We have already had a dead cherry removed and replaced it with a similar species. The two remaining mature trees are 1. SYCAMORE and 2. LIME - both with TPOs (6-2005) It is many years since arboreal work has been carried out and now both trees are now both very large. They are currently healthy but it is clear that some management of these trees would be beneficial for their future. We have had advice and quotes from three separate tree surgeons who have all made similar recommendations. Proposed work as follows: T1. SYCAMORE 2 - 3 metre crown reduction T2.
