlotte Harpin responded that this would be reflected in the future terms of reference.
- 6.19. Jonathan McShane summed up, noting that there would be a one-page document produced which would explain to the public how this was all would affect patient services. Today's feedback had been especially helpful, and he invited members to comment if they had any further comments.
- 6.20. The City Integrated Commissioning Board
 - NOTED the report.
- 6.21. The Hackney Integrated Commissioning Board
 - **NOTED** the report.

7. Finance Update

- 7.1. Sunil Thakker introduced the item. Our initial submission of the operating plan forecast a break-even position with a financial gap of £22m.
- 7.2. Ian Williams noted that a final financial position would be taken to the Council in June. The financial position had been affected by the recent cyber-attack. We were also expecting announcements on funding from government for other parts of the public sector.

7.3. The City Integrated Commissioning Board

NOTED the report.

7.4. The Hackney Integrated Commissioning Board

• **NOTED** the report.

8. Workstream Risk Registers

- 8.1. Matthew Knell introduced the item, noting the position of the workstream risk registers.
 - > Jon Williams asked if there were any more resources going into the CAMHS risk and requested an update on this risk be brought to the next meeting.
- 8.2. Rachel Tomlinson added that the new structures provided an opportunity for us to reevaluate how risk was reported. The ICPB would focus on risks that impacted on the system and sustainability of the system.
- 8.3. Honor Rhodes noted that we needed to have more consideration of childhood self-harm and adolescent self-harm.
- 8.4. Cllr Kennedy congratulated the CYPMF team on maintaining the childhood immunisations risk, as there was a real danger of this score increasing during the pandemic.
- 8.5. Tracey Fletcher also noted that the board would need to consider what it wanted to see in order to be assured that we were moving forward on strategic objectives. The current risk registers were very operational in focus.
- 8.6. Tracey Fletcher also noted that we need to reach a point where we were pulling things together as a system rather than retaining an approach based on individual organisations maintaining and managing risks individually.

8.7. The City Integrated Commissioning Board

• **NOTED** the report.

8.8. The Hackney Integrated Commissioning Board

• **NOTED** the report.

AOB & Reflections

- Mark Rickets noted that this was Anne Canning's last meeting and thanked her for her contributions to the City & Hackney system and wished her well in all of her future endeavours.
- Honor Rhodes added that the local outbreak board had a lot of interesting and rich thinking, and some of the energy from that meeting could be well-used within the ICPB as well.
- Cllr Kennedy noted that in-person meetings had been re-started at the London Borough of Hackney and noted that he was looking forward to seeing all attendees in person at some point in the future.

City and Hackney Integrated Commissioning Programme Action Tracker

Ref No	Action	Assigned to	Assigned date	Due date	Status	Update
ICBFeb-2	Ian Williams to bring back a report on the 2021/22 budget to a future ICB	lan Williams	11/02/2021	Jun-21	In Progress	On forward planner for July ICB.

Title of report:	rt: City and Hackney Anchor Collaborative – ICB Update	
Date of meeting:	10 th June 2021	
Lead Officer:	Jonathan McShane	
Author:	John Hitchin, Renaisi	
Committee(s):	City & Hackney ICB 13 May	
Public / Non-public	Public	

Executive Summary:

This is a presentation for information, and not a formal report.

This presentation deck gives an update about the work of the City and Hackney Anchor Collaborative, and its progress in working with colleagues across the local system on two streams of work: shared apprenticeships and procurement practices. It highlights the key successes of that work, and underlines the ambitions of the work is to build collaboartive practices. The streams of work are of value in their own right, and as models for furthering joint working in other areas.

Whilst the last year has slowed down progress compared to our ambitions, there remain positive developments and also much greater knowledge about what conditions support collaboartive practice. To continue to move this on, we conclude with an request for senior endorsement, which will be sought outside of this meeting.

Recommendations:

The City	/ Integrated	Commiss	sionina	Board	is a	sked:
----------	--------------	---------	---------	--------------	------	-------

• To **NOTE** the report.

The **Hackney Integrated Commissioning Board** is asked:

• To **NOTE** the report.

Strategic Objectives this paper supports:

Deliver a shift in resource and focus to prevention to improve the long term health and wellbeing of local people and address health inequalities	The purpose of the collaboartive is to encourage new ways of thinking and working across 'back-office' functions which can both shift resource, and point that functions at health and wellbeing prioritise of City and Hackney residents.
Deliver proactive community based care closer to home and outside of institutional settings where appropriate	
Ensure we maintain financial balance as a system and achieve our financial plans	

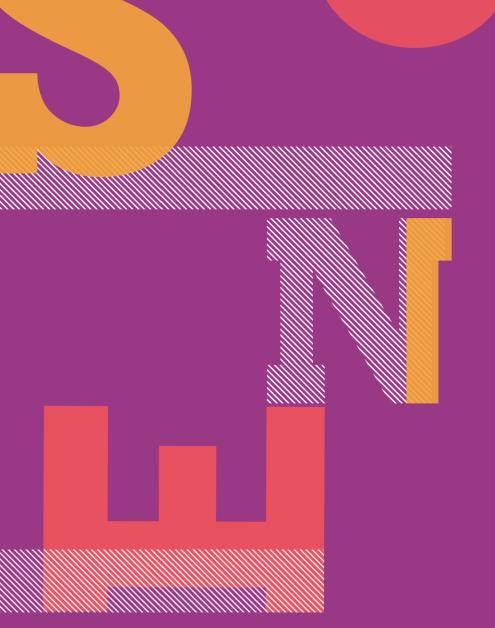

Deliver integrated care which meets the physical, mental health and social needs of our diverse communities	
Empower patients and residents	
Specific implications for City	
None	
Specific implications for Hackney	
None	
Patient and Public Involvement and Impa	nct:
<u></u>	nd patient perceptions of service providers, and
Clinical/practitioner input and engageme	nt:
None – we are working with procurement a	and workforce/HR colleagues.
Communications and engagement:	
	officers at this stage, many in roles which are g.
Comms Sign-off N/A	
Equalities implications and impact on pr	iority groups:
The projects being developed are explicitly groups, and this is a core theme for the wo	considering their potential for impact on priority ork.
Safeguarding implications:	
None	
Impact on / Overlap with Existing Service	es:

There is no immediate impact on existing service provision. However, the intention of this work is that it explicitly encourages colleagues across the system to think about overlaps in their roles in relation to other organisations. As this develops we will be using the learning from this work to encourage a greater degree of shared working and practice.

City and Hackney
Anchor Collaborative
ICB Update

May 2020

What is it?

- The central idea of the Anchor Collaborative is that City and Hackney's biggest institutions can collaborate to use their resources to tackle inequalities and build an inclusive local economy.
- Building from international and national practice, we want to support individual anchors to
 work on practical projects with others so that their institutional functions (procurement, assets,
 workforce, investments etc) can be leveraged for health and economic impacts.
- We believe that working across a place-based system allows for learning, and projects that have greater impact than if organisations did this work on their own.
- Renaisi initiated this work, and it explicitly builds on our social purpose as a Hackney-based social enterprise. We see our role as facilitator, coordination and system support.

Definitions

An **anchor organisation** is typically – though not exclusively – not for profit organisations that are based in a city or town and are unlikely to move location, usually because their purpose and mission is intrinsically bound up in that area. They are also often one of the major players in the local economy, and can use this economic power to create wealth and improve opportunities for the people in that place.

An **anchor collaborative** is a formal partnership of anchor organisations that share a common geography, and have clearly defined, collective, objectives that guide their work. They are often supported by a trusted independent organisation that helps to facilitate the work, and this role is typically funded by a philanthropic partner.

Community wealth building is an approach to local economic development which prioritises benefits to the local economy and community. Anchor organisations have an important role within community wealth building as the most stable and significant local economic actors.

In City and Hackney the anchors that have been directly engaged are: Hackney Council; the CCG; ELFT; the GP Confederation; City of London Corporation; and Homerton Hospital.

There have also been conversations with a wider range of local and London wide stakeholders about the work, including Peabody, Barts NHS Trust, local projects in Hackney (e.g. the Improving Outcomes for Young Black men initiative, the Sport England pilot); public health teams, Citybridge Trust, the Museum of London, the North East London Commissioning Support Unit and many others.

Our ambition: Four roles for the collaborative

Facilitate relationships

The key role that we have been working on so far is the building of bilateral relationships, and then facilitating multi-lateral relationships on thematic issues. We strongly believe that collaboration and cooperation happens in practice not theory.

Use data and targeting

We are looking at ways to build common approaches to thinking about certain data points in the work, as this is essential to drive activity. Each organisation will have its own strengths, but there is a role to think collaborative-wide on resources, spend, pipeline of roles, recruitment, investment etc.

Push innovations and new ideas

We have not done any work on this role yet, but it is a key part of collaboratives in other places and is of interest to partners. Physical regeneration or new developments can often be the hook.

Independence and accountability

Each anchor in City and Hackney is already considering their role as an anchor. A collaborative is about a different kind of leadership, and we believe that an independent actor can have a significant value in terms of driving accountability and seeking resource.

Initial learning by the start of COVID

Our conversations and research have highlighted that there are different ways to lead this work, and leadership is key:

Led by place: the starting point here is to ask what the unique conditions of the place are – whether that is borough level or a more specific area within the borough

Led by strategy: this approach begins with different core functions (e.g. procurement, HR, finance) and has been out starting point – see right.

Led by cohort: this approach explores what all core functions of an anchor organisation could do to have a measurable impact on a particular group of people, for example, young people or low-income residents.

Led by opportunity: this approach starts by exploring what opportunities there are to apply community wealth building strategies. This might be the development of a new hospital, for example, or an upcoming procurement which has the potential to be used as a test bed for new thinking.

Led by challenge: this approach starts by exploring what the common 'pain points' are across the anchor organisations and developing collective approaches to tackling these. A common challenge that has been identified is the high cost of temporary / agency workers.

In terms of practical work, we have pulled together two thematic groups:

Procurement: procurement leads from all the anchor organisations are now engaged and we have had briefing calls with each one. We have asked each lead to share some data in advance of a themed workshop on the value of their current expenditure within the City and Hackney postcodes and share any existing social value or sustainable procurement policies. Once the Covid 19 pressures have eased, convening this group and running a development workshop that builds on this material and looks for opportunities across the anchors to collaborate will be a priority.

Workforce: workforce leads across the anchor organisations have also been identified, and we will run a similar development workshop exploring what opportunities workforce, as an anchor strategy, might present. We will work with the leads from each anchor to bring together data on their current workforce as a starting point.

We have captured learning through a series of blogs and an interim report, report, published on Renaisi's website.

RENAIS

Where we are now – May 2021

The team so far have agreed the following elements regarding a potential shared role **apprenticeship** scheme.

- The creation of a multi-organisation apprenticeship role.
- A management role might be most suitable for anchor organisations and the three best options were a Level 6 PMO, Level 5 Ops manager or Level 6 Chartered manager
- The apprenticeship is likely to target people with some existing experience as an upskilling opportunity
- The aim is to have a common start date / month for the cohort. There are no set timescales.
- Funding is still to be agreed but one option discussed was that each anchor would have the same number of people / placements, so they would each fund their own staff, and release them (but benefit from getting a member of staff on rotation from another anchor).
- It was agreed that a shared approach to recruitment would be the most suitable, after some attendees expressed that 'pool recruitment' had not worked well for them in the past. Hiring managers and a mixture of leads from the organisations would need to be involved, but exactly *how* needs to be identified to avoid having overly large interview panels.

In terms of **procurement**, we have explored two routes:

- 1. Joint approaches to one type of procurement. Opportunities to collaborate around catering were explored over a number of workshops. The potential practical route on the concessions stand (Homerton) and commercial offer (Hackney Council, Children's services) have paused for now while we await confirmation on contract details and in-sourcing decisions.
- 2. Social value in procurement. The group covered how to include measures relating to local spend, environmental protections and diversity measures into procurement frameworks. This has resulted in a number of routes to further collaboartive practice.

This highlights that the opportunities are always about learning, and steady improvement, as well as bigger opportunities to think about a significant opportunity.

Next steps

Tangible progress

- In September 2019 we were given endorsement to explore these ideas with the anchors.
- We have focussed on two areas and seen, despite considerable delays, these areas of work developed and they are building tangible projects.
- Some of the most significant changes have come in relationships being built across organisations within the system.

Governance challenges

- There are constraints around time, and endorsement. We think senior leaders could unlock this through a stronger endorsement to collaborate, and not just explore.
- We think this would really benefit from each anchor nominating a senior director to lead the work, and for us to work with them if we are struggling to gain traction.
- This would also give us a stronger accountability mechanism for colleagues to bring their work and ideas to.

About Renaisi – place is the thread

Renaisi is a Hackney social enterprise, committed to improving places for the people who live in and use them. We do that by trying to understand what drives social change, what role place has in social change, and we work with different stakeholders to achieve that. We work with:

- **individuals** experiencing economic exclusion
- social organisations trying to improve their impact
- funders looking to learn about the value and role of their investments
- place-based systems that want to work differently through leadership and coordination

Each of these stakeholders is an integral part of improving places and a target for our products and work as a social enterprise.

We aim to influence the policy and practice debate by delivering quality work, highlighting practical examples, and demonstrating our learning on the role of place-based approaches.

Title of report:	PCN progress in tackling Health Inequalities across City and Hackney						
Date of meeting: 10 June 2021							
Lead Officer: Dr Jenny Darkwah							
Author:	Office of PCNs						
Committee(s): City & Hackney Integrated Commissioning Board							
Public / Non-public Public							

Executive Summary:

address the inequality.

The PCN specification for Health Inequalities is not due to be released until April 2022. The slides represent work that has been started within and at PCN level. Each PCN has identified one or two areas of inequalities and tried to implement steps to

We are also working closely with public health and await the formation of the population health hub which should help to better inform each PCN.

At the last ICPB meeting the PCNs were asked to provide an update on the progress in tackling health inequalities

This information should be considered preliminary information for the ongoing work within PCNs

Recommendations:

The City Integrated Commissioning Board is asked:

• To **NOTE** the report.

The **Hackney Integrated Commissioning Board** is asked:

• To **NOTE** the report.

Strategic Objectives this paper supports

Deliver a shift in resource and focus to prevention to improve the long term health and wellbeing of local people and address health inequalities	
Deliver proactive community based care closer to home and outside of institutional settings where appropriate	
Ensure we maintain financial balance as a system and achieve our financial plans	
Deliver integrated care which meets the physical, mental health and social needs of our diverse communities	

Empower patients and residents	\boxtimes

PCN progress in tackling Health Inequalities across City and Hackney May 2021

Shoreditch Park and City PCN – Update on Tackling Health Inequalities – May 21

- Childhood obesity Key priority. Starting discussions with system partners including HCVS, Homerton, Neighbourhoods, public health team, CCG childhood clinical lead, and hopefully in the future residents to see service gap and implementations of pilots to support this agenda. Currently starting mapping of current services alongside this and looking at the data. Donated to Hackney playbus. Looking to see what ARRS roles will be supportive of this. This was also echoed by the recent work Suki did with patient engagement project-where participants said Childhood obesity was their number 1 priority.
- Isolated males New social prescriber that is just about to start the development of groups for socially isolated men in our PCN.
- Catch up smears As a PCN to support us in increasing cervical cancer screening uptake we have set up extended access smear catch up
 clinics for use all across the PCN. Practices can book in their patients to any of the available clinics-supporting in increasing
 accessibility. Clinical PCN colleagues have been focussing on making sure practices are booking in their LD patients into our smear catch up
 clinics
- PCN patient engagement work: Suki leading on this with Healthwatch hackney & City. Surveys, and Focus groups. Focus groups included Turkish community and Young people. Hopefully soon to complete one with the Community African Network. So far this has shown that there is a gap in interpretation services within GP surgeries, there is more covid & isolation seen (especially in men-hopefully the men isolation group will support with this), and they'd like to see more mental health services.
- **City Outreach project:** The City have been given a separate fund of money to ensure resident involvement and review of current services in the City, and where the gaps are, with the view of resident involvement in informing City specific or more city appropriate and accessible services for its residents. This includes engagement with the City homeless population.
- Covid & Flu vaccination hesitancy project: We are currently undergoing a research project to support us in understanding the hesitancy amongst staff members within our PCN Any learnings from this will result in potential proposals of how we can take this learning to then support us in increasing our covid & flu vaccination uptake amongst our patients. This may show up with certain health inequalities indicators.

Springfield Park and Woodberry Wetlands PCNs – Update on Tackling Health Inequalities – May 21

- Supporting the Anticipatory Care pilot, taking a proactive role with partners and stakeholders, including patients via Healthwatch to take a co-production approach to develop our Care Coordinators and Anticipatory Care pathway. We are looking to provide a personalised approach based upon specific population cohort identification.
- Cancer screening pilot for which we were awarded £16k from NHSEI in 2019
- Targeted work around improving access to childhood immunisations

Hackney Downs and Clissold Park PCNs – Update on Tackling Health Inequalities – May 21

Hackney Downs:-

- In Hackney Downs we have had Citizens Advice Bureau services running since last year and we have decided to continue this year too. ~(Citizen Advice Bureau).
- We also have recruited an HCA to see patients at PCN level including house bound persons, with a view to
 ensuring that we are helping to tackle inequalities.
- We are thinking about doing a project in relation to the Bowel Screening programme
- We also recently funded Anchor House to support patients 55 years plus with self isolation and reconnecting them to appropriate organisations, supporting them with physical and mental health issues etc

Clissold Park:-

The PCN aims to make ground with introducing a First Contact Dietitian pilot to City and Hackney, improve diabetes care via improved uptake of the NDPP and implement possible further diabetes pilots Thinking about running a 3 month programme to provide diet fitness sessions, cooking, exercise classes and workshops to tackle inequalities.

Planning on exploring a citizen's advice service to support our practices.

Well Street Common and Hackney Marshes PCN – Update on Tackling Health Inequalities – May 21

Hackney Marshes:-

- Hackney Marshes PCN is committed to improving patient experience and addressing their population health's through focusing on a series of initiatives aimed at increasing both cancer screening uptake and childhood immunisations, as well as actively tackling obesity.
- Hackney Marshes were recently successful in their application to NHSE/I to access funding to Pilot a Low Calorie Diet programme for people with Type 2 Diabetes. People eligible for the service are supported to lose weight, improve glycaemic parameters and potentially achieve remission

Well Street Common:-

Well Street Common is taking an active focus on mental health transformation in association with East London Foundation Trust ELFT as well as tackling projects focused on young people's mental health through developing and aligning of youth workers/ CAMHS/Young Hackney to a shared training programme and improving relationships.

Well Street Common have a CYP SP since April 2021, as we have noted our high numbers of "troubled families" in the data. There have been 32 referrals from our PCN practices in the 1st month. We are building links with schools through this work. We are also planning on recruiting a further CYP SP who will be focusing on violence reduction, and will be employed by Red Thread. Reduction of violence in YP is a priority already by our voluntary sector as there is a consortia grant awarded to a range of voluntary sector organisations in Hackney Wick.

London Fields PCN – Update on Tackling Health Inequalities – May 21

- Increasing patient engagement activities such as through the setting up of a local walking club from April 21
- Focused campaign work led by the PCN's Health and Wellbeing Coach promoting health prevention and new services/clinics
- Actively tackling mental health issues and increasing wellbeing Working closely with East London Foundation Trust, London Fields are working to support and manage rising levels of anxiety, depression and ADHD presentation

Title:	Integrated Commissioning Escalated Risk Registers						
Date of meeting:	10 June 2021						
Lead Officer:	Matthew Knell – Head of Governance & Assurance, CCG						
	Workstream Directors & Programme Managers						
Author:	Workstream Directors & Programme Managers						
Committee(s):	Integrated Commissioning Board, 10 June 2021						
Public / Non-public	Public.						

Executive Summary:

This report presents the escalated risks for the three Integrated Care Workstreams and the IC Operating Model / CCG Merger Program.

<u>Updated Risk Scores from Previous Meetings</u>

Children, Young People, Maternity and Families.

No changes to risk scores however risk 17 has been updated.

Unplanned Care

No changes to risk scores since last submission.

Planned Care

 No score changes however risks marked as "new risks" without a full scoring projection that have inherent red-rated scores are escalated to the board.

Recommendations:

The City Integrated Commissioning Board is asked:

• To **NOTE** the registers.

The **Hackney Integrated Commissioning Board** is asked:

• To **NOTE** the registers.

Strategic Objectives this paper supports:

Deliver a shift in resource and focus	\boxtimes	The risk register supports
to prevention to improve the long		all the programme
term health and wellbeing of local		objectives

people and address health inequalities		
Deliver proactive community based care closer to home and outside of institutional settings where appropriate		The risk register supports all the programme objectives
Ensure we maintain financial balance as a system and achieve our financial plans		The risk register supports all the programme objectives

8	Risk that low levels of childhood immunisations in the borough may lead to outbreaks of preventable disease that can severely impact large numbers of the population	15	4	10				15	*	Responsibility for commissioning and delivery of all immunisations sits across a wide range of partners. There is no statutory commissioning role for the CCG or for local Public Health, although City and Hackney CCG has continually invested in supporting delivery of immunisations in order to tackle our local challenges. Partnership work was developed through the measles outbreak in 2018 and the onoging non recurrent investment in the CP Confederation has been built on during the pandemic. Over the course of the recent Covid 19 surger esidenticy/patients have not been accessing routine healthcare to usual levels. A 2 year action plan to improve immunisations across the whole life course has been developed, with a number of pilots and interventions. These were set out in a paper to the ICB in June 2020. Key progress includes: 1. Commissioning of GP confederation catch up programme to support primary care ahead of winter 2020 (lagreed July 2020) - good plans are in place and this is being taken forward with the GP Confederation. 2. Proposal being developed for health visitors to deliver immunisations in children's centres and for key 'at risk groups (le. familles in temp accom) 3. The Back to school communications campaign on childhood immunisations finished on 25 September, and communications are now focusing on flu immunisations. 5. Specific interventions for the North of the borough continue to be commissioned and delivered, including Sunday clinics, with new models being explored This risk is past of a broader system risk on immunisations, and there is still work to be done to clarify how responsibility for managing the risk is shared between CYPM, Planned Care and Primary Care Northstreams. A specific report on thi immunisations went to the October (EB. Current uptake of flu vaccinations for 75% coverage. Update 012.1 over winter in the 2nd peak imms coverage continues to deteriorate. GPC funding has focused on the flu campaign with the imms badged funding (£100k) to be accused and peace of the propers	15		✓		√	
17	Significant staffing and recruitment issues in the HUHT Community Paediatrics service (approx 50% of Doctors)	15	6			12	12	12	⇔	Risk escalated to risk register and HUHT risk assessment requested 30/07/20. Interim support secured and workforce strengthened for high risk areas such as LAC. Risk not reduced in quarter as known vacancy issues emerging in December though recruitment planned. Update 29/01: During 2nd peak staffing concerns continue largely re fragility of LAC IHA Doctor resource (2 clinic streams retained currently) and EHCP clinic should numbers of assessment referrals increase - currently very low but influx may be expected. Due to shortage of paediatricians the role of Named Dr for safeguarding children HUH Community is currently unfilled. Update 05.21: CG requested staffing plan and HUHT submitted the report that went to their April Trust Board. The CCG has requested further detail. Progress can be evidenced but risk remains around success of planned recruitment to 5 Consultant posts Update 01/06/21: - Risk reviewed in detail at May SOG and escalated by SRO to HUHT - 3 out of 4 Consultant posts recruited to in May 2021, likely start dates September; these posts include the Named Dr for Safeguarding and the DMO - Locum Doctors (and interim DMO) will continue to deliver service in interim - Consultant post not recruited to is the Neurodisability post; ongoing review of autism pathway and waiting times continues - Interim performance dashboard to be agreed to monitor risks	12		✓	√	✓	
18	Potentially significant increased demand for CAMHS support througout the impending phases of the pandemic, at specialist and universal level for children and families. As the pandemic has continued, we have seen increased pressure on T4 beds, and increasing crisis and ED presentations, which is also reflected across NEL and London. Many services are seeing a large risk in the number of referrals, particularly Tier 3 CAMHS, Eating Disorders and Crisis. In addition, specialist CAMHS have raised a risk of staff absence through sick leave due to workload.	12	9			12	12	15	1	CAMHs have responded flexibly to support families during the peak of COVID, alongside schools and there are robust contingency plans in place for this to continue. This includes solid governance structures, RAG rating patients, children and families, the introduction of new online support and new services in development. We are now becoming more concerned about ongoing impacts of th pandemic on adolsecent and CYP mental health, with T4 beds at capacity and increasing presentations. This is being addressed at NEL, with a new crisis group working with the provider collaborative, and an Integrated discharge planning group has been set up to meet fornightly (with C&H, Newham and Tower Hamlets) with reps from health, education and social care to strengthen the community offer. Several new services are supporting families online (Kooth, Helios) and we are developing plans for an integrated T3.5 service. Through WAMHS we are writing to schools to encourage them to use their linked clinician for consultation so that, where possible, cases can be held through school intervention and referral to range of agencies, making sure referrals to CAMHS are appropriate. MHST has extended it's offer beyond it's original scope of Wave 1 WAMHS schools, to invite all schools to universal parent support and training groups (primary & secondary), as well as groups for secondary age children. Update 05:21: This risk and mitigation is continuing to be monitored closelv and is now also reporting to the Integrated Fmotional	15	✓	✓		✓	✓

PC16		Medium to long term health impact of Covid and Covid related suspension of susual area on people with Long Term Conditions. This may be due to failure to present to health care settings: reduction in proactive monitoring and care or difficulty in accessing services due to restrictions. Likely to have a significant deview impact on especially vulnerable groups including those in deprived socio-economic groups, people with LD and people from BAME backgrounds. This may become a "rising the" of people with vosersing health outcomes and complications of diseases such as diabetes.		9 >	: x	16 16	Same	Oagoing monitoring in place to support planning for medium-long term. Development of data models will be scheduled for later in the year to understand the quartathet impact. Engagement and Listening Events also planned to be scheduled for later in the year to gain a qualitative understanding of local need. Review of LTC contact for 21/22 in pipeline to address failout from COVID, particularly for vulnerable groups. This will also focus on LTC covery and how to manage the situation post-COVID. Business: case presented to PFc in March 20/21 for additional resources to help practices recover their LTC management programme as well as additional Pulmonary rehab. New tool developed to search for most at risk groups for practices to focus on. Exploring options for engagement activities and group consultations with specific patient cohorts later in the year. Full impact of pandemic on these groups is yet to be established.	16	/					
PC7	BAU	NSCSO-Limited stock availability of some widely prescribed generics significantly drove up costs of otherwise low cost drugs. The price concessions made by OH to help manage stock availability of affected products, were charged to CCGs-this arrangement (referred to as NSC9) presents C&H CCG with an additional cost pressure. As a result of EU evil, there is risk of transport delays of medicines which could lead to limited stock availability of medicines (which could further drive up the cost of commonly prescribed drugs).		9 2	0 20	20	Same	The NTS has put measures in place to help ensure stocks continue to be available even if there are transport delays. The national recommendation is that medicines should be prescribed and dispensed as normal and that medicines should not be tacoptiled, the MMT has already shared the message regarding appropriate prescribing and ordering of medicines to prescribers and patients (through Healthwatch Hackney) during the first wave of the COVID-19 pandemic – Spring 2020 and again in Nov/ Dec of 2020. For 2000/21, as of January 2021 prescribing data is only available for April -October 2020. Based on the 7 months data, the estimated annual cost pressure for NSOs is £567.21 kin addition to a cost pressure of £567.788 for the associated cost pressure of increased Drug Tariff prior furgue prescribed. An additional cost pressure form increased costs of redeptory M products as a consequence of DH announcement to claw back £15M per month from CGs by increasing the cost of these drugs from June 2020. The estimated cost impact for C8H CCG for this clawback is £412,090 over June 2020 to March 2021. Previous low sorres was due to lit these cost pressures being fully mitigated by QIPP savings delivered, each year to 2019/20, by the Meds Management team in conjunction with practices. So in previous years prescribing budget has always remained break even or underspent. An additional prescription cost factor arting from Covid pandemic is that there appears to be much higher compliance with medicines or at least with having prescriptions being dispensed with upto 30% higher rates of prescriptions dispensed.	20			/			
PC8	BAU	There are significant financial pressures in the Adult Learning Disability service which require a sustainable solution from system partners	20	9 2	0 20	20	Same	Although there was a huge reduction in the overall overspend, ILDS was ±2:million overspent text financial year. Work is orgoing to get a clearer politure of the budget and ensure consistency of some costs e.g. interrogation of day service costs and sign up to a SLS Framework. Overspend was in part as a result of extra support needs around coold (e.g. increased 1.1 support) which is likely to continue with the current Pandemic, it's highly unlikely that savings could be made. Furthermore the LBH cyberattack has meant preparatory and preventative work has been negatively impacted and many costs reain unclear. This is a new financial year so although the overspend is currently not an issue it is a likely risk for this year.	20			/			

<u>Unplanned Care Workstream Risk Register - May 2021</u> Cover Sheet

19 / UCTBC2	Risk that there is an increase in non-elective acute demand - either driven by a return to normal levels of admissions or a further peak in COVID-19 demand.	20	12	16	12	16	16	*	SOC are overseeing a range of plans to strengthen community support including Neighbourhood MDTs and Primary Care Long Term Condition Management Working with 111 to improve usage of admission avoidance pathways through SDEC and ACPs - Pathways put in place, ongoing reporting and monitoring occuring via NHSD and 111 reports. Work with 111 and onward UEC pathways will be focus of new NEL UEC subgroup - this group will be established imminently and will agree objectives work plan as first priority, meet reguarly after this to drive delivery.	16			✓	✓	
20 / UCTBC3	Risk that we do not understand and/or do not reduce the impact of health inequalities for local populations across the workstream, and this is exacerbated in the context of the pandemic.	20	6	16	16	16	12		Work is ongoing to understand and respond to local inequalities as we move out of the pandemic. Work commenced on developing proposals for partnership arrangements within Neighbourhoods which would bring together residents, voluntary and community sector, PCNs and other health/ care organisations. Forums such as Neighbourhood Conversations enable engagement with local communities about what is important to them. Our aim is to have some form of partnership / strategic delivery group to help drive local improvements within Neighbourhoods. PCNs currently recruiting to additional roles which are about increasing services in PCNs to address local population health needs. Nationally the Health Inequalities Direct Enhanced Service (DES) which was due to be published in April 2021 as a requirement for PCNs to deliver has been delayed (no date has been confirmed for when it will be published). This will also give an opportunity for system partners to work with PCNs in tackling health inequalities. The Discharge Workstream business case for a Homeless Hospital Discharge Team was approved before Christmas and contractual mechanisms are being reviewed to mobilise the service by the new fiscal year.	16	✓	✓			✓

	care setting, but this must be delayed. This can be
	Experiences Adult Cardiorespiratory Enhanced and Responsive Service Accountable Officers Group Care Programme Approach Children and Young People's Service City, The City of London Corporation City and Hackney System Clinical Commissioning Group Community Health Services Community Health Services Directed Enhanced Services Delayed Transfer of

		for a number of reasons, for example, because there is not a bed available in an intermediate care home.
ELHCP	East London Health and Care Partnership	The East London Health & care Partnership brings together the area's eight Councils (Barking, Havering & Redbridge, City of London, Hackney, Newham, Tower Hamlets and Waltham Forest), 7 Clinical Commissioning Groups and 12 NHS organisations. While East London as a whole faces some common problems, the local make up of and characteristics of the area vary considerably. Work is therefore shaped around three localized areas, bringing the Councils and NHS organisations within them together as local care partnerships to ensure the people living there get the right services for their specific needs.
FYFV	NHS Five Year Forward View	The NHS Five Year Forward View strategy was published in October 2014 in response to financial challenges, health inequalities and poor quality of care. It sets out a shared vision for the future of the NHS based around more integrated, person centred care.
IAPT	Improving Access to Psychological Therapy	Programme to improve access to mental health, particularly around the treatment of adult anxiety disorders and depression.
IC	Integrated Commissioning	Integrated contracting and commissioning takes place across a system (for example, City & Hackney) and is population based. A population based approach refers to the high, macro, level programmes and interventions across a range of different services and sectors. Key features include: population-level data (to understand need across populations and track health outcomes) and population-based budgets (either real or virtual) to align financial incentives with improving population health.
ICB	Integrated Commissioning Board	The Integrated Care Board has delegated decision making for the pooled budget. Each local authority agrees an annual budget and delegation scheme for its respective ICB (Hackney ICB and City ICB). Each ICB makes recommendations to its respective local authority on aligned fund services. Each ICB will receive financial reports from its local authority. The ICB's meet in common to ensure alignment.

ICS	Integrated Care System	An Integrated Care System is the name now given to Accountable Care Systems (ACSs). It is an 'evolved' version of a Sustainability and Transformation Partnership that is working as a locally integrated health system. They are systems in which NHS organisations (both commissioners and providers), often in partnership with local authorities, choose to take on clear collective responsibility for resources and population health. They provide joined up, better coordinated care. In return they get far more control and freedom over the total operations of the health system in their area; and work closely with local government and other partners.
IPC	Integrated Personal Commissioning	
ISAP	Integrated Support and Assurance Process	The ISAP refers to a set of activities that begin when a CCG or a commissioning function of NHS England (collectively referred to as commissioners) starts to develop a strategy involving the procurement of a complex contract. It also covers the subsequent contract award and mobilisation of services under the contract. The intention is that NHS England and NHS Improvement provide a 'system view' of the proposals, focusing on what is required to support the successful delivery of complex contracts. Applying the ISAP will help mitigate but not eliminate the risk that is inevitable if a complex contract is to be utilised. It is not about creating barriers to implementation.
LAC	Looked After Children	Term used to refer to a child that has been in the care of a local authority for more than 24 hours.
LARC	Long Acting Reversible Contraception	
LBH	London Borough of Hackney	Local authority for the Hackney region
LD	Learning Difficulties	
LTC	Long Term Condition	
MDT	Multidisciplinary team	Multidisciplinary teams bring together staff from different professional backgrounds (e.g. social worker, community nurse, occupational therapist, GP and any specialist staff) to support the needs of a person who requires more than one type of support or service. Multidisciplinary teams are often discussed in the same context as joint working, interagency work and partnership working.

MECC	Making Eveny Contact	A programme corose City & Hackney to improve
IVIECC	Making Every Contact Count	A programme across City & Hackney to improve peoples' experience of the service by ensuring all
	Count	contacts with staff are geared towards their needs.
MI	Myocardial Infarction	Technical name for a heart attack.
	Neighbourhood	The neighbourhood model will build localised
	Programme (across City	integrated care services across a population of
	and Hackney)	30,000-50,000 residents. This will include focusing
		on prevention, as well as the wider social and
		economic determinants of health. The neighbourhood model will organise City and
		Hackney health and care services around the
		patient.
NEL	North East London	This is the commissioning arm of the East London
	(NEL) Commissioning	Health and Care Partnership comprising 7 clinical
	Alliance	commissioning groups in North East London. The
		7 CCGs are City and Hackney, Havering, Redbridge, Waltham Forest, Barking and
		Dagenham, Newham and Tower Hamlets.
		Bagermani, Newmani and Tower Flamilets.
NHSE	NHS England	Executive body of the Department of Health and
		Social Care. Responsible for the budget, planning,
		delivery and operational sides of NHS
NILIOI	NILIO Income and	Commissioning.
NHSI	NHS Improvement	Oversight body responsible for quality and safety standards.
	Primary Care	Primary care services are the first step to ensure
	, , , , , , , , , , , , , , , , , , , ,	that people are seen by the professional best
		suited to deliver the right care and in the most
		appropriate setting. Primary care includes general
		practice, community pharmacy, dental, and
PD	Personality Disorder	optometry (eye health) services.
PIN	Prior Information Notice	A method for providing the market place with early
1 11 1		notification of intent to award a contract/framework
		and can lead to early supplier discussions which
		may help inform the development of the
		specification.
QIPP	Quality, Innovation,	QIPP is a programme designed to deliver savings
QIII	Productivity and	within the NHS, predominately through driving up
	Prevention	efficiency while also improving the quality of care.
QOF	Quality Outcomes Framework	
	Risk Sharing	Risk sharing is a management method of sharing
	9	risks and rewards between health and social care
		organisations by distributing gains and losses on
		an agreed basis. Financial gains are calculated as
		the difference between the expected cost of

		delivering care to a defined population and the actual cost.
	Secondary care	Secondary care services are usually based in a hospital or clinic and are a referral from primary care. rather than the community. Sometimes 'secondary care' is used to mean 'hospital care'.
	Step Down	Step down services are the provision of health and social care outside the acute (hospital) care setting for people who need an intensive period of care or further support to make them well enough to return home.
SOCG	System Operational Command Group	An operational meeting consisting of system leaders from across the City & Hackney health, social care and voluntary sector. Chaired by the Chief Executive of the Homerton Hospital. Set up to deal with the immediate crisis response to the Covid-19 pandemic.
SMI	Severe Mental Illness	
STP	Sustainability and Transformation Partnership	Sustainability and transformation plans were announced in NHS planning guidance published in December 2015. Forty-four areas have been identified as the geographical 'footprints' on which the plans are based, with an average population size of 1.2 million people (the smallest covers a population of 300,000 and the largest 2.8 million). A named individual has led the development of each Sustainability and Transformation Partnership. Most Sustainability and Transformation Partnership leaders come from clinical commissioning groups and NHS trusts or foundation trusts, but a small number come from local government. Each partnership developed a 'place-based plans' for the future of health and care services in their area. Draft plans were produced by June 2016 and 'final' plans were submitted in October 2016.
	Tertiary care	Care for people needing specialist treatments. People may be referred for tertiary care (for example, a specialist stroke unit) from either primary care or secondary care.
	Vanguard	A vanguard is the term for an innovative programme of care based on one of the new care models described in the NHS Five Year Forward View. There are five types of vanguard, and each address a different way of joining up or providing more coordinated services for people. Fifty

		vanguard sites were established and allocated funding to improve care for people in their areas.
VCSE	Voluntary Community and Social Enterprise
