

## **Item 5 - Questions from Members of the Public**

### 5.1 Question received from Ruth Parkinson, to the Cabinet Member for Energy, Waste, Transport and the Public Realm

Hackney Council commissioned an independent survey on LTNs by Opinion Research Services which is closed. So could the Council indicate where the results are published so residents can access it and, if unpublished, the date it will be published and an explanation as to why it is not already available?

### 5.2 Question received from Clair Battaglino, to the Cabinet Member for Energy, Waste, Transport and the Public Realm

Do Cabinet members support the establishment of Low Traffic Neighbourhoods that work by displacing traffic from areas with cleaner air onto roads where there are many of Hackney's most deprived schools, despite the Council's own research stating, "schools on main roads are exposed to higher levels of air pollution?"

### 5.3 Question received from Imogen O'rorke, to the Cabinet Member for Energy, Waste, Transport and the Public Realm

What is being done to mitigate the harm to "groups already disproportionately impacted by the secondary effects of motor vehicle use" (as identified by the Council), including "those on low incomes, people of minority ethnic backgrounds, the elderly and children?"
